## CHAIRMAN OF THE BOARD

It's not really his title, but it's definitely his job. Met him on campus a couple of years ago. Someone knew someone who knew him. Up to his eyeballs in ASICs, with some off the wall ideas about a high speed, board-level remote access solution.

His first response to us: "Yeah, right."

So we reminded him about our bold technical leadership. Except for being surrounded by state-of-the-art everything, the sharpest minds in technology and the world's leading systems organization, we told him, he'd practically be left alone to develop his ideas. Mr. Autonomy.

Since then he took his idea about remote computing to the Nth degree. Now it's part of our newest PCMCIA based remote network computing solutions.

Which brings us back to campus. This semester we're scouting the country again, looking for more spirited people and ideas. We're pushing this company to the Nth degree.

**And you can take us there.**
