Equestrian quest

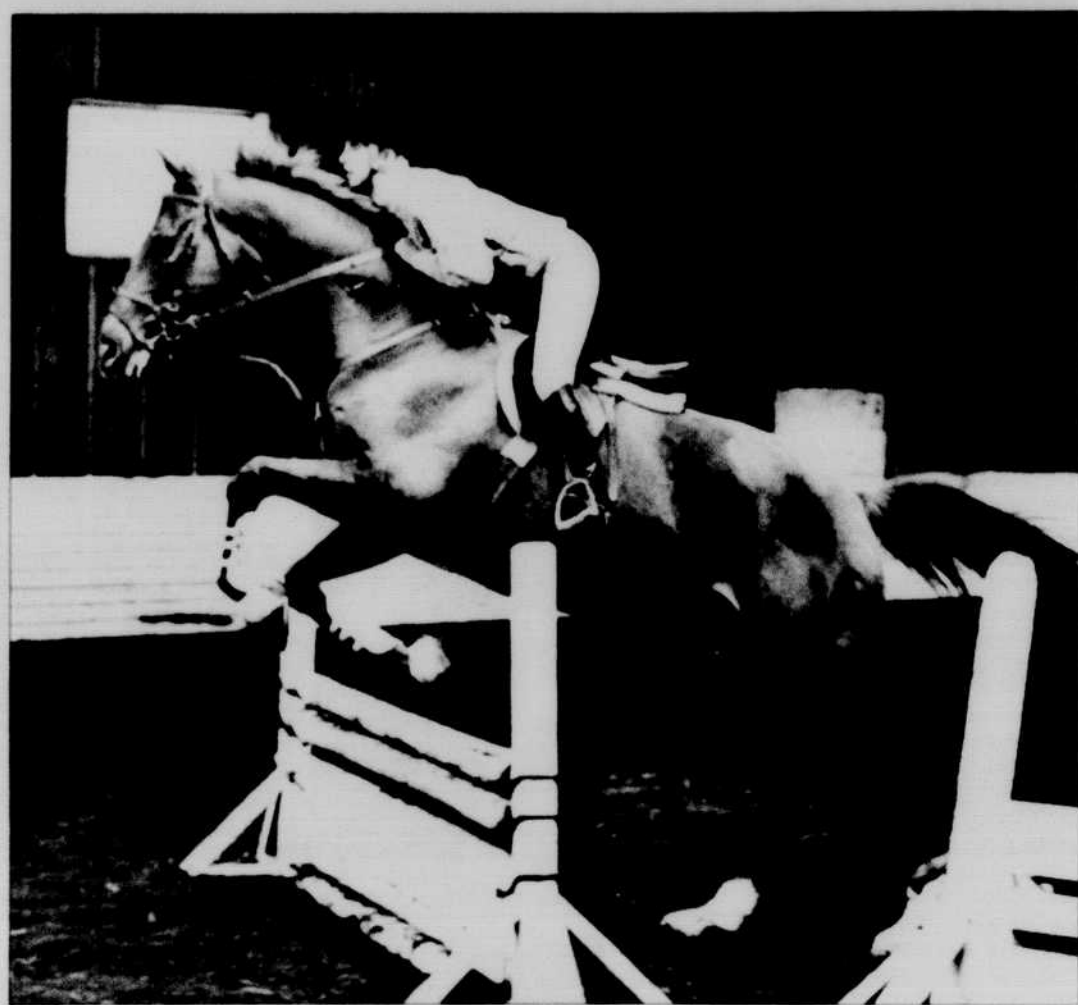

Photo by Michael Shindler

Anna Haldane urges on My Chauffeur to win the mini jumper and equitation over fences events at the equestrian club schooling show on Sunday.

POLICE BEAT

The following incidents were reported to the Office of Public Safety and the Eugene police department from March 15-29.

• Two unidentified men committed a burglary at the Sigma Nu fraternity house, 736 E. 11th Ave., on March 20, according to police reports. Police, however, recovered most of the stolen items.

A 19-year-old fraternity member said he was in his room when he heard noises coming from the room next door, according to police. The room's resident was gone. The fraternity member walked into the man's room to investigate and found an open window and property on the roof.

The man leaned out the window and saw the first suspect running through the backyard but soon lost sight of him. A stolen hat fell from the suspect's head as he ran. Another fraternity member said he saw a second suspect also running from the building.

The suspects attempted to steal \$2,100 in merchandise including a keyboard, a video cassette recorder, a video camera and a body board, according to police. Police recovered all of the items except for an alarm clock valued at \$50. Police have no suspect information.

• An unidentified man stole a pool cue from the EMU recreation center March 20, according to police reports.

The center's manager said a man came in and asked her if he could try out some of the cues she offered for sale, according to police. The man took two cues, rented some balls and began play-

ing pool. The manager said she left the area because other employees were in the front area.

Later an employee handed the manager one of the cues the man had taken. The manager asked him where the other cue was and he said only one had been returned. Recreation center employees searched for the missing pool cue and the man, with no success.

Another employee said a man who was standing behind the suspect when he paid for his pool games returned one of the pool cues and returned the balls. This other man held a pool cue, but the employee thought the pool cue belonged to the man.

• Computer and related hardware valued at \$1,000 was reported stolen from the EMU Computer Lounge sometime between March 25 and 26, according to police reports.

The suspect or suspects either used a key or jammed the southeast double doors to gain entry, according to police. There were no obvious signs of force but the southeast doors had recent scratch marks on both sides.

According to police, some kind of tool could possibly have been used to reach through the center crack between the doors and push the release bar.

EMU computer lounge employees believe an employee may have been involved in the burglary, according to police. The suspect or suspects turned off the alarm system, which requires a combination.

SPEECH

Continued from Page 5

to students, faculty, Lane County and the state in general, Brand said.

Though this year more people will graduate from high school in Oregon than last year, the University has received fewer applications for enrollment than last year.

"We're entering a new phase in Oregon where besides exporting raw logs and wheat, we also export our best and bright-

est," Brand said.

With the inevitable tuition increase, Brand said that only the wealthy and the poor will be able to go to college in Oregon.

"Those who can afford it will have access and those who really need it will get financial aid, and it will be the middle class that will be affected," Brand said.

With a widening gap in the earning potential between college and high school graduates, this does not bode well for the future, Brand said.

'We're entering a new phase in Oregon where besides exporting raw logs and wheat, we also export our best and brightest.'

— Myles Brand, University president
