Gus Hegele has just finished filling three big silos. Others will get busy filling silos now, as the frost is getting pretty hard here on corn.

One of the matrons of our town became reckless last Friday and sent a big kettle of corn, a loaf of home made bread and a cake of butter to the teachers as dessert for their lunch. An original poem was sent along. We don't like to tell what havoc they played, but the baskets, dishes, etc. were returned with another poem composed by the teachers. These poems would put our best poets to shame.

Miss Ivy, the daughter of Mr. and Mrs. Waters, was a very happy little girl last Friday, as on that day she celebrated her seventh birthday anniversary. Eighteen of her young playmates gathered together on this happy occasion and enjoyed games and other diversions so dear to the little folks.

Mrs. W. Lake of Sunnyside, died Sunday afternoon from a severe shock to the system after being very badly burned. From what can be learned the unfortunate woman, in lighting the fire Sunday morning, mistook the gasoline can for coal oil and pouring some on the fire, which immediately exploded, was enveloped in a mass of fire from head to foot. Her screams attracted her husband, who was at work in the garden and who rushed in and quickly smothered the flames, but not until she had sustained dreadful injuries to which she succumbed.—Chief.

**AN INQUIRY**

To the Editor of the Mist:

In your last issue I noticed you itemized the wages paid each road supervisor in the county. I would like to know if you didn't make a mistake in stating the amounts paid I understand the law calls for eight hours per day or 48 hours per week. This would make six working days each week. A supervisor's pay is \$3.50 per day, so on a basis of 26 working days in the month, the salary should not be more than \$91. Please look into the matter and see if you are not mistaken.

A SUBSCRIBER.

The Mist was not mistaken. By reference to the payrolls turned in by the several supervisors we find J. D. McKay, Dist. No. 1, worked 28 days; Elton Felton, Dist. No. 2, worked 31 days; H. J. Keelan, Dist. No. 3, 24 days, and R. N. Lovelace, Dist. No. 4, 26 days; F. A. Burnham, in No. 5, turned in 25 1/2 days; E. T. Wallace, Dist. No. 6, 12 1/2 days, and T. B. Mills, in Dist. No. 7, put his time in as 27 days. The Mist might at times make mistakes in getting these figures, but it is our intention to give the taxpayers correct information.

**SCHOOLS AT STATE FAIR**

Columbia county's school exhibit at the state fair was certainly a credit to the effort put forth. This was the first attempt along this line and it is quite evident that it is not

the last. They received several first prizes on vegetables, proving the fertility of the soil if put to test. Many and various other prizes on cooking and sewing, placing our girls, mothers and teachers up with standard homemakers of our dear old west, and a few prizes on bird houses made by our ingenious boys, who by this give proof of better roads, laws, farms and homes in the near future—we might say further, a self-sustained Columbia county.

The manager of this exhibit was Mrs. J. G. Watts of Scappoose, and she was assisted by Miss Ollie Stoltzberg and Miss Gladys Johnson, both of Scappoose. Mrs. Watts is glad to present to Supt. Allen a pink ribbon, which entitles the school exhibit to the fourth prize of the Oregon western division, but best of all \$40 in cash.

The suggestion which will help Columbia county carry home first next year is: Boys and girls, enter the project race and show what mettle we are made of.

A VISITOR.

**VOTE OF THANKS**

The members and friends of the Congregational church wish to thank all those who so generously and kindly helped with donations or labor for the lunch counter held at the county fair, especially the stores, the creamery, the bakeries and the mill company.

**Cuts! Gashes! Exposed Fabric! Blow-outs!**

*Prodim Process Rubber minimizes this trouble*

Prodim Process Rubber (the new tread used exclusively on Republic tires) is so tough that even newly crushed rock or sharp stones doesn't cut and gash it.

It wears down as evenly and smoothly as a piece of fine steel. After miles of service it looks like new. It keeps water away from the fabric, prevents rotting of the carcass of the tire, and makes premature blow-outs practically a thing of the past.

Get a sample strip of Prodim Process Rubber. Try to break it. It's the toughest, stongest tread stock ever used on a tire.
