KOW-KURE A sick cow is a bad investment, and a cow that is not producing as much good milk as she should is not worth it. All cows need careful attention to keep them healthy, and little disorders can be kept from becoming big by the use of Kow-Kure. This famous remedy is a sure cure and preventive of most cow ills—such as Lost Appetite, Milk Fever, Bunches, Red Water, Scouring, Abortion, Boreness, and Retained Afterbirth. Get a package of Kow-Kure from your dealer and keep it on hand constantly. 50 cent and \$1.00 sizes. Ask for copy of "The Cow Book."

North Pacific College of Dentistry and Pharmacy
The North Pacific College was established in 1898. It has departments of Dentistry and Pharmacy. No school in America has better facilities for the training of young men and women for successful professional careers. The annual session begins October First. An illustrated catalog of information will be forwarded upon application to
Registrar, North Pacific College
East Sixth and Oregon Sts., Portland, Ore.

GOT AHEAD OF THE PAPERS
Height of Wisdom Exhibited by Mr. Tohs Sagg on His Periodical Visit to Kansas City.

"Whenever I am in Kansas City," stated Mr. Tohs Sagg, of Goshkron, and feel stealin' go'er me a low, fobble yearling to put myself in the clutches of a total stranger, ramble round in apocryphal places and fill my system with aqua fortis and dog feed, to be found next morning by the pious monks of St. Bernard, groping dazedly and ready to burble to the police my real name and address and the customary lie that I have been trimmed of \$3,752 in cash and notes—well, when I feel any such microbes gnawing at my I order up to my room in the hotel a pitcher of ice water and lock the door, click the ice while, look through the bottom of the empty number 46 consecutive times, and then go to bed with my \$25.15 under my pillow, to make next morning serene content in the knowledge that I have deprived the newspapers of an interesting item and cheated the folks at home out of a story that would have been told on me unto the third and fourth generations of them that hate me."—Kansas City Star.

MUCH EMPLOYMENT FOR SKAGIT COUNTY SETTLERS
Seattle, Feb. 22.—H. C. Peters has a land proposition especially appealing to the man of limited means. He is subdividing 3,000 acres of the finest fruit and dairy land in the Northwest, located near Mt. Vernon, Skagit county, Wash., and adjacent to big mills that offer abundant work at good wages. Mr. Peters solves both the "Logged-Off Land" and the "High Cost-of-Living" problems. He has offices with the Seattle Trust Company, 800 Third ave., Seattle, and will gladly answer all inquiries.

DISCOVERY OF 376 COMETS.
Statistics collected by Doreilly, the French astronomer, shows that since the sixteenth century 376 comets have been visible to the naked eye, with periodic and 18 have been seen at more than one return, and 56 have been visible to the naked eye, with 7 that could be seen in full daylight. Nearly two-thirds of the discoveries appear to have been made in morning before sunrise, more than half in the second half of the year. The French observatories have led in discoveries, 67 of the comets having been first detected at Marseilles and 46 at Paris but only 16 at Geneva, which has the next highest record, 15, at Florence, and 14 at the Lick observatory.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Slings at Work.
Dr. Johnson was annoyed to find in the Hebroids that the strokes of the sickle were timed by the modulations of a song in which all the harvesters joined. In the days of the hand looms most weavers crooned over their work. Dairymaids used to sing on the milking stool, not only to lighten their labors but also because the cows were held to yield better milk when cheered by a tune.

Brightening Flower Pots.
Flower pots frequently fade into a dingy color from their original bright and cheerful brick red. They may be easily brightened again by putting ordinary red ochre in water until it is about as thick as paint, then painting the flower pot, which absorbs the color and holds it.

Just Between Friends.
Maud—"So Jack compared me with something sweet, did he? The dear fellow! What was it?" Marie—"Oh, do I insist!" Marie—"Well, he referred to you as the human marshmallow." You certainly had laid the powder on thick, dear."

IT'S YOUR EYES.
PETTIT'S EYE SALVE is what you need. Something Not Generally Known. Scott—"Say, old man, I'm stuck on a quotation. Who was it said: 'A horse! A horse! My kingdom for a horse!'" Mott—"I thought everyone knew where that came from. That's what Absalom said when his horse ran under the tree and left him hanging by the hair to a limb."—Boston Transcript.

A. D. 2014.
Bell Boy—"Room 101 rung. They're singing college songs and they want ten more cocktails and a half-dozen more boxes of cigarettes." Hotel Proprietor—"You just tell those young society ladies they've got to be quiet er; they're keeping some of the gentlemen boarders awake."—Puck.

Little Arithmetic Problem.
If twelve persons were to agree to dine together every day, but never sit exactly in the same order around the table, it would take them 13,000,000 years at the rate of one dinner a day and they would have to eat more than 479 million dinners before they could get through all the possible arrangements in which they could place themselves.

MISCELLANEOUS
Harvard defeated Princeton at hockey, 5 to 3. An overtime period of ten minutes was necessary, in which Harvard scored twice.
Savannah has set November 25 and 27 as tentative dates for the Grand Prize and Vanderbilt Cup races, subject to approval by the Motor Cups Holding company.
Jack Souter, the veteran professional of the Racquet club of Philadelphia and Charles Williams of England are arranging a match for the title of world's racquet champion at \$2,500 a side.
New York Public School Athletic league has 500,000 boys actively interested in interclass athletics in the elementary schools. At present there are championship tournaments in baseball, soccer, football, basketball, indoor baseball, and track and field sports, which bring together all the schools in the city.
Harvard and Yale have completed formal arrangements for a dual meet with Oxford and Cambridge at the Stadium at Chicago next summer. The date tentatively fixed for the event is June 21, the day following the Harvard-Yale regatta at New London.
Announcement has been made that for the first time in eight years Princeton will not meet Cornell on the elder path next spring. The track team is financially a losing proposition, and the expense of transporting the team to Ithaca was grossed up, as the Tigers' reason for dropping Cornell from their schedule.

PITCHER WILLET.
Pitcher Willet has declined to sign the 1913 contract sent him. He is one of the Tigers who told President Navin he would not play under Manager Jennings.

The Thames at New London will be the scene of this year's intercollegiate regatta. Previous to this year the regatta was an annual event staged on the Hudson river at Poughkeepsie.

AQUATIC
The Thames at New London will be the scene of this year's intercollegiate regatta. Previous to this year the regatta was an annual event staged on the Hudson river at Poughkeepsie.

GOLF
Robert G. Watson, the new president of the United States Golf association, says that the standard golf ball is not yet in sight. Watson says it is unfeasible.

Jack McDermott, the first American to win the open golf championship of the United States, who has held the title for two years, may not defend his title in the open tournament this year.

The talked of invasion of American golf by the noted English pros, Duncan, Vardon, Braid and Hay, will not take place. George Duncan, already a familiar figure over here, will be the only one to make the trip.

BILLIARDS
Frank Jones of Philadelphia defeated Stanley Leschin of Kansas City, 50 to 39, in the three-cushion tournament of the National Billiard league. The match in which Morgenstern defended his 181 title in Pittsburgh is said to be one of the best ever played in the history of the sport. There were no high runs, but the game of each contestant was wonderfully consistent.

At the annual meeting of the National Association of Amateur Billiard Players in New York a new constitution was adopted. With the exception that the rule against safety plays was abolished, no radical changes were made.

HORSE RACING
C. W. Billings has turned down an offer of \$100,000 made for the Harvester by the Russian government. The first bid was \$50,000.

Although P. Hill is the leading jockey of the year beyond question, the Texas jockey did not ride a single one of the big races of the season.

The American Trotting association is expected to abolish the no-hopple rule on pacers, a move that has been expected for some time.

Ed Geers has given records to 41 2:10 trotters. Think of that as a turf record and then wonder why he is the grand old man of harness sport.

John E. Madden has nominated 106 thoroughbreds for the 1915 Futurity of the Coney Island Jockey club, heading a list of 507 entries made by 71 nominators.

Colorado E is to be sent after the 2:01 mile record established by the Harvester at Columbus. The great three-year-old stallion will attack the record on the same track.

It is hardly probable that a severer blow could have been dealt the American turf than the death of James R. Keene, followed so closely as it was by the death of Major Dalgnerfeld.

Bingara's get won over \$50,000 on the trotting turf last season, the first time the earnings of any family have reached that mark in many seasons. Joe Patchen's offspring came second, as others of the family than Joe Patchen II, who won \$27,500, brought home over \$10,000.

Mashed White Turnips.
The ingredients of this recipe are three pounds of turnips, half to one cupful of water, one teaspoonful of butter, one teaspoonful of flour, half teaspoonful of salt, pepper to taste. Pare, wash and cut turnips into thin slices. Simmer slowly in covered kettle. When tender drain off surplus water, add the seasoning and mash well. Set over low flame a few moments, a little consistency, as white turnips are watery. Then take up and serve. Will require about one hour to cook.

Sandwiches for Afternoon Tea.
The colder weather demands something a little substantial at the four o'clock tea. A filling very much favored by English women is made from thin slices of bread lightly buttered and spread with a mixture of orange marmalade, pecan nuts, and cream cheese.

Apple Hot Cakes.
Butter gem pans and half fill them with rich biscuit dough. Pare, core and slice tart, juicy apples and fill gem pans, placing apples on top of the dough. Cover each one with a heaping tablespoonful of soft maple sugar and place bits of butter on top. Bake in a quick oven and serve with cream.

Baked Peas.
Wash a pint of split peas and put them in a beanpot with a tablespoonful of molasses, a small strip of salt pork and salt to taste. Cover with hot water and bake like beans, filling the pot with water as needed. About three hours of baking is necessary.

CUT OUT EXTRA WORK
ELIMINATION OF UNNECESSARY MOTIONS IS ONE WAY.

Saving of Energy, Not to Speak of Added Comfort, is Strong Factor in Favor of Modern Household Methods.

It has been figured out in schools of domestic science that the average method of shelling peas takes about five motions to each pod, whereas no more than three motions are necessary.

Place the dish of peas in front of you, placing the empty dish for the shelled peas in front of that, reach forward, getting a pod, pull it toward you, split it with the fingers at the same time. By the time it is over the empty dish the motion of the finger will strip the peas into that receptacle, toss the pod to one side and repeat.

The old-fashioned method has generally been to put the dish of unshelled peas in front of you, leave the receptacle at the right and the one for the pods at the left. This necessitates bending the body, turning the head and making all sorts of unnecessary motions between the three dishes, resulting in loss of good energy and many good minutes of time wasted.

Dustpans are made today with long handles. It would be just as absurd to sweep the floor with a whisk broom as it would be to use a short handled dustpan. In using the old-fashioned dustpan the sweeper has to stoop many times to get up all the dirt, making it twice as hard.

The broom is very cumbersome to handle while stooping, the back is strained, the face is close to the unhealthy dust and everything is wrong. Use a long handled dustpan, stand erect. The dirt can be swept into it just as neatly and with twice as much comfort and saving of energy.

The same holds good in washing dishes. Many women put the drainer on the left of the dishpan, necessitating the wasted motion of reaching across the pan to place the washed dishes to drain.

The natural motion is simply to pass the washed dishes to the right.

Sally Lunns.
Mix one-quarter teaspoonful of soft sugar with one-half ounce of compressed yeast till liquid. Warm one and one-half gills of milk and stir it into the yeast. Well beat an egg and stir it into the milk. Then strain the whole mixture into twelve ounces of sieved flour to which one-half teaspoonful of salt has been added. Turn on to a floured board and knead lightly, sprinkling with a little flour to keep it from sticking. Butter two deep, round tins and put half the dough in each, cover the tops with greased paper and leave near the fire to rise for about an hour, when the cakes should fill the tins. Then bake in a quick oven for about thirty minutes.

Fish Bisque.
A fish bisque is made from one cupful of cold fish minced very fine, one cup of hot milk and a cupful of any white stock. The carcass of a chicken cooked slowly will yield an excellent stock for this purpose. The seasoning consists of a teaspoonful of Worcestershire sauce, salt, a dash of cayenne and a tablespoonful of chopped parsley.

Put fish, seasoning and stock together in a pan. Mix one tablespoonful of flour and the same quantity of butter together and stir into the fish mixture. Cook and then stir in the boiling milk, adding a tablespoonful of cracker crumbs.

Potato Apoles.
Take two cupfuls of boiled potatoes mashed, and heat them. Mix the mashed potatoes with two tablespoonfuls of hot milk and shape into eight portions, forming a ball. Dent the top of each and insert a clove, pushing it down well to represent the bloom end of the apple. Then insert another clove to form a stem at the other end. Brush each apple over with a little melted butter and sprinkle one side with cinnamon to give a rosy tint. Bake in a medium oven for ten minutes and serve hot.

Infant Snobbery.
Too often the idea of service is associated solely with paid servants, although seldom so amusingly as in the case of a little girl of whom a contributor to the English Illustrated Magazine tells.

She had visited a little friend whose family did their own housework. She had a very good time, and on coming home was telling her mother all about it.

"But, mother, dear, they do one very dreadful thing," she concluded. "I hate to tell you about it, for it is kind of cruel, and you mightn't let me go again."

"Tell me," urged her mother, in some alarm.

"They use their own grandmother for a cook!" the little girl replied, in a shocked whisper.—Youth's Companion.

Knew What to Expect.
A small boy who attends one of the grade schools was vaccinated recently, and after the arm had been dressed the attending physician suggested that he place a ribbon with the word "Vaccinated" around it.

At this the youngster spoke up and replied: "You put it around the other arm. You don't know the kids at our school."—Kansas City Star.

False Witness.
"What," asked the Sunday school teacher, "is meant by bearing false witness against one's neighbor?"

"It's telling falsehoods about them," said one small maid.

"Partly right and partly wrong," said the teacher.

"I know," said another little girl, "because I've seen a man tell a lie about his neighbor and get caught."

PLAY FOR WINTER EVENINGS
Much Amusement May be Obtained by Use of Ordinary Dinner Plate Covered With Lamp-Black.

Prepare a plate by covering the bottom with thick lamp-black. Then when your friends arrive, tell them you are able to perform a great trick. You are an expert magnetizer. You may say:

"I do not often perform in public, but among friends I do not object to giving a proof of my skill. The only point upon which I must insist is perfect gravity and quiet among the audience. I will now see if I can select a subject who is susceptible to the magnetic influences."

You now pass from one to another, making passes, and looking steadily into eyes of several of the company, feeling the pulse of one and another, till finally you select one individual whom you declare to be the man for the experiment.

You now clear one end of the room and place two chairs, face to face, some three feet apart. In one of these you seat your intended victim and ask for two glasses of water, standing in two plates. This produces the blackened plate, and a clean one, upon each of them a glass of clear water.

Handing the blackened plate to the subject who is to be magnetized, you take the clean plate and say, seating yourself in the vacant chair:

"Fix your eyes steadily upon mine, and make exactly the motions that I do."

You now proceed to make several motions with your open hand, keeping your eyes fixed upon your victim, till you have his undivided attention. You then dip your finger in the water and drawing it across the bottom of the plate make a cross upon your forehead; the subject does the same; a second pass over the bottom of the plate and the face draws a long black streak down the victim's nose; a third smears one cheek; a fourth the other.

When the victim resembles a black-amoeba the operator gravely rises and says the subject has proved that his will is too strong to yield to that of another man, and he must try a new one.

Then lead him to a mirror.

TEST WITH MAGNETIC MOTOR
Experiment Illustrates the Principles on Which All Electric Motors are Based.

This experiment illustrates the principle on which all electric motors are based. All that is needed is five needles, a cork, a bar magnet and a small piece of wire.

Magnetize four of the needles and stick them into the cork so that every other one will have a north pole protruding.

Then push the remaining needle through the cork for an axle, making a support from the wire as shown.

To operate, bring one end of a bar magnet between needles A and B, then A will be repelled and B attracted by the bar magnet and the wheel turn, quickly lower the magnet

and raise it again when the needles C and D come around. The direction of the motor can be changed by using the other end of the magnet.

Motor in Operation.

COMFORTABLE NEST.
A Montana farmer's wife who had left her "peach-basket" hat in the attic last season, was surprised when she went to get it for the purpose of making it over into the new style, to find that a quail had found

access to it through the open window and appropriated it for a nest. Thirteen young quail greeted the astonished woman and clamored loudly for food. She graciously waived her rights, and the baby birds were left to occupy it until they grew to maturity and sailed away one fine morning.

Tale of a Horse.
"Why," said the man from Florida, who was regaling his auditors with tall tales of the wonders of his native state, "just to show you how everything develops down there, a hair fell from the tail of a horse down there one day and fell into a stream of water. This was in the early summer. It grew into a snake, then into a bigger snake, and kept on growing until one day late in August it swallowed the horse that originally had shed it."

When the Heart is Sore.
I will walk abroad; old griefs shall be forgotten today; for the air is cool and still, and the hills are high and stretch away to heaven; and with the dew I can wash the fever from my forehead; and then I shall be unhappy no longer.—Thomas de Quincy.

FILES CURED IN 4 TO 14 DAYS
Your druggist will refund money if PAZO OINTMENT fails to cure any case of Itching, Blister, Bleeding or Protruding Piles in 6 to 14 days. 50c.

Roman Relics in England.
Great interest has been aroused in the Roman discoveries at Kenchester, near Hereford, England. Many coins dating back to the reign of Constantine between 320 and 350 A. D. have been found. Pottery similar to that made before the destruction of Pompeii, in 79 A. D., and attributed to the potters who worked during the reign of Antoninus Pius, has also been discovered.

Man's Work and Woman's.
Now the men's work has his own name, the men's program and subject matter is to be more and more masculine.

An added pleasure for smokers of
Liggett & Myers
Duke's Mixture

Here is a smoke with the real, genuine tobacco taste—that beats all artificial tastes. Every grain of it is pure, clean tobacco. Tucked into a pipe, or rolled into a cigarette, it makes a delightful smoke.

If you have not smoked Duke's Mixture, made by Liggett & Myers at Durham, N. C., try it now. In addition to one and a half ounces of fine Virginia and North Carolina leaf, with each 5c sack of Duke's Mixture you now get a book of cigarette papers free and
