A healthy holiday season for your tree

Every year those who celebrate Christmas search for the perfect tree to put in their homes. There are dangers however associated with having a tree in your home so use caution.

Leave the tree outside of the house until you're ready to decorate it.

A green tree already losing needles is a bad sign and means it's already dying.

Water the tree daily to prevent it from drying out and keep it away from heaters and fireplaces.

▶ 1 inch cut
Be sure to cut at least one inch off the trunk just before you put the tree in the stand. Make sure to get it in the stand with water before the bottom fills with sap.
