PUSS-IN-BOOTS

Puss-in-Boots, as brave a CAT As ever tor-ment-ed a pesky RAT. His master was poor of purse, so he (How many years I do not know) Set out for himself the world to see.

He became a ROBBER, fierce and bold.

And he robbed an OGRE of HOUSE and GOLD.

wide He sang all over the countryside.

He found him a WIFE of noble mien. And he brought her JEWELS to deck a queen,

How did he do these won'drous things?

He wore the BOOTS that the MAGIC brings. They were Fairy Boots and they gave

him power To build for his master a magic tower.

VEGETABLE SEEDS ARE SCARCE

Use Left Over Stocks-Many Kinds Retain Vitality for Years.

Corvallis, Ore .- By using the best of vegetable seed stocks left over from last season a good deal can be done to overcome the present seed shortage. Seed prices are going to be higher than those of last year, and seed should be purchased and used with great discrimination. A G. Bouquet, head of vegetable gardening at O. A. C., offers the follow-In a big, big voice the BIG BEAR ing suggestions as to the use of left over seed stocks:

Beets, cabbage, cauliflower, rutabaga, turnips and related plants may grow well even if four or five years old. Spinach does not give so good results in the second or third years. Tomatoes, peppers and egg plants are usually good for three years; squash and pumpkins, five to eight; beans and sweet corn three; peas and lettuce, three.

Onion, parsley, carrot and parsnip Said, "I found her all by myself seed usually should be fresh, although two-year old seed sometimes gives good satisfaction. Onions and parsnips will not usually germinate more than 50 to 60 per cent the sec ond year. All of the short-lived left over seed should be tested for germination.

The shortage may be further re lieved by estimating the amount needed before purchase, buying good seed from reliable dealers, right prepara-Said the little, little bear, "Oh, no, tion of soil for germination, seeding in rows so that fewer plants will be wasted in thinning. The amount of seed of various kinds required to plant a hundred-foot row are given in "The Home Vegetable Garden," No. 287, prepared by Professor Bouto O. A. C., Corvallis.

FARM TOOLS

Now is the Time to Put Farming Utensils in Working Order.

Farm machinery in recent years has played a very important role in place in farm operations is more important than ever before. The proper amount and kind of tools will enable the farmer to work more land and obtain better returns. In fact, the increased use of farm machinery frequently makes it possible to manage the farm with less help. One of of farm tools and implements is their exposure to the weather and failure upon the part of the farmer or laborer to clean them properly before they are put away for the season when they are not in active use. There is a wide variation in the length of life levied upon, and will on Saturday, plaint, to-wit; for a parille of those farm implements treated the 23rd day of March, 1918, at 10 cording to the respective if properly and those left to rust out the County Courthouse in the City erty set forth in the complaint. in the fields. The farmer has everything to gain and nothing to lose by placing his 1918. order as early as possible for new machines and repair parts which will be needed next senson. If this fact | 22, 1918. is true in normal times, its importance is magnified many times now that shipments frequently require longer time.

The farmer has been advised times without number concerning the desirability of overhauling farm tools and implements during the slack season. Whether such advice is necessary or whether it is acted upon in normal times is not a question to be considered now. The need for ample machinery, running smoothly and without breakdowns in 1918 is more important to the farmer than ever before. To this end steps should be taken this winter.
