

WHAT'S STOPPING YOU?

If you're not braking with Ultra Wheels' revolutionary Disc Brake System, you're not stopping, you're skidding! And sooner or later, you'll skid into this brick wall. That's why Ultra Wheels introduced DBS. The only brake designed like your car's disc brake system, new DBS hugs the road so you brake gradually, easily, safely. Even on hills and corners. That means no more scary skidding stops. Just total in-line control without the headaches.
