OREGON RANKS HIGH

When anyone says that Oregon is backward in expending money for road improvement, slap him in the face with government figures. Oregon expended \$9.19 per capita on its roads during 1915. Our celebrated neighbor to the south, California, expended \$8.73 per capita, while Washington expended \$5.84 per capita.
We hear New Yorkers and Yankees telling how much the Empire State and Massachusetts are spending for roads. New York is expending \$2.66 per capita, and Massachusetts \$1.95 per capita. Compare this with Oregon's princely investment of \$9.19 in behalf of every man, woman and child in the state.—Oregon Voter.

Cuts! Gashes! Exposed Fabric! Blow-outs!
Prodiun Process Rubber minimizes this trouble
Prodiun Process Rubber (the new tread used exclusively on Republic tires) is so tough that even newly crushed rock or sharp stones doesn't cut and gash it.
It wears down as evenly and smoothly as a piece of fine steel. After miles of service it looks like new. It keeps water away from the fabric, prevents rotting of the carcass of the tire, and makes premature blow-outs practically a thing of the past.
Get a sample strip of Prodiun Process Rubber. Try to break it. It's the toughest, stongest tread stock ever used on a tire.
