Buildings

Continued from Page 1

building was dedicated in 1915, it seemed natural to name it after the man who founded the University, Richard said.

"He had the organizational skills to get the University going and keep it going," he said.

Straub Hall was dedicated to John Straub shortly before he died. He was the acting president who followed Johnson's term. He worked for the University from 1878 to 1930 and served his term as president in 1893. This building was named in honor of his long-term of service, Richard said.

Chapman Hall was finished in 1924 and named after the third president, Charles Hiram Chapman. Chapman was the president from 1893 to 1899. He ended the conservative style of teaching that President Johnson had modeled after his experiences at Yale, Richard said.

Prince Lucien Campbell Hall (PLC) is an abomination of a building named after an outstanding man, Richard said. Campbell was dedicated to achieving excellence at the University, Richard said. He served as president from 1902 to 1925. Campbell died in 1925, and the building was dedicated to him in 1967.

The Erb Memorial Union is named after the seventh presi-

dent, Donald Milton Erb. He was the president from 1938 to 1943. In this case, students were the primary reason for the building's dedication. Erb proposed the idea of building a student union. When the building was finished in 1950, seven years after the end of his service, students petitioned to have it dedicated to him.

There is one case in which a portion of a building was dedicated to a president who served after 1969. The Olum Atrium was named after Paul Olum, the 13th president, who served from 1980 to 1989. Olum played a crucial role in getting funding for the sciences at the University, Moseley said.

While the early presidents were blessed with timing, recent presidents could face a bigger challenge. Because fewer buildings are being constructed, the opportunity is limited. Additionally, monetary not collegiate contributions, have gained importance, Richard said.

There are buildings such as Willamette, Deschutes and Klamath that are actually being held in reserve. Essentially, if an adequate donation is made, the building will be dedicated to the donor.

"We'll probably never name a building after just real contributions again," Richard said. "I think we're for sale now. Most campuses are.'

News Brief

Professor to research 'green' businesses

A University business professor is one of 11 researchers and the only one in the Pacific Northwest who will receive a 1998 Industrial Ecology research Fellowship from the National Science Foundation and the Lucent Technologies Foundation.

Michael Russo, an associate professor of management at the University's Charles H. Lundquist College of Business, will receive \$100,000 to support a two-year study of "green" business practices. His study will focus on what motivates American electronics companies to seek environmental management certification from the International Organization for Standards. The study will also look at whether companies that received certification subsequently improved their environmental performance.

The fellowships, which total \$1.1 million, award up to \$50,000 per year for two years to support research and teaching to help industry design processes that prevent pollution and create environmentally friendly products.

STUDENTS • FACULTY • STAFF Flu Vaccination Influenza vaccinations will be given at the University Center for faculty and staff every Wednesday, Thursday and Friday from 8:00 a.m. to 9:00 a.m. and for stud-

ents Monday - Friday from 9:00 a.m. to 4:00 p.m. Beginning Wednesday, Oct. 14 Students \$3.50 Faculty and Staff provided by PEBB

Annual flu immunizations are recommended for the following:

Healthy persons 65 years or older.

2. Persons with long-term heart or lung problems.
