Loganberry growers should put up the canes upon the trellises before the winter rainy season if tip dieback is to be prevented. Although a very severe winter might injure the canes to some extent, investigation conducted this year by the O. A. C. Experiment station show that the yearly loss due to dieback exceeds in importance the possibility of another exceptional winter. As soon as tied up they should be sprayed with Bordeaux 4-4-50 to protect against fungi, especially the bases of the canes. Good Health If you would enjoy good health, keep your bowels regular. No one can reasonably hope to feel well when constipated. When needed, take Chamberlain's Tablets. They are mild and gentle. Mist Warrants are sale getters.
