WEEKLY INDUSTRIAL REVIEW.

New Payrolls, Improvements, Factories and Enterprises that will Give Employment to Labor—Matters Attending Industries and Investments.

Salem, Ore., Feb. 15.—One freak bill has passed the Senate to make all salaries of women the same as men in certain public work. As usual such a law will increase taxes and may put a lot of men and women out of work.

Eaton bill for \$20,000 for employment bureaus was killed.

A flax plant and a wagon plant are considered at the state prison.

The Madras Commercial Club is boosting a starch factory.

At McMinnville a two story annex will be built at the hospital.

Some counties are refusing to send a representative to the Panama Exposition to bring some people to Oregon.

Granite is one of Ashland's big future possibilities. Big development means big payrolls.—Tidings.

Tillamook—Electric plant is being constructed at Bar View.

The Rogue River Public Service Corporation will install an electric ditch digger.

The Southern Pacific Company bridge across Coos Bay will be 2400 feet long of structural steel.

The Oxbow Power Company is operating its plant at Copperfield.

At Canyon City, Utah mining men are here to develop Canyon mountain mines.

Out of 400 bills in the legislature 40 regulate salmon industry.

At Baker a chambermaid sues Crabb Hotel for \$5680 personal injuries.

The Legislature has so far killed all reactionary measures to handicap industries.

It is estimated border counties lost \$100,000 fees in 1914 on account of freak marriage laws.

If the Supreme Court sustains the Portland meat trust ordinance it will practically bar farmers shipping dressed hogs, sheep and calves to the city market.

Salem is to have a three-story brick apartment building.

Klamath Iron Works has turned out 400 flanged carwheels for the Pelican Bay sawmill yard trucks.

At the end of the fourth week the Legislature has passed two economy bills and one salary reduction bill.

ON ROAD MATERIALS.

St. Helens, Ore., Feb. 9.—To the Editor of the Journal—There has been a good deal written of late, in regard to building good roads and patronizing home industries. One of the home industries that might be worked to good advantage in the building of good roads and streets, and of benefit to a number of people of the state, is the making of Belgian paving blocks, of Oregon stone. These stone blocks have proved themselves, in all cases, to be superior to every other in point of wear, outlasting all other paving, enduring more than three times as long as the bonded period. Besides, this is a local industry of great benefit to Portland. From 1906 until two years ago

there were from 125 to 150 skilled workmen employed getting out stone for Portland streets and sewers. Of that number over twenty built homes for themselves; many more had bought lots and were preparing to build, and there was over 270 people to feed and clothe from the stores of Portland and vicinity. As there has not been any stone used for nearly two years, all these men and most of their families have had to leave the state, rick has been brought in to take the place of stone in Portland, from adjoining states. Brick has a life of only about one-fourth the life of stone, and is only 15 cents per cubic yard less in price.

All roads leading out of Portland, for the matter of 20 miles will probably be surfaced. Why not use stone blocks instead of the cheaper class of paving materials, which would have to be renewed every few years? If stone were used on the present crushed rock foundation, with from one to two inches of a cement cushion under them, and grouted with cement between, it would form a road that would last 50 years without repairs, and the extra cost would only be from 75 cents to \$1 per yard more than the cheapest class of paving.

There are two improvements coming up in Portland and vicinity, namely: The approach to the Interstate bridge and the improvement of the east end of the Broadway bridge. Both places should have the most substantial roadways that could be built, to insure the public the best means of traffic in all sorts of weather. Why not pattern them after Fourth street, with stone in the center and wooden blocks on the sides. It makes the ideal street for all classes of traffic, under all weather conditions, and they are both Oregon products, and are the cheapest in the end.

One of the reasons that stone is not more used in Oregon is because it is run on a narrow margin of profit, and its makers can not afford the advertising campaigns that the patent paving concerns employ, nor hire boosters to boost for their paving. J. P.

My Dear Bill

IT'S awfully good of you to write me about that company in your town wanting a good man of my trade. But honestly, Bill, I don't want the job. Of course they want good men—for prohibition has driven all the competent men out of the town.

There isn't a beer saloon in the place. You work and sleep—that's your daily programme. May suit you, Bill, but I like to get out and talk things over with the boys once in a while. I want some place to go after a hard day's work where I can get a glass of beer if I want one.

I know you can get a drink down there when you feel like it. But that isn't the point. The saloon is my club. You sneak into the back door of some blind pig or speak-easy and pay good money for stuff not fit to drink. No sneaking for mine, Bill. I'm a Temperance man—a real temperance man. That's why I'm going to stay right here where I can drink beer moderately and above board.

Those speak-easies get you, Bill, sooner or later. They've made drunkards of a lot of good men right in your township. I'd rather stay where my personal liberty isn't interfered with. Thanks for your interest in me. Yours truly, JOHN. —Advertisement
