

## Is it too easy to receive an A in your classes?

"Hell no. I have to study all the time. I spend over 25 hours a week in the library."

**ROSY COLLINS**  
sports medicine, freshman

"Yes, it's far easy. I can get 70 percent on a test and still get an A because of the big curves."

**LINDA BURDWELL**  
biology, senior

"It depends on your classes and what your major is."

**SCOTT RITCHIE**  
physics, sophomore

"No, I work night and day to receive my A's."

**EMILY CORNELL**  
business, freshman

"No, because the classes are so big you only have two chances: the midterm and the final."

**CATHY BRENNAN**  
journalism, sophomore

"Yes, definitely. Back home in Australia it was substantially tougher to receive an A than here."

**ED MYLES**  
creative writing, graduate

address rent increases incurred by renovation or new construction, which is what many advisory group members said is the most important issue in considering either option.

Some students on the Design Advisory Group fear that University administrators seeking an easy solution will pay more attention to the Endex conclusions than to rent increase considerations.

Taking this into account, the

advisory group will make their conclusions and recommendations in a letter to University Housing Director Mike Eyster on Wednesday. Eyster will then attach his own recommendations and forward all of it to Williams.

Williams said that he plans to read the entire report and consult the design group before making a decision.

Williams will make a final decision regarding Amazon within a few months. Renovations or construction will begin during this spring's building season.

## RADIO

Continued from Page 1

program.

The program offers three hours of music and discussion with guests. Some of the discussion topics deal with issues that affect the Latino community, such as racism and education.

The program is broadcast in both Spanish and English, allowing student groups to get their messages out to others much faster than any print medium.

KWVA receives a majority of its funding through the IFC. "We're fifteen years behind the times in equipment because of the lack of funding," Pierson said.

However, Pierson is confident that the station can increase its funding through internal efforts. He hopes to receive more grant money through the Federal Communication Commission, underwriting and other avenues.

Underwriting is unique to noncommercial, educational radio. It allows local businesses to have their company's name mentioned at the end of radio program for a small fee. However, there are strict regulations by the FCC.

The radio station can't use action words. It can't speak of special events or sales put on by the business. This distinction is important so that noncommercial radio stations don't mesh with the larger, commercial radio stations.

KWVA has changed a lot in past months, but funding is still necessary in order to continue the trend of improvement. "Our programs before were self-interested and we played music that we (KWVA employees) and the students liked to hear," Pierson said. "Now, we're giving student organizations a chance to educate other students and themselves. We want to be leaders on campus and in the community."

## FRESHMEN

sleep over making career choices," Smith said. "Basically, an individual should attend to the issue of career at the point in time he feels he needs to face the career dragon."

Before taking on the "career dragon," Smith said students generally spend the first two terms of their freshman year organizing themselves and developing the skills needed to effectively compete in their new college environment. Some even feel a strong need to clarify career goals.

During sophomore year, students begin exploring career possibilities and making major considerations of career deci-

sions. By the time junior year rolls around, students must declare a major and some are already working at internships. It's usually at this time that students run to CPPS for guidance.

Smith said CPPS is seeing an increased number of freshmen coming in for counseling, orientations to the office, or just learning what CPPS is all about through lists of services that it offers.

Resources available at CPPS include the System of Interactive Guidance Information Plus, which is a computer system that matches interests and skills of students with career suggestions, internships such as the Alumni Mentor Program, and classes such as Counseling Psychology 408, Success Skills.
