Great Software then.

Great Software now.

Ah, the 70s.

It's a good thing wearing polyester didn't lower anyone's IQ.

Because in spite of some highly questionable fashion decisions at the time, the people at Timberline managed to create the first integrated software package for construction, property management and estimating.

And the software is still great. It's the industry favorite and market leader.

And some of the people who worked on that software are still here. Not because they're washed up hacks. It's because they like it here, and they stay.

So if you want to make great software, join us. And if you don't say anything about the president's wide tie, we won't say anything about your pierced ... whatever.

Come talk to us at the University of Oregon Career Center's Career & Graduate Fair on Wednesday, November 15.

If you can't make it, please send your resume to
