

Employment: Many jobs prefer internships on resume

Continued from Page 1

Other skills students receive are organizational adeptness and the ability to work under deadlines. Gwen Poole, associate editor of the *San Francisco Chronicle*, said new employees need to be able to hit the ground running and show results while working under the gun.

"More often than not, these skills are not something someone is born with, but learned; internships provide a place for this," Poole said.

Adam Yip is a congressional work study student and law school hopeful. He cited valuable work experience, a flexible schedule and a possible letter of recommendation as reasons for interning.

"Just because you go to college doesn't mean you have a job guarantee," Yip said. "At the very least, being able to put down 'congressional intern' instead of '7-Eleven clerk' may give me the edge I need."

Students may learn more about internships from a variety of sources. The Career Center has information on local and national internships, workshops and its own Career Development Internship Program. Students may also choose to contact their faculty advisors, a business or organization directly.

While requirements for internships may vary, most application procedures involve submitting a cover letter, resume and possibly a letter of recommendation and writing samples, according to the National Business Employment Review. Enthusiasm and a "go-getter" attitude are also listed as key elements in obtaining an internship.

TIPS FOR PROSPECTIVE INTERNS

Apply early—often it is a competitive and lengthy process.

Try to get a clear picture of what your duties and responsibilities will be before signing up.

Ask around—question previous interns and faculty advisors about where the better opportunities are.

Be selective. Remember that the quantity and quality of internships vary.

Although some intern duties may appear monotonous and mundane, enthusiasm and initiative are key.

Aim to tie the internship into your major.

Treat the internship like a real job. In essence, it is.

Be prepared to commit to a time requirement—usually for at least one term.

Try to complete more than one internship. The more professional experience one can get, the better off one is when graduation arrives.
