

Graduate Studies in Marriage & Family Therapy

Northwest Christian College, Eugene Oregon

NCC

NORTHWEST CHRISTIAN COLLEGE

Northwest Christian College, established in 1895, is regionally accredited by the Northwest Association of Schools and Colleges

Certificate Program in Marriage & Family Therapy

Designed for master's level counselors, clergy, health care providers and human service professionals who want to build their clinical skills, develop a resource network of other marriage and family therapists, or earn continuing education credit.

EMPHASIS: Courses designed to help counselors complete requirements for Associate Membership in the American Association for Marriage and Family Therapy (AAMFT) or work toward Oregon licensure as a marriage and family therapist.

CLASSES: Same as Master of Arts
APPLICATION DEADLINE: Applications are accepted on a continuous basis and are due 6 weeks prior to anticipated starting date.

INQUIRES: Same as Master of Arts

Master of Arts in Marriage & Family Therapy

This two year degree program is approved to meet Oregon State MFT licensure requirements.

EMPHASIS: Systems theories approach to therapy; family studies; professional studies; brief therapy; family theory; clinical experience.

CLASSES: Held on the NCC campus Monday and Thursday evenings.

SCHOLARSHIPS: Based on academic record and/or financial need.

APPLICATION DEADLINE: May 1, 1997

DIRECT APPLICATION INQUIRIES TO:

(541) 343-1641 ext.85,
FAX (541) 343-9159, or write:

Award: Sercel's research looks into tiny semiconductors

Continued from Page 1

down funds to keep the lab competitive," Webb said.

But students working for Sercel praise his researching abilities.

"He's incredibly intelligent and remarkably insightful in the lab," Webb said.

Sercel and his students' primary focus in the lab are to fabricate semiconductors and study the physics of the material.

"We're getting more interested in small devices," Sercel said. "The work that I do is very fundamental."

Sercel said the work is curiosi-

ty-driven, but there are possible future applications like optical information processing and optical communication.

He is currently working to fabricate semiconductor microlasers that are one-tenth the width of a human hair in order to make these devices possible. Semiconductor laser technology is what makes compact disc technology viable.

Sercel wants to make devices smaller and more powerful because he said in the next 10 to 20 years, current silicon-based technology will be too bulky to operate.

Hazardous trees cut down during break

In preparation of damaging winter storms, the University cut down three trees during the winter break. The trees were the last of nine mature trees on campus considered hazardous. The trees posed a risk to people and buildings, said a certified urban forester consulted by the University.

The trees will be replaced during winter term, said Tim King, campus and grounds supervisor.

COMMUNITY

briety

The replacement of the most prominent tree on campus, the large Oregon maple directly south of the Pioneer statue and north of Johnson hall, will be planted in recognition of President Dave Frohnmayer's inauguration.

The two other trees cut down were near Gilbert Hall on the north side of East 13th Ave.
