

• Eugene Mayor Ruth Bascom encourages Oregon football fans with tickets to the University of Washington game on Nov. 4 to join her in riding the Amtrak trains to and from Seattle. The Cascadia departs from Eugene on Friday, Nov. 3 at 6:10 a.m. and arrives in Seattle at 12:45 p.m. The return trip is on the Coast Starlight, departing Seattle at 8 a.m. Sunday, Nov. 5 and arrives in Eugene at 3:07 p.m. Alternately, fans can leave Seattle at 5:10 p.m. on Cascadia and arrive at 11:45 p.m.

Call your local travel agent for train reservations. Group seating may be available and an additional train car may be added if needed.

Wilcox Travel is offering a tour package with a limited number of game tickets, round-trip train fare, accommodations, etc. For more details contact Annie of Wilcox Travel at 345-5018. Reservations for a tour package must be made by Tuesday, Oct. 10.

• A second annual deal-a-smile casino night will be held Saturday, Oct. 14. An evening featuring live jazz with the Tracy Kim Quartet, hors d'oeuvre buffet, no-host bar, Sid Voo games and auction with Cas Voorhes and Dr. Rich Gabriel will be

## COMMUNITY

# Calendar

held at 5:30 p.m. at the Downtown Athletic Club. The event will benefit the new low-income Community Dental Clinic. The cost is \$15 per person. Call 343-8302 for tickets, which will also be sold at the door.

Deal-a-smile is a fundraising event sponsored by Siuslaw Valley Bank. Its purpose is to provide community support for the clinic and to realize the continued grant support that keeps the clinic in operation. For further information, contact Debra Murrey at 346-2752 or Charlene Murray at 343-3822.

• The public is invited to join the "financial" battle against breast cancer by participating in the second annual "Walk for Life," a benefit for "Rx for Breast Cancer," a fund to help women with breast cancer defray the costs of medicine, child care, medical equipment and transportation. "Walk for Life" will begin at 9 a.m. on Saturday, Oct. 14, at the George Owens Memorial Rose Garden, near Skinner Butte Park. A \$15 registration

fee is required to participate. Those submitting \$50 or more in donations will have their registration fee waived. All proceeds from the walk will go toward the fund. For more information or to register, please call Sacred Heart Medical Center's Cancer Care Center at 686-7257.

• The second "Fall High Tea" will be held at the Shelton-McMurphy Johnson House, Sunday, Oct. 15, from 1 to 4 p.m. The cost is \$10 and the menu includes: Hot English-style black tea and herb tea, a variety of tea sandwiches, tea cakes, tea cookies and seasonal fruit. R.S.V.P. at 484-0808. The address is 303 Willamette St., north of the Amtrak Station. Parking is available on Fourth Street, just below the house and handicapped parking available at the house.

• Springfield's annual leaf collection program, called "Leaf it to Springfield," is scheduled to start Monday, Oct. 16, with the distribution of leaf bags.

Created in 1988 to help reduce street flooding, the program offers biodegradable, plastic bags to people who live within Springfield city limits. Residents are required to sign their name and address before receiving bags. Bags will be

available on a first-come, first-served basis Oct. 16-20 at numerous locations. City Hall locations include City Manager's Office, Library and Public Works department. City Hall is at Fifth and A Streets, Springfield.

Leaf pickups are scheduled to run Nov. 27 through Dec. 22. A complete schedule will be released next month. For additional information, contact the city's Leaf Pickup Hotline at 726-3637.

• The Whiz Techs, volunteers at the Willamette Science and Technology Center, will be helping the Dinosaurs settle in at WISTEC. WISTEC is now recruiting volunteers for this unique traveling exhibit. Volunteers are needed for many positions including teachers, cashiers, school group guides and office assistants. No experience is necessary, just a desire to explore the world of hands-on science.

A new volunteer orientation will be offered at WISTEC (near Autzen Stadium on Leo Harris Parkway) Tuesday, Oct. 17 from 6 to 7 p.m. Call Gil Anspacher, WISTEC Volunteer Coordinator at 687-3619 for more information.

## Career: Employers looking for well-trained University students

■ Continued from Page 1

interns in their chosen field. "Definitely in the internship program there have been people who got contacts and got jobs," Swank said. "We're trying to push internships."

The Center receives \$3 per student, per term, from the incidental fees. The student body voted for this allocation in the elections last spring. With this money, the center has expanded its services and hired additional staff.

"It was money well spent," Swank said.

The funding has also eliminated all user costs for the center. Previously, users were charged a per term fee for services and registration.

The center maintains a record of all registered student's career interests. This makes students eligible to receive information about

possible job opening and internship possibilities.

Sara Vickery, career service director, said the job market locally, regionally and nationally is competitive. However, she said there are steps students can take that improve their chances.

"It seems to be kind of hard to get a job," said Dai Aki Yama, a senior in business finance.

Employers are looking for well-rounded employees, Vickery said. "They don't want workaholics," she said. "A sense of humor is good."

Vickery said the center sees mostly older students who have realized that the reality of the professional world is just around the corner. Vickery said most younger students are looking for part-time or work-study positions.

## INSTITUTE: Research projects use computers to simulate science

■ Continued from Page 1

science was involved in theoretical and experimental work. More and more now, computation is arising as a third way as doing these problems."

Cuny said the field of using computer models has greatly expanded in the last four or five years even though the computer application has been used for decades.

Institutes like the one at the University exist at about one or two dozen other colleges, he said, but the technology is used at many more.

The goals of the Computational Science Institute are:

- to form an intellectual community that focuses on applying computation in research
  - to encourage multidisciplinary cooperation and team research
  - to combine education and training in computational science
  - to share and support common computational resources
- Those working in the institute

acquired a computer system in January that ranks 135th in the world for speed, Cuny said.

The computer is used to work on three different projects. Besides the species extinction model, the institute is using models to find the earth's interior. Another project involves superconductivity. Cuny said these computers have increased the processing speed on projects from 24 hours to a few minutes.

The projects involve different areas of science, which gives the institute a broad focus.

"There is a big emphasis on multidiscipline in the projects," Cuny said.

Terry Takahashi, associate professor of biology, agrees.

"[The institute] allows scientists in different fields, whether it be biology or geology, to meet and talk about computations," he said.

The institute will be funded by the University for two years, Cuny said. After that, the institute will depend on donations and federal grants.
