The first LaserWriter that fits in your wallet.

Introducing the affordable Personal LaserWriter LS.

Now you can get impressive, professional-looking documents without waiting in line for the laser printer at the computer lab.

The new Personal LaserWriter[™] LS printer is the most affordable Apple[™] LaserWriter ever. It has the power to produce crisp text and rich, high-definition graphics at a rate of up to four pages a minute (it even has a built-in, high-speed serial connection to further enhance printing performance).

It incorporates TrueType[™], Apple's new font technology that lets

you scale and print characters smoothly and precisely, from the smallest footnote to the largest headline.

This means that now every student and professor can afford a printer that creates the sharpest and most impactful documents — with diagrams, charts and illustrations that leap off the page.

In other words, it was designed to let you get everything out of a Macintosh[™] computer that Apple built into it. Not just the power to look your best. The power to be your best.

**Microcomputer Support Lab, 202 Computing Center
