Campus

continued from page 1

There will also be tables with information from student and community organizations, a parade and musical entertainment. Tincher said LTD will display one of its electric automobiles and the Ecological Design Center will show off its new solar ovens. In addition, the coalition will show the anime film "Princess Mononoke" at 8 p.m.

OSPIRG campus organizer Kit Douglass said OSPIRG will hold a 10

a.m. press conference by the EMU solar panels to release a report called "Behind Closed Doors."

"(The report) details current attacks the Bush administration is making on environmental laws in this country and how it will impact local communities."

Douglass said the group wanted students to know about the various laws in place on issues such as clean air and public health and how they are at risk. Other speakers at the press conference include planning, public policy and management Assistant Professor John Baldwin and

Doug Heiken of the Oregon Natural Resources Council.

University senior Sara Henderson said Earth Day is important not only because it celebrates nature, but because it allows students to network with people who have similar environmental concerns, no matter how involved in the movement they are.

"I think Earth Day presents a really great opportunity to all people from all spectrums of the environmental movement," she said.

vote

Don't duck around!

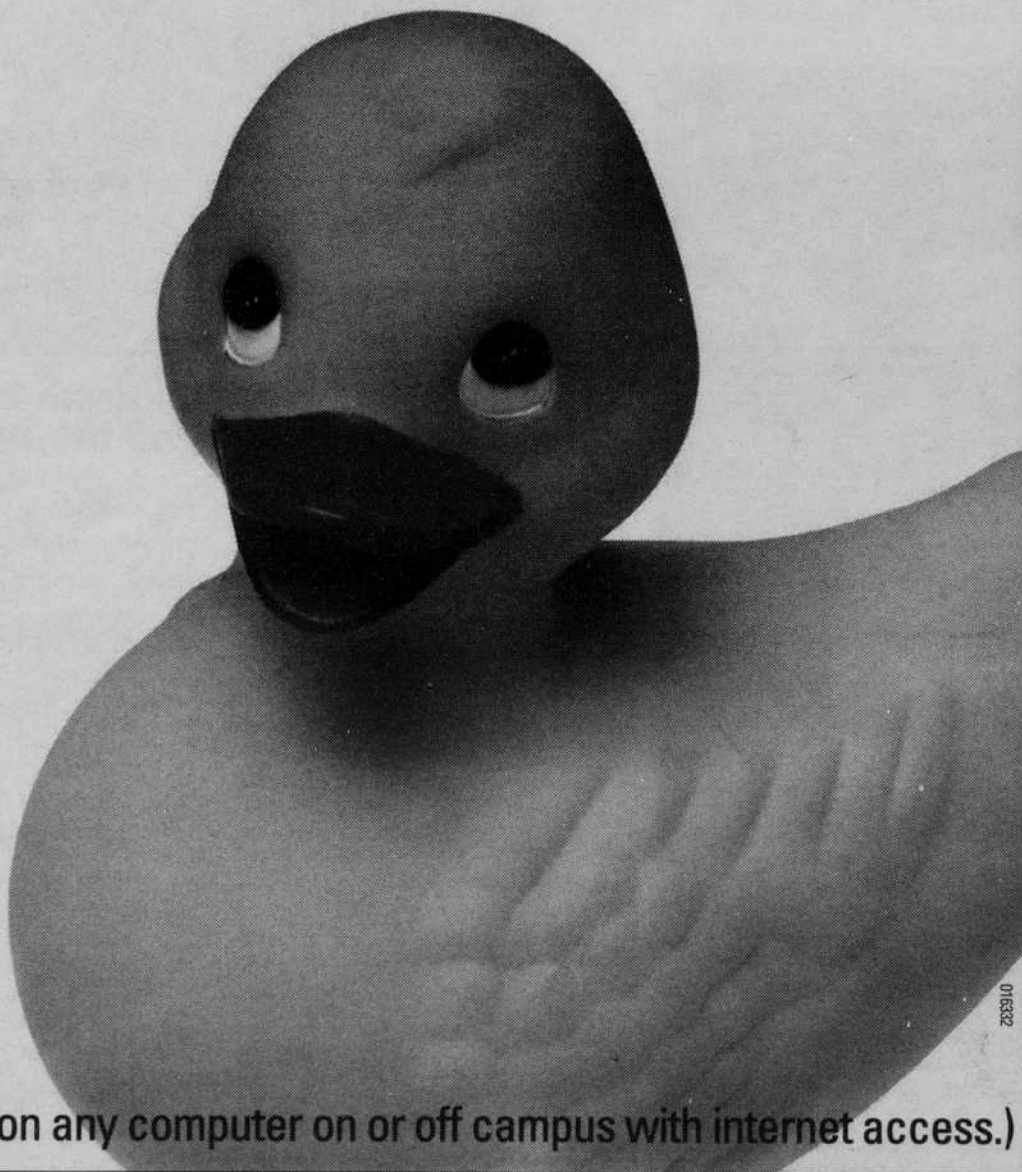

Vote for your Student Government!

General elections: April 21-23

Voting ends at 5 pm on Wednesday

Steps to voting on Duckweb:

1. Go to Duckweb and log on.
2. Click Student Menu
3. Click Vote 2003 ASUO Student Elections
4. VOTE.
5. Click submit button.

(Vote on any computer on or off campus with internet access.)

Elevators

continued from page 1

large number.

"With so many elevators on campus, it's not an unusual occurrence," Hicks said.

According to DPS reports, of the 18 reported incidents, four occurred in H.P. Barnhart, four at McKenzie Hall, two at the EMU and two at the Bean freight elevator. The remaining six occurred at PLC, Johnson Hall, Oregon Hall, Willamette Hall, Onyx Bridge and the University Health Center. Hicks said that when an elevator emergency phone is used, a DPS officer immediately responds and attempts to open the unit from the outside while the dispatcher stays on the phone with the trapped individuals to make sure they don't get claustrophobic.

The most recent incident occurred on the evening of April 12 when an H.P. Barnhart elevator trapped multiple people between the third and fourth floors. Hicks said it took 20 minutes for the Eugene Fire Department to respond in order to reset the elevator and get the people out.

"It can take up to 45 minutes to get somebody out simply because all elevators are designed individually," said Ernie Connelly, captain of the Eugene Fire Department Station 3, located on Agate Street.

Less than 10 minutes after fire department personnel responded, representatives from Northwest Elevator arrived to assess the situation and determine the cause of the malfunction — in this case, a

candy bar wrapper caught in the door contacts.

Northwest Elevator, which has repaired and modernized all types of elevators and escalators since 1981, has been contracted with the University since August 2000. When Northwest can't respond to an emergency call within 20 minutes, Hicks said fire department personnel from Station 3 are typically the first to arrive.

Connelly said elevators can easily jam when they are overloaded or when "people are horsin' around in them." And although there are a lot of different ways they can get stuck, he said people need to remember that elevators are made for transportation —

"They (elevators) aren't toys. They're tools to get people from point A to point B"

Ernie Connelly

Eugene Fire Department

not horseplay.

"They aren't toys," Connelly said. "They're tools to get people from point A to point B."

Hicks said students stuck in an elevator should use the emergency phones available in every University elevator, which are even available during power outages.

"When students use the phone, it comes in as an emergency call," he said. "So you can rest assured that help is on the way."

Connelly said the main thing to remember when stuck in an elevator is to remain calm.

"Don't panic," he said. "It's not like the elevator is going to fall to the ground."
