

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over over 30 years, has borne the signature of *Chas. H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

USING UP THE HOG

Not Even a Hair of Him is Wasted by the Big Packers.

There is a use for everything that is removed from a hog. After years of experimenting packers have reduced their business to such a system that they realize as much profit from the offal as they do from the main carcass.

The meat of a hog is from 70 to 80 per cent of the live weight. The 20 to 30 per cent that is classed as offal makes the money for the packers. Exclusive of condemnations by government inspectors, about 17 per cent of each carcass is lost at various stages of dressing and by evaporation in processing and curing, so that really only about 60 per cent actually goes into cuts to be retailed to the consumer. The various cuts—hams, bacon, loins, spareribs and pork sides—are the main products.

Among the edible byproducts in pepsin, which is derived from the stomach of the hog. The liver is used for food as it is taken from the body, and it is also made into liver sausage. Brains are prepared in many ways. Tongues find their way into the making of candied and pickled meats. Hearts are used in sausage.

Tails, snouts and ears are rich in gelatin or glue, but most of them are sold for boiling with kraut and other vegetables and are much in favor with lovers of boiled meals. Kidneys enter into the fresh meat trade or when the supply is too large are frozen or canned.

Neutral is a specially prepared lard, largely used abroad, and in this country an important ingredient in the manufacture of oleomargarine. Lard proper is not commonly called a byproduct of the hog; it is one of the primary products. About 15 per cent of the average hog goes into the making of lard. The demand for lard has increased greatly during the past few years. It is now used commonly in cooking in place of butter. Part of the lard is further processed into lard oil and stearine, the former used as a lubricant and for illuminating purposes, the latter entering into the manufacture of lard compounds, chewing gum, soft candles, fancy toilet soaps and other toilet preparations.

Small quantities of blood are used in the making of blood puddings, but most of it is dried and ground into blood meal, a popular ration for poultry raisers as well as a feed for calves that are being fed on skim-milk.

Stomachs are used as sausage containers, the lining first being removed and used as a source of pepsin. The "black" or curly intestines of the hog are carefully cleaned, processed and made into chitterlings, an inexpensive food that is fried like oysters, much in favor with colored people.

Seven per cent of the weight of the hog is represented in nonedible byproducts in the raw state, which are afterward manufactured into glue, soap, glycerine, blood meal, tankage, curled hair and fertilizer. In the finished state these products represent about 4 1/2 per cent of the hog's weight, the balance being lost in evaporation.

The rinds from skimmed hams and bacon, as well as the back skin of the hog, are saved. Pigskin is used in athletic goods.

Hair enters into many lines of manufacture. A large part is used in the making of brushes, and the finer the bristle the higher priced brush is produced. It is also curled and used for upholstery.

The waste waters are evaporated to a thick brown wax known as "stick" because of its adhesive properties. It is used in the manufacture of fertilizer, as it has a high nitrogen content.

Bones are used in making phosphates for baking powder and other compounds. They are also ground into poultry feed, and a large tonnage finds its way into the fertilizer trade. Bones are also burned for charcoal for use in the purification of sirups in the manufacture of sugar. Bone ash is used in making crucibles for glassmaking and metal refining.

Tankage is a bone and tissue substance that is taken from the tanks after the different parts are rendered for grease. It is used chiefly in stock and poultry feed.—Joseph M. Carroll in Country Gentleman.

The Bunko Game

"You can't fool all the people all the time."

"You don't need to. If you can fool half of the people some of the time you can make a good living."

Proving It

An editor said of a certain local politician: "We will not call him an ass. We will print his speech."

Takes a Back seat

"They say he is an authority on the subject."

"He is until he talks to his wife."

Do all the good you can and no harm where you cannot do good.

LAUDS HIS OLD-TIMERS

Were Superior to Modern Crop of Players, Says Anson.

Cap Anson, one of the daddies of baseball, believes the old-time ball-players were superior to the modern crop. "Good baseball was played 20 years before the game was taken in hand by the National League in 1876," said Anson recently. "But, of course, in those days there were not so many ball players to be had."

"Yet with the present wealth of material in the big leagues there are comparatively few really good players. In my opinion, Wagner and Lajoie, though they are growing old, possess more natural skill than the younger stars of today, with the possible exception of Ty Cobb and Tris Speaker."

When asked if he had ever seen any pitchers better than Walter Johnson, Christy Mathewson, Alexander and other modern stars, Anson said, "Yes." He believes that Amos Rusie, who pitched for the Giants from 1890 until 1899, was the greatest of them all.

"Rusie had as much speed as has Johnson, better control and the fastest curve ball I ever saw," said Anson. "He was physically the superior of Johnson, Mathewson and Alexander, and was built like Jeff Teserau of the Giants. There was no limit to his endurance."

"Tim Keefe, who was with the Giants back in 1888, was also a master. He was among the first pitchers to perfect what is known as 'change of pace.'"

"The best catcher I ever saw was Buck Ewing, who caught for the Giants when they won the world's championship in 1888 and 1889. I have never to this day seen his equal, but little Walters of the New York Yankees reminds me of Ewing's throwing on bases."

"Ewing was a quick thinker and a natural-born leader. Bill Lange, who played for me when I had charge of the Chicago National League Club, was in a class by himself as an outfielder. He was a better outfielder than Cobb or Speaker and a phenomenal thrower, and one year he stole 106 bases."

"How about Billy Sunday?" Cap was asked.

"Billy is a better evangelist than a ball player," was the reply. "He was the fastest runner that ever drew on a spiked shoe when he played on the Chicago team, but he didn't always exercise the best judgment in stealing bases. He was an excellent outfielder and a fair hitter, and his influence among the Chicago players was good."

A newly invented electric pistol ignites the charge with current from a flashlight battery.

Success to Our Depositors

It has been and will continue to be the policy of the Columbia County Bank for the officers to manifest a friendly personal interest in the welfare of its depositors. We do more than merely wish for the success of our depositors, we work for their success, because we realize that the interests of the bank are closely bound with the welfare of its customers.

To this policy we attribute in part the substantial growth of the Columbia County Bank.

To those residing in this community not transacting their business with us, we invite their accounts on the grounds of mutual benefit to both.
