Clatskanie. In addition to the above my business experience has covered several years. If nominated and elected my policy will be not more taxes, but less, and more returns to the taxpayers for what they pay in. I believe that all the extra governmental agencies which we have adopted during the last fifteen years should now be referred to the people again for approval or rejection upon the basis of their experience with these agencies, and I will use my best efforts to have this done. In this connection it is of interest to note that during the past fifteen years taxes for state purposes have increased from approximately \$425,000.00 to \$925,000.00, or about 1,500 per cent as against an increase of about 25 per cent in population.
