An interesting meeting was held and the decision arrived at that none but farmers interested in the upbuilding of the community and the organization would be admitted. The proposition of dancing as one of the social features was unanimously voted down and out of courtesy and that a good feeling may exist among all there will be no dancing in the future. The object of the members will be to make the meetings such as will be of interest to every person engaged in farming or its benefits. Every farmer in the Warren and Bachelor Flats districts will be invited and arrangements are being made to have a speaker from outside give a short discussion and advice on the different classes of farming as now carried on in this part of the country and the proper method of marketing the farmers' products. The berry industry will be thoroughly exploited and the fruit with its market problems will be given proper consideration. Dairying stock raising and general farming as well as vegetable production will be taken up by competent and expert men from outside the district. The many young people who formerly came to Grange meetings have formed a social club and have their weekly dances, but now the farmer can have his semi-monthly meeting and discuss and hear discussed his plans for the proper production of all classes of crops and stock raising that this section is susceptible of. The Evolution of Man

Babyhood—boyhood—then manhood—followed by old age.

First, dependent upon others,—then independent by virtue of ability to work and earn,—then as old age creeps on, all too often is completed the circle back to the dependence of childhood.

Profit by the examples of others. Out of their knowledge of life comes the earnest admonition, "You must save—save—save—if you are to be independent in your declining days."
