Solar For Every Family Under the Sun

The Tognazzini family needs lots of hot water, and they heat it with the sun!

"We have five in our family, and we also operate a day care center out of our home. At night, we make salsa, which we label and sell to grocery stores locally. So we bought the biggest solar water heating system we could.

"We have two roof panels and a 119-gallon tank, and we've never run out of hot water. It's perfect for us because there's no maintenance.

"Since we got our system, we've reduced our electric bills by about \$40 a month."
