This Building Has the Edge in Saving Money on Energy Costs

UNIVERSITY CENTER
DESIGN STUDIO:
BRUCE SINKEY ARCHITECT AIA

Design Studio/Bruce E. Sinkey, Architect, AIA, knows that the smart money is on Eugene Water & Electric Board's **Energy Smart Design** program. They worked with EWEB's Energy Management Services in identifying cost-effective measures that made the University Center building 30% more energy efficient than Oregon building code requires.

As a result, University Center has been designated as an "ENERGY EDGE" award winner by EWEB and the Bonneville Power Administration.

Energy Smart Design. It's all designed to save on the cost of heating, cooling and lighting your new commercial building. That's energy efficiency by design.

For more information on the **Energy Smart Design** program, phone EWEB's Energy Management Services at 484-1125.

Eugene Water & Electric Board

500 East 4th Avenue
Eugene, Oregon 97401
