

The Remington Cuba find that speed helps in the woods

REMINGTON-UMC

Steel Lined SHOT SHELLS

Cut down your lead—Get your bird with the center of the load

IN the making of shotshells, the greatest forward step since the invention of smokeless powder is the steel lining to grip the powder and concentrate all the drive of the explosion back of the shot.

It's a Remington special invention—that steel lining. You find it in Remington-UMC Arrow and Nitro Clubs. These steel lined shells get their shot to the target quicker than any other shells known to the shooting fraternity. They cut down the guess-work about lead and angles. They put the center of the load right on your bird.

The steel lining is moisture-proof—no dampness can get through. No proof—no powder can get out. Waste-proof—no energy is lost.

Shoot Remington-UMC Arrow and Nitro Club Steel Lined Eastern Factory Loaded Shells for Speed Plus Pattern in any make of shotgun.

Your dealer carries them—or, if he doesn't, there's a sure alert dealer in this section who is worth your finding.

State News

C. C. Chapman, secretary of the Oregon Development League, who is to head the Oregon delegation at the United States Land Show in Chicago Nov. 20 to Dec. 8, has gone east to install the exhibit. Oregon will occupy two booths in the Land Show and will also have lecture room privileges. From five to eight Oregon representatives will be in attendance at all times. The exhibit will consist of agricultural products of every sort, contributed by commercial clubs in all parts of the state, and is one of the most complete ever assembled in Oregon. All of the exhibits were shipped from Portland last Saturday in a special baggage car via the North Bank, Great Northern and Burlington roads.

On December 8-13 the Pacific International Livestock Exposition will be held at the Portland Union Stockyards and although the opening date is still distant a month, breeders from all parts of the United States and Canada are already sending in their fancy stock. Fifteen thousand dollars in cash premiums will be paid out at the close of the show, the largest sum ever offered at an exclusively livestock show on the Pacific coast. Recent winnings of Pacific Coast cattle at the National Dairy Show at Chicago have induced breeders of the Middle West to make important entries in competition with Oregon breeders. James J. Hill, who was sponsor for the original show, has been invited to be a guest of the exposition for at least one day. In connection with the Livestock Exposition, Wm. Tollman, of Baker, Oregon, president of the Oregon Cattle and Horse Breeders Association, announces a meeting of that organization in the assembly room of the Portland Public Library on Thursday evening, Dec. 11, at 8 o'clock.

After long, weary months of uncertainty and delay, Secretary of the Interior Lane has finally and formally approved the first unit of the Umatilla Irrigation Project, set aside \$860,000 from the reclamation fund to defray the cost and directed the Reclamation Service to begin construction work as soon as possible. It is expected that work will be commenced not later than Dec. 26, and that the first unit will be completed and 10,000 acres brought under irrigation within a year from that time. After a personal investigation last summer, Secretary Lane is confident that the entire project will be a success, but thinks it good business policy to complete the first unit before undertaking further work.

An effort is being put forth by the Oregon Agricultural College to assist a number of Oregon counties to qualify under the measure passed by the last legislature providing that for every dollar appropriated by any county, within a certain maximum limit, the state will provide a like sum to carry forward experimental station and demonstration farm work. J. L. Smith, a graduate of the Kansas Agricultural College, and who has had several years experience in dairy farming, has been selected to head this class of work in Coos county and he will take up his duties there about Nov. 15. Marion and Willowa counties have employed men in agricultural work the past year, supported by local funds.

OBSERVE APPLE DAY BY UNIVERSAL APPLE FEAST

Oregon Agricultural College, Corvallis, Ore., Nov. 10. "If every person in Oregon eats one apple on Apple Day, Nov. 18, we shall consume twelve carloads of apples that day," said Prof. C. I. Lewis, head of the Horticultural department, Oregon Agricultural College, in answer to the question of how best to celebrate the day. "And should we see that each person is supplied with one box of apples, we should have removed one-half of the Oregon crop from the market for this year.

"In buying apples be sure to get the varieties that are fit to eat. Such varieties as Ben Davis and Gano are not suitable for fall use, and we should look for such as the Johnathan, Grimes Golden, Delicious, Wagener, Ortley and Spitzenberg, which are in good eating condition at this time. Grocersmen can help greatly by making a specialty of these varieties on Apple Day, and by taking pains to have them in good condition and plainly labeled. Apple Day is a good day on which to become better acquainted with one or more of these varieties. American people have been buying apples, whether for eating or cooking, without regard to variety. We can increase the consumption of apples in the United States only by educating the public to know the best varieties.

"In our homes, let us try a new recipe for preparing the apple. There are 197 ways announced in papers and booklets for preparing and serving apples. Try one or more of these ways. The hotels are planning special apple menus and the restaurants should be asked to offer cooked apples in many forms. And every train that comes into Oregon on Apple Day should be supplied with fruit, thus advertising to the tourist the wonderful qualities of our apples.

"Apple Day has been celebrated in the East, and most encouraging reports come from Rochester and Buffalo. More apples were sold and consumed on that day than ever before, and a great stimulus has been given the use of apples.

"There are only forty million barrels of apples for the ninety million people of our country, and for the large export trade. This shows that this delicious and wholesome fruit is not eaten in the quantities it should be. Indeed, there are thousands of people in our country who never eat an apple. Let us see that every man, woman and child shall eat an apple on November 18—Apple Day."

University of Oregon, Eugene, Nov. 11.—It a letter to the mayor of each city and town of the state, to each county court and to other officials, the University of Oregon has just offered an extraordinary service. This service is to be absolutely free and is to be performed by members of the University's regular faculty. It is a service that would cost hundreds and perhaps thousands of dollars to each community if outside experts had to be engaged; many Oregon communities, in fact, are believed to have gone without this much-needed service rather than incur the expense.

Busy officials often do not have time to keep up with the latest developments in the fields of public accounting, city planning, government organization, such as the commission government or city management plan and the treatment of defective and delinquent classes. This department plans to collect the results of the experience of other cities and communities throughout the country and make all this information available for those who wish to know what is the best thought on their respective problems.

More specifically, the department aims to do the following for the communities of Oregon:

1. To provide expert information on the problems which are arising in connection with municipal administration, as for example, the problems connected with street paving, street lighting, sewer construction, and sewer disposal, park administration, police and fire protection, water supply systems, and questions connected with the operation or regulation of public utilities.
2. To assist and direct by correspondence, and personal conference, communities which desire social surveys made, either of all the activities of the community, or of any special phase of its life. Never before have men and women been so conscious of the need of knowing the facts about their communities. All real constructive work must start with a fact basis.
3. To cooperate with boards of

county commissioners, city officials, health officers, superintendents of workhouses, county and state asylums, supervisors of the poor, so that the best information and best way of conducting the public business may be placed at the disposal of every public official.

4. To cooperate with county and city treasurer and auditors, and other financial officials and to give advice regarding the installation of up to date methods of controlling receipts and disbursements and modern practices connected with auditing vouchers, purchasing supplies and letting contracts.

5. To cooperate with voluntary societies such as commercial clubs, improvement associations, welfare leagues, health societies, women's clubs, etc., in working out plans for social betterment programs; and with county superintendents and county school boards with special reference to the finances of rural schools.

No more useful method of presenting ideas has been invented than the exhibit, often in connection with a series of lectures to arouse interest and cooperation. Any municipality in the state that is interested in this method of presenting community needs should consult with the Extension Department of the University.

The Extension Department is peculiarly well fitted this year to cooperate with the towns of the state in this work, either by correspondence, lectures or personal conference, as it now has upon its regular Extension faculty Professor D. C. Sowers, who has specialized along the lines of Political and Social Science at Columbia University, New York, and has for some time been connected with the Training School for Public Service, which is conducted by the Bureau of Municipal Research. Before coming to Oregon he had practical experience in various city departments of New York City and participated by cooperating with governmental officials in the preparation of the present budget which was voted on October 31, and carried appropriations amounting to nearly \$200,000,000. He is thus especially well fitted to give advice and suggestions dealing with the financial operations of cities, and to advise with local officials regarding the installation of up-to-date accounting systems and the modern methods of business procedure.

Any community interested in these opportunities should address the Municipal Reference Bureau, University Extension Dept., Eugene, Oregon.

ADVERTISED LETTERS

Letters unclaimed in the St. Helens Post office for the week ending Nov. 8, 1913:

F. Enyert 1 letter
George Hubbard "
Mrs. H. Morris "

Letters unclaimed by Nov. 22, will be sent to the Dead-Letter office

AUCTION SALE

Household goods and stock to be sold at Houlton Livery stable, Saturday, Nov. 22, at 10 a. m.

O. T. Foster, Owner.

SOME GOOD BUYS OFFERED BY ST. HELENS IMPROVEMENT CO.

Logged-off Lands

1000 acres of logged off land at \$18 an acre if you take it all or only a little more if you want any portion of it. County road runs through the tract and it is only one mile from the railroad and Columbia river. This tract is near Goble in Columbia county, and nearly all of it will make first class farm and orchard land. Easily cleared and well watered.

St. Helens Improvement Co.

An Opportunity

The greatest opportunity ever offered in Columbia County in the way of a dairy farm—897 acres of the famous Sauvies Island, the well known Abrams & Knox place, on the Willamette Slough between St. Helens and Portland, where the Steamer America goes every day in the week laden with cream and milk to the Portland markets. With the place goes 40 head of fine dairy cows, 2 horses, all farm implements, in fact, everything to enter right into the business. House, barns and outbuildings, all complete for \$40,000, with one-third cash and the balance at 7 per cent on long time terms. This is positively one of the best dairy farms in the State of Oregon and at a price that can not be duplicated.

Something Good

200 acres of the best meadow land in the world and more than 80 acres of fine plow land, altogether 283 acres, on Sauvies Island between St. Helens and Portland, can be bought for \$75 an acre, with only \$7000 down and the balance at 6 per cent on long time payments. A place where the boat passes every day in the week taking the milk, cream and other products to the Portland markets. More than 80 tons of hay put up this year, with the highest water known for several years. All improved with houses, barns, outbuildings and everything complete. Also some horses go with the place. A hunting lease that runs for five years, bringing in an average of \$400 per year for the lease. The B. B. Whitten farm. A very fine dairy and stock farm within easy access of the best markets on the coast.

A Snap

The St. Helens improvement Co. has secured an option on the 72-acre farm known as the old Downing place near Warren. This place has 40 acres in cultivation and the balance in pasture, easily cleared. It is on the main Portland road, on a milk route, rural delivery, and telephone. Less than one mile from a depot and about a half mile from a first class high school. An excellent opportunity for a dairy farm, there being sufficient pasture and farm lands to handle 30 cows. This place can be bought for \$125 per acre on easy terms, and 7 per cent interest on deferred payments. We have also several other good farm propositions and a number of houses and lots in St. Helens which can be had on the easy payment plan.
