The consent of a majority of the I. O. O. F. lodges of the state have been secured for the postponement of the annual meeting of the grand lodge from May 17-19 to May 22-26. If St. Helens enjoys the distinction and the advertising by the home baseball team, they do not show their appreciation by attending the game. The game last Sunday was a good one, but the receipts did not cover the expenditures. Home pride, it seems, is not very much in evidence. We suggest that a benefit of some kind be given for the ball team. Count on this office doing its part.

LAST WORDS

The open season for candidates will close today. No doubt the average elector has already made up his mind whom he will support without any suggestions at this late date. The candidate has never been elected who kept all of his pre-election promises. It is an almost certain rule that the bigger the boob the bigger his promises. The best candidates make the fewest promises. Pick your candidate by his past performance. If he has been successful in business life you may well expect him to be successful in administering a public trust. If he has been honest in private life you may well expect him to be honest in public life. If he has kept his private promises you may expect him to keep his public promises. Judge his promises of future performances by his performances while a private citizen and you will choose wisely.

PAPER WILL SOON GROW DARK

All Pacific Coast paper factories have begun the gradual elimination of aniline dyes from their print paper making processes, according to announcement made in Oregon City at the offices of the Crown-Willamette and the Hawley Pulp & Paper Company mills. Already the use of aniline products has been reduced 50 per cent and gradually it will be dropped, owing to the tremendous increase in the cost of the products since the war began. The price has advanced from 39 3/4 cents a pound to \$15 a pound.

The ultimate result of the elimination of aniline from the print paper making process will be to turn out paper stock the natural color of the pulp. The mills have experimented with American dyes offered as substitutes for aniline, but without success.

N. H. Kinney, who has been in the employ of the St. Helens Lumber Company for the past six years, left this morning for Portland, where he has accepted a position with the Menefee Lumber Company as head saw filer in one of their large shingle mills.

MOOSE LODGE TO BE ORGANIZED

J. A. Van Eyth, of Portland, is in the city for the purpose of organizing a lodge of Moose.

All men of the Caucasian race, of good moral character, are solicited to join the ranks of the Moose and assist in this great work that has now advanced from the stage of theory to realization. The world admires a man who is willing to sacrifice for others, but when the sacrifice is a pleasure and brings benefits directly to him, then the condition resolves itself into a business proposition. The greater the financial, social or public station a man occupies, the greater his responsibility toward his fellow man, a responsibility that should not be avoided but should be performed in a spirit of thankfulness for his good fortune that placed him where he can, by example and precept, be of service to his fellow man.

ON ONE VESSEL TWELVE YEARS

Captain Wahlgren, who is here as master of the steamer Brunawick, signed with that steamer twelve years ago as a seaman. From seaman he went to second mate and then to first mate. Five years ago, the owners of the vessel made him master. He has served in this capacity ever since.

The building formerly occupied by the Wellington saloon is being remodeled, repapered and a new plate glass front put in. We understand it will be occupied as a torgery, but we did not learn the party's name.

The St. Helens dairy has neat office rooms partitioned off in the north side of the room occupied by the creamery.
