## THE OREGON HOG SITUATION

We are all familiar with the fact that there is a serious shortage of hogs in Oregon as well as other states of the Pacific northwest. We have been aware of the fact that large shipments of live hogs have been brought into the Oregon market centers from as far east as the Dakotas and Kansas. It has been apparent for some time, especially since the price of wheat has come down that the farmers of Oregon can profitably go into the raising of hogs for market. It may be interesting to review at this time what has been accomplished in the way of increasing hog production in Oregon in the past two or three months.

Around the first of the year it was comparatively easy to assemble a carload of breeding sows for sale; in fact several such sales were held, and wherever good breeding sows were offered in a sale, they brought prices satisfactory to the seller as well as the buyer. It is apparent now that brood sows have been scattering out over the farms of Oregon, not only through carload sales but in sales of one, two or three head, with the result that at the present time it seems next thing to impossible to

find a brood sow that is for sale. Apparently so far as the supply of brood sows in Oregon is concerned they are all being put to maximum use. In the past two or three months quite a large number of good quality sows have gone through the Portland Union Livestock market to the killers. Steps have been taken now by the livestock exchange and the Portland Union Livestock company whereby no good piggle brood sows are allowed to be killed, but whenever offered they are picked up and put in special division in the stock yards where they are immunized and held for sale to the farmers of the Pacific northwest at practically pork prices. Quite a business is being done in these brood sows at the stock yards at the present time. On account of so many hogs arriving at the market, it will be probably possible to assemble as many as a carload of these brood sows on fairly short notice. This indicates that every effort is being made to conserve the hog breeding stock of Oregon at this time. It is possible that the point may be

reached where it will be necessary to bring in brood sows from outside points because the demand is so strong. Here is an opportunity for farmers living within a radius of fifty miles or so of the stock yards at North Portland, and who want one or two piggle sows, to get what they want at reasonable price.
