Washington no match for Ducks

Oregon's offense staggers a bit, but like always, its defense is there to save the day, as the Ducks pick up their third Pac-10 win Thursday. **PAGE 7**

PFC back in the Board Room

The ASUO Programs Finance Committee approved budgets for eight groups Thursday night, increasing funding for three programs, including Oregon Future Lawyer Association, which was not funded by the ASUO last school year.

PFC members voted not to hear an appeal filed by the International Students Association, but they will hear appeals from DELTA/GSO and the Hawaii Club, both of which were not represented at the budget hearings as scheduled. **PAGE 5**

Total lunar eclipse beautifies night sky

(AP) — Across the Western Hemisphere wherever there wasn't a curtain of clouds, one of the greatest shows on Earth played overhead Thursday night: a total eclipse of the moon.

Starting about 9:30 p.m. with a shadow along its left edge, the moon began moving toward total eclipse as it crept into Earth's shadow.

The last total eclipse of the moon was in September 1997. The next, on July 16, will be best seen from the West Coast.

Columbine library to be replaced with atrium

GOLDEN, Colo. (AP) — School board officials voted late Thursday to replace the Columbine High School library where two students gunned down their classmates in the nation's deadliest school shooting.

A group of Columbine students and parents has proposed raising \$3.5 million to tear down the current library, replace it with an atrium and build a new wing with a new library.

"We're saying to the world that life goes on, yes, life will be better," Jefferson County School Board President Jon DeStefano said after the 4-1 vote.

In April, 10 Columbine students were killed in the library before gunmen Eric Harris and Dylan Klebold took their own lives. Two other students and a teacher were killed outside the library.

The school was reopened in the fall, but the library has been sealed.

Autzen expansion hits roadblock

Some citizens are concerned about possible effects of Alton Baker Park and surrounding neighborhoods

By Jessica Blanchard
Oregon Daily Emerald

Plans for the \$80 million expansion of Autzen Stadium will remain on hold for now, despite pressure to stick to a tight timeline to begin construction.

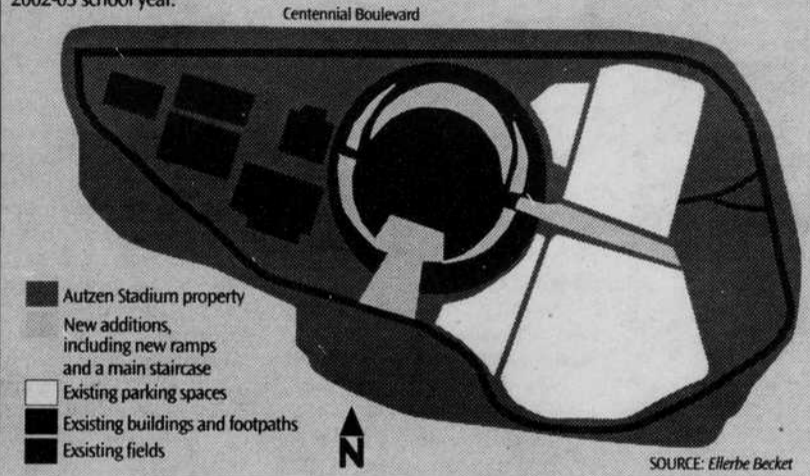

The Campus Planning Committee, which held a public hearing Thursday morning, held off on giving their approval to the plans after a handful of citizens voiced their concerns about how the expansion would affect Alton Baker Park and nearby neighborhoods.

Construction can only be done between football seasons, and the University would like to begin work in

Getting back to their roots

By focusing on scholarship and brotherhood, fraternity leaders hope to increase membership and raise public image

By Simone Ripke
Oregon Daily Emerald

If Greek leaders on campus are right, the end of the "Animal House" mentality is near.

Fraternity leaders say they have been looking to turn away from the public conception of partying and drinking and hope to turn the declining trend in membership around.

Fraternity enrollment has been decreasing since 1990, said Jon Williamson, executive vice president of the North American Interfraternity Conference. Williamson said enrollment dropped 25 percent and lowered the number of fraternity members in the nation to 350,000 undergraduates. However, Williamson said fraternity enroll-

ment has always been cyclical and expects an increase in numbers soon.

"I predict that there will be a big rise because more and more fraternities are getting back to their values," Williamson said.

Those values are brotherhood, scholarship and community service, the principles on which fraternities were founded.

Public image is not the sole reason for the decrease in membership. Williamson said more students are working today to finance their education and might not have the time or the money to get involved in the Greek system.

City Councilor Lee not to seek re-election

Bobby Lee, a former ASUO president, has represented the University area for three years

By Darren Freeman
Oregon Daily Emerald

Eugene City Councilor Bobby Lee, who has received acclaim for addressing student concerns and homelessness issues, has decided not to seek re-election to his council position representing the University area this year, a post he's held the past three years.

"It would be unfair to the public and myself for me to make a four-year commitment at a time when I need to

consider my personal and professional development," Lee said.

Lee, whose term ends in January 2001, said he will leave the unpaid council position to work in the private sector and repay his college loans, which he acquired while earning both his bachelor's degree in sociology and his master's degree in planning, public policy and management from the University, where he also served as the 1992-93 ASUO president.

"I'll truly miss him," said Eugene Mayor Jim Torrey, who leads the council meetings. "The University of Oregon students and faculty have been well represented by councilor Bobby Lee, and the citizens of Eugene have been well represented."

Lee, who was still a graduate student during his first two years on the City Council, has outspokenly represented students and advocated youth involvement in politics.
