'Bizarre behavior' in Lawrence Hall Library

Last week, an unidentified man caused alarm in the Lawrence Hall Architecture and Allied Arts Library with his inappropriate behavior. Students were startled when movement under library tables turned out to be a person crawling around, peeping up at students, according to Department of Public Safety reports.

"We have someone engaging in bizarre behavior," said Joan Saylor, the DPS administrative lieutenant.

The occurrence took place Tuesday, Feb. 6 at approximately 9 p.m. Library staff called DPS, but the man was gone by the time an officer arrived, Saylor said.

The culprit returned the following evening at 6:32 p.m. and exhibited the same behavior. Staff called DPS again, but the man left again before officers arrived.

Bush pledges to modernize military budget

By Tom Raun
The Associated Press

NORFOLK, Va. — President Bush pledged Tuesday to modernize the military to face "the threats of a new era," even if it means scaling back some older systems beloved by the Pentagon and members of Congress.

He called for a new generation of lighter, more mobile and more sophisticated military devices that would harness new technologies.

"Our goal is to move beyond marginal improvements" in older weaponry, Bush said after visiting a joint U.S.-NATO command post on the nation's Eastern seaboard and

viewing an electronic naval battle simulation.

To those who might criticize his plans, Bush suggested they wait until Defense Secretary Donald Rumsfeld finishes a top-to-bottom review of the military.

He did not suggest which weapons systems he might delay or seek to cancel to make room for new technology.

But later, aboard Air Force One, Bush told reporters, "We must do it. We've got some tough choices to make, but that's why you get elected."

Bush also promoted his proposal for a multibillion-dollar national missile defense shield that would protect

not only the United States but allies from limited ballistic missile attack.

"The defenses we build must protect us all," he told an audience that included emissaries from 18 NATO partners.

European allies have been skeptical about such a system, which is strongly opposed by Russia and China.

The president expressed anguish over the loss of life, both in an Army helicopter mishap Monday night on the Hawaiian island Oahu and of Japanese passengers on a fishing boat that was struck by a U.S. submarine just south of the island.

Bush led a silent prayer for the six killed and 11 injured in the crash of

two Army Black Hawk helicopters.

"Just this morning, we were reminded of the risks of your duty and the sacrifices that you make," Bush said.

Later, he said, "The soldiers are my direct responsibility as commander in chief. I take the responsibility incredibly seriously."

Through his campaign, and now as president, Bush has talked about committing defense dollars to fast-forwarding research and skipping to a new generation of weaponry and defensive systems.

Bush has proposed a \$14 billion increase over current defense spending, the same increase the

Clinton administration had projected for the coming fiscal year.

On Tuesday, he pledged an increase of at least \$2.6 billion for research and development.

The president visited Norfolk's Joint Forces Command, where he spoke by a video link with Vice Adm. Michael Mullen, stationed about 50 miles offshore on the USS Mount Whitney.

He watched Mullen coordinate a simulated U.S.-NATO response to an enemy missile attack.

"Pretty exciting technology, and it's only going to get better," Bush said.

stolen musical instruments. The subject was caught on the second sales attempt, Saylor said.

"A non-student apparently committed a theft of musical instruments off campus and tried to sell the items at the School of Music."

Saylor said.

Video footage of the sales was obtained by DPS and will be used to assist with charges against the subject.

Harassing phone calls

Early Thursday morning, a Tingle Hall resident called DPS to report harassing phone calls during the middle of the night directed at his girlfriend, whom he believed was

being stalked by the caller. The resident and his girlfriend filed a report with DPS.

Most harassing phone calls end up being inter-campus calls, Saylor said. If the caller leaves a message on the University's voice-mail system, it will automatically include the home number of an on-campus caller.

"Students should report [harassing calls] right away," Saylor said.

"With the permission of a person receiving calls, we can log calls through the department, [which records their phone numbers]."

However, logging calls is a measure only taken in extreme cases, Saylor said. Typically, the department encourages students to change their phone numbers instead.

If the caller is identified, action will be taken, said University Housing Di-

rector Mike Eyster. In cases of outside calls, DPS can get the Eugene Police Department involved, particularly if it knows who the caller is.

"If it was a persistent problem, we could use measures like logging calls through DPS," Eyster said. "We've actually identified people that way, and a conduct charge has been filed."
