

Funny how much free time costs these days.

Finally. After working for what seems like forever, you have some time to yourself. To do

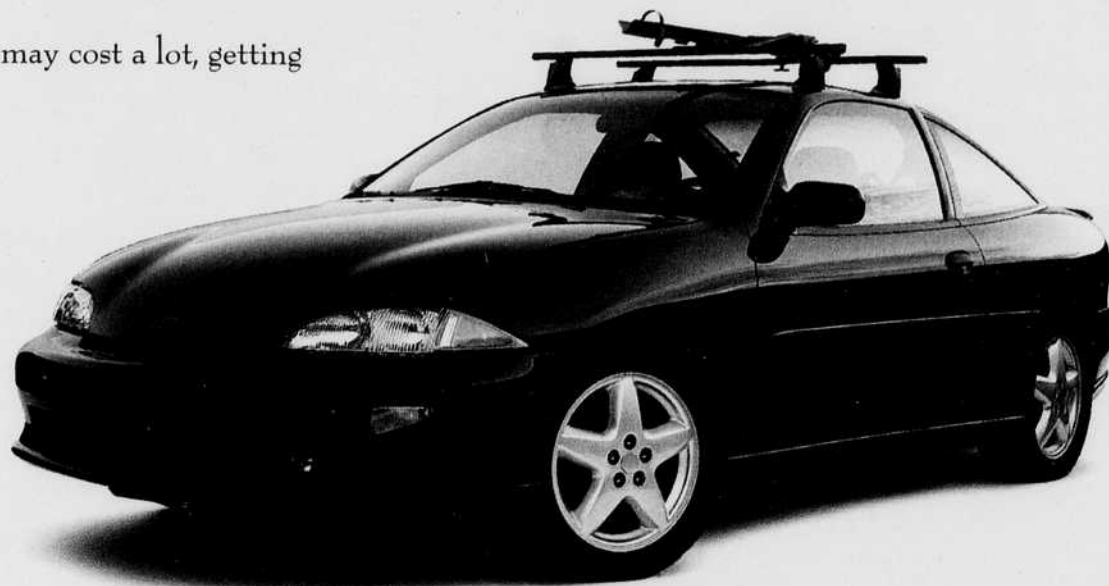

whatever you want. Problem is, doing whatever you want costs more than you want. Enter

the Chevy[™] Cavalier[®]. It can go 100,000 miles before its first scheduled tune-up*. Best of all,

Cavalier fits your budget. Making it truly easy to own. So even though going out during

your free time may cost a lot, getting

there won't.
