Advertisement for ROYAL BAKING POWDER. Another Royal Suggestion DOUGHNUTS and CRULLERS From the NEW ROYAL COOK BOOK. Doughnuts made the doughboy happy during the war and no wonder. There is nothing more wholesome and delightful than doughnuts or crullers rightly made. Their rich, golden color and appetizing aroma will create an appetite quicker than anything else in the world. Here are the famous doughnut and cruller recipes from the New Royal Cook Book. Includes recipes for Doughnuts and Crullers with ingredients and instructions. Absolutely Pure. "Bake with Royal and be Sure"

Here It Is—THE NEW VELIE SIX

You must see the car to appreciate the striking beauty of this new, Strangline, High Cowl Body Design, Distinctive Radiator and Hood, Bevel-Border Fenders, Octagonal Lamps. And you must try the car to know what the sensational new Velie-Continental motor means. This is the first mention of a new type power plant. Burns low grade fuel. Has more responsive power, more speed, no vibration, no noise. Costs less to run.

For your comfort and enjoyment the body is lonfer. It has a roomy sweep that is irresistible. It has really broad doors—more room in the deep tilted seats and soft plaited upholstery—more leg room for the driver.

For your convenience, there are ample storage places in seats and doors for everything you carry. Some new ideas here also.

The secret is out. The work of foremost Velie engineers, and the creation of the famous Velie body builders is now on public display. You will want to see it. Automobile men—dealers, and the motoring public—are taking the first opportunity for a view. For no such distinguished model of the Light Six has ever come into the market before.

Then that motor. Truly a sensation in engineering. All that has been gained in the science of The Automobile Motor in the last four years has been concentrated in this amazing power plant. You will want to try it out to see how the problem of getting the highest grade of power out of low grade fuel has actually been solved. A world of energy—silent—instantly responsive to any degree—smooth as velvet. And a big saving in fuel cost.

First as to Style. Different—yes! It is the difference that gives an entirely new expression to familiar charms. It is the difference that makes it the car of today—and tomorrow.

How this has all been worked out by larger valves, better combustion, operation perfectly balanced—you will see when you go over the car.

Here in symmetrical, harmonious, mirror-like planes you see how the creative idea has set a higher standard of body art. Here is the authoritative style—a thing that was certain to come. It comes first in the Velie.

Every mechanical feature the kind that ought to go with a car like this. Improved Timken Axles and Bearing, Borg & Beck Clutch, Bijur Starting and Lighting, long underslung springs—everything.

There are five models in the line—send a card for further details.

Here then is the pattern car that leads off the Light Six style procession for 1920—that sets the pace in the newer engineering that motorists demand today. We want you to see—and judge—for yourself.
