EMU RENOVATIONS

Access will be limited through summer

CONSTRUCTION: Phase One is under way, and signs are posted around the EMU to direct traffic

By Laura Cadiz
Higher Education Editor

Wood panels block the main doors of the EMU. "These doors are locked and will not be opened," a sign reads on the panels. A chain-link fence surrounds the EMU Courtyard.

The signs are clear — the renovation of the EMU has officially begun.

Monday morning, Phase One of the \$4.5 million EMU makeover started as Hyland Construction workers started to scoop out all of the bricks in the courtyard.

With this construction, people can only access the EMU basement through the courtyard near the ASUO office, said Susan Racette, associate director of the EMU.

As of now, there is no room in the EMU that people cannot access.

"There's always an alternate route to get to the rooms," Racette said.

After graduation, however, the Fishbowl, dining room, kitchen, recreation center and video arcade will be totally inaccessible in their current locations.

"They are going to be completely demolished and rebuilt," Racette said.

The arcade will be moved to the Cedar Rooms during the summer, but the pool tables will be in storage for the duration of the renovation, Racette said.

All the food services in the Fishbowl will be moved to the Skylight Cafe for the renovation, Racette said.

"There's quite a bit of juggling around," Racette said. "They are really trying to plan it so there's access to most things most of the time."

The wheelchair ramp by the Breezeway is currently accessible, but only until the summer. After the summer, people can use the wheelchair ramp near

RENOVATIONS AT A GLANCE

- **WHAT:** Phase One of the EMU renovation began Monday morning
- **WHERE:** The EMU Courtyard and Breezeway are blocked now
- **WHAT'S NEXT:** After graduation, the Fishbowl, kitchen, arcade and billiard room will be completely inaccessible

Kitzhaber: Prepare for class of '00

GOALS: Oregon's colleges and universities must meet the needs of the first wave of Education 2000 students, Gov. Kitzhaber said

By Thom Schoenborn
Managing Editor

Gov. John Kitzhaber outlined strategies for universities and community colleges to prepare for a new brand of student — the standards-based student — in a speech Monday in the EMU Ballroom.

Kitzhaber compared institutions like religion and government to buildings. As institutions become antiquated, people leave an empty shell of a house. This is what has happened to higher education, Kitzhaber said.

So in 1985, as president of the Oregon Senate, Kitzhaber passed the Oregon Education for 2000 Act. The act introduced set standards for students and teachers, and instead of diplomas, students receive Certificates of Initial Mastery (CIM) and Advanced Mastery (CAM).

These students will soon be applying to colleges and universities, so the post-secondary educators must prepare for their arrival, Kitzhaber said.

The students will have new skills and abilities, he said, and they will expect to be challenged with individual and group projects. Most importantly, they will need a very active faculty,

Governor

Professor Tim Gleason to head Journalism school as interim dean

POSITION:

Gleason will replace Duncan McDonald until a search begins for a permanent dean

By Daniel Pearson
Higher Education Reporter

Timothy W. Gleason, an associate professor of journalism at the University for the past 10 years, has been named interim dean of the School of Journalism and Communication.

University provost and academic vice president John Moseley said Gleason's appointment is effective immediately for the 1997-98 academic year until a national search can be initiated and the position permanently filled.

"I am quite honored and pleased to be appointed to this position," Gleason said. "I expect to continue the momentum that [the journalism school]

GLEASON

has developed over the past several years. I hope that we will continue to maintain our progress on renovations to Allen Hall, to review and improve our curriculum and to possibly recruit some new faculty members."

Gleason replaces Duncan McDonald, who became the University's vice president for public affairs and devel-

opment on May 1. McDonald had headed the nationally recognized School of Journalism and Communication since July 1994, with Gleason serving as associate dean since 1995.

"We're very fortunate to have someone as experienced as Tim Gleason to serve as interim dean," Moseley said. "His work as associate dean, coupled with the strong support of his fellow faculty, will allow him to further build on the successful track record of Duncan McDonald."

Gleason, a native of Atlantic City, NJ, graduated from SUNY, Empire State College in 1980 and received a master's in communications history

and law in 1983 and a doctoral in 1986, both from the University of Washington.

He has had a varied career in journalism and academia, with experience as a freelance photographer and photojournalist, as an editorial consultant, and as a newspaper general assignment reporter and photographer. Gleason was an assistant professor of communications at the University of Utah during 1986-87.

Since coming to the University in 1987, Gleason has taught courses ranging from reporting and freedom
