A recent letter from Fred Adams Jr., dated Lincolnshire, England, Jan. 11, gives one the impression that Mr. Adams would much prefer being in Oregon. He says many foods are still strictly rationed while as for coal and oil only registered customers are allowed to buy. 1 pound of bacon, 1/2 pound of sugar and 1/4 pound of tea are a week's ration and in a shop it is you can't have this and you can't have that and only so many ounces of the other. He also says the winter has been unusually cold and the fuel so scarce that one hardly knows what it is to be warm. No one has any pigs or chickens. Eggs are 11c apiece, bacon 1/2 crown, mutton and beef about the same. Every thing is under lock and key except the game, and that is allowed to run everywhere; the hares especially, destroying the winter greens and the small farmer having no redress or even allowed to interfere. It's dollars to doughnuts Mr. Adams prefers the U. S. A.

Did You Ever See a Shoe Like This?

ITS insole was cut from paper—very likely the counters are paper, and also several lifts of the heel are paper. Such shoes, when wet, won't hold the stitching—their outsoles come off, the counters break down, heels become spongy, and the whole shoe ill-shaped.

These things are used as substitutes for leather in the making of some shoes used because they are cheaper, and they are nearly always hidden where the buyer cannot see or detect them.

Don't be persuaded to buy poor shoes in order to save money. Poor shoes are the most expensive in the long run.

You may be assured of getting honest, leather-built footwear by demanding

The Friedman-Shelby All-Leather Shoe. We are never ashamed to show you the inner construction of the Friedman-Shelby ALL-LEATHER shoe. Insist upon having shoes branded with this trade-mark.
