The House of Love
A Spy in the House of Love

"Safe," the second song on the second album released by the British group The House of Love, is probably the most accurate word that can be used to describe the band's latest work.

The music on "A Spy in the House of Love" is not bad music, but more importantly, it's not that great either. The band's synthesizer-laden, dreamily melodic sound is so eerily like every other British new-wave band that you might think you're listening to The Cure, or even an early '80s Modern English album.

Lead singer Guy Chadwick says most of the songs on the new album are leftovers from the band's first album, but were just too good to bury. So The House of Love has released these leftovers to bide time until they can release a full-fledged second album.

Hopefully, the band can find some more creative means to exert their obvious talent. Songwriter Chadwick simply needs to find a more original way to express his creative energies. The sound he now uses to relate his musical messages has been used for many years.

Bright spots like "Shine On," the album's seventh track, are overshadowed by the ominous feeling that you've been there before. And if you're a fan of The Cure, you have been. Die-hard fans of the '80s British invasion will appreciate the album, but people looking for a little more would do better to keep searching through their favorite record store's aisles.
