

For recurrent genital herpes*:
“**VALTREX** - 2 pills a day for 5 days.
That's easier than Zovirax.”

VALTREX is from the same
company as Zovirax® (acyclovir)

VALTREX for recurrent genital herpes...
Only 2 pills a day for five days work just as well
as 5 pills a day with Zovirax.

VALTREX is intended to treat repeated genital herpes
outbreaks in adults with normal immune systems.
And like Zovirax, if any side effects occur with VALTREX,
they are generally mild. The most common include
headache, nausea, diarrhea, and dizziness.
