Office of the Spokane Board of Health

SPOKANE, Washington, May 13, 1892.

The evidence is conclusive as to the absolute purity and healthful character of the ROYAL BAK-ING POWDER.

Certainly there is no baking powder known to us equal to the Royal for strength and uniformity. We confidently recommend it for these qualities, as well as for its purity and wholesomeness.

WALTER Q. WEBB, M. D.,

President.

C. G. BROWN, M. D.

looked at him a moment and then said:
"Use plain English, doctor; I know
you can if you try."
The witness looked around and said,

When the witness left the stand every

Postoffice Detectives' Gallery. There have recently been many com-

them from any other point than above. The watch is to be kept not alone for

the purpose of watching for thefts, but

also to see that men do not shirk their

work or disturb other clerks by conver-sation. The gallery will be reached by an iron stairway at its southern end, and

at its northern end another iron stair-

way will ascend to the glass roof. There are two of these roofs, one above the

other, and it is necessary for workmen

to ascend to the lower one to clean it of

dust. There is now no way to reach there except by putting up a ladder. It

is said that it is purely for this purpose

such a structure for nearly two years.

Assistant Custodian George Painter has been agitating the matter, and has finally succeeded in getting the work done.—

Porpoise shooting is the newest sport at Cape May. The seaward end of the

pier is the favorite rendezvous for those who want to get a shot at the swiftly

moving fish. The marksman must have a steady hand and always be in readi-

less to shoot, because the movements of

the porpoise are so nucertain that one

does not have time to raise the gun to

the shoulder before they are out of sight

beneath the water. The women take as

much interest in the sport as the men,

and quite a number are out every after-noon perched on the lower deck of the pier, rifle in hand, and waiting for a good chance to shoot. The sport seems to lie

more in the attempt to capture big game

No Peaches This Year.

A letter from Dover, Del., to The Bal-

timore American says: "A drive through

what ought to be the center of the peach

belt-lower Kent and upper Sussex coun-

reason that there are no peaches to lie about." There are miles and miles of thrifty looking peach orchards wholly destitute of trait. The buds were killed

washed up on the shore. -Exchange.

Philadelphia Record.

"Yes, sir; certainly, sir."

Bonham was injured?"

Green-goods men expect to find green; the will buy their goods.

THE T. MPTATION

To go out of doors in rough weather is not strong, but we are, many of us, compelled to face rough weather frequently. Discusses when all e from a chill are peruliar to no session of the year. This is true; therefore, there should be in the closet of every household—what? Not an unmedicated stimulant, absolutely devoid of snything but an excitive action, but a tonic combining, in the effective form of an invigorant and an a terative, the quality of defense against changes of weather. Hostetier's stomach filters has three or four properties that no other sticle of its class possesses. Not only does it relieve the complaints which it eventually cures, it fortufes the system against the had effects of changes of temperature, fatally and too often shown in the deadly form of "la grippe:" it produces a radical change in the weakened condition of a system specularly liable to be attacked by it, and it tends to provide against the danger resulting from as impov-rished condition of the blood and a disordered state of the liver or bowels.

A list tells a hundred truths to one lie; he has o, to make the lie good for anything. A COMMON SENSE REMEDY.

In the matter of curatives what you want is something that will do its work while you continue to do yours—a remedy that will give you no inconvenience nor interfere with your business. Such a remedy is fere with your business. Such a remedy is ALLCOCK'S POROUS PLASTERS. These plasters are not an experiment; they have been in use for over thirty years, and their value has been attested by the highest medica authorities, as well as by testimonials from those who have used them. They require no change of diet and are not affected by wet or cold. Their action does not interfere with labor or business; you can toll and yet be cured while hard at work. They are so pure that the youngest, the oldest, the most del'cate person of either sex cat use them with great benefit.

Beware of imitations, and do not be deceived by misrepresentations. Ask for ALLCOCK's, and let no solicitation or explanation induce you to accept a substitute.

The big head is one of the hardest things in this world to cure men of completely.

In 1850 "Brown's Bronchial Troches" were introduced, and their success in relieving coughs and bronchial troubles has been un-paralled.

Do no neglect your nose. If you won breathe through it, you will presently be com-pell d to talk through it.

ONE ENJOYS Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the sys-tem effectually, dispels colds, head-aches and fevers and cures habitus constipation permanently. AMBER AND CRYSTALS.

INTERESTING FACTS ABOUT THESE CURIOUS SUBSTANCES.

Working Amber Is a Very Ancient Business-It Is Found Only in Europe. Queer Old Roman Ideas About Crystal.

Nero's Valuable Cups.

"Amber is curious stuff," said a collector of curios the other day. "It is only remparatively recently that its nature has been known, and even at this day very few people seem to have any notion as to what it is in reality. The ancients regarded it as altogether mysterious and even magical. They found that it was rendered electrical by friction so as to attract light substances, and our word 'electricity' comes from the Greek name for amber, which was 'electron.' A favorite puzzle with them was how the Insects so frequently found in amber became to be so situated.

"I have myself seen a chunk of very

them was how the Insects so frequently found in amber became to be so situated.

"I have mysself seen a chunk of very transparent amber in which a small lizard with five legs was theased, looking as if it might have been allve yesterday, though, doubtless, it had been dead for thousands of years. The mystery regarding this sort of phenomenon is easily enough explained when it is understood that amber is actually the fossil gum of an extinct kind of cone bearing tree. In the process of hardening it imprisoned the dies and other creatures preserved in the chunks of it that are found today. It is discovered plentifully by digging in certain parts of the great plains of north Germany, where the strange tree once flourished.

"It is also found in considerable quantities along the shores of the Baltic, in the yellow sandstone. At Palmicken, in east Prussia, it is dug in regular mines; elsewhere it is picked from cliffs, and a good deal of it is gathered in the shape of nodules cast up by the waves. The finest specimen of amber in Europe is a cup made of that material now at the Brighton museum, England. It was found at Hove some years ago, together with weapous and utensils of stone and bronze, so it is evidently very ancient indeed.

"The have myself seen a chunk of very transparent amber in which a small lizard with five legs was theased, looking as if it might have been allve yesterday, though, doubtless, it had been dead for thousands of years. The mystery regarding this sort of phenomenon is easily enough explained when it is understood that amber is actually the fossil gum of an extinct kind of cone bearing tree. In the process of hardening it imprisoned the dies and other creatures preserved in the chunks of it that are found today. "It is also found in considerable quantities along the shores of the Baltic, in the yellow sandstone. At Palmicken, in east Prussia, it is dug in

A young doctor was put on the stand who was determined to display his learning, and he was successful. When he started off he did so with the easy gait of one who feels he has the nomenclature of his profession at his tongue's end, for every sentence he uttered was so mixed with technical terms that an ordinary person could scarcely understand him.

Person could scarcely understand him.

person could scarcely understand him. When he took the witness stand he glanced patronizingly at the jury and "What a very beautiful sphere of crystal this is?" said the newspaper man, taking in his hand a cool globe that looked like a huge dewdrop, which the collector handed the for completion. the rest in the court room, and in answer to the first question rattled off a lot of medical terms that drew the attention of him for examination. every one in the room. Judge Slover

him for examination.

"Yes, that is a pretty specimen. I suppose you are aware of the theory entertained by the ancients regarding such rock crystal. They thought it was actually ice frozen to great density by duration of time, congealed beyond liquidation. 'Krystallos' in Greek means 'ice.' The famous writer by the state of the control of the contr Yes, sir; certainly, sir."

"Now, doctor, where did you say Mr. on natural philosophy. Pliny, who wrote more facts that were not true than ever any man collected together before or since, says the crystal is undoubtedly water frozen by cold so intense that nothing can melt it again. Roman ladies of that time were accustomed to carry such spheres as this one in their hands during hot weather or to the ipre with a familiar ways of ing to the jury with a familiar wave of his hand). "He was bruised in the rear "It was the thing, also, to have the

terial worked into wine jugs and other vessels. Nero had two drinking cups of of the stomach. In other words, his back was hurt."

Judge Slover looked worried while the witness continued to answer another question.

"When I examined him I first removed his clothes, you know, and in feeling him I could determine that the abdominal wall was baggy and tender, and he appeared to be suffering from a touch of the" (here followed a name as long as one's arm), "and the dorsal vertebres were severely contused. In other words," again turning to the jury with a wave of his hand, "his backbone had been versely continued to answer another words," again turning to the jury with a wave of his hand, "his backbone had been versely continued to answer another the witness was employed in Rome to kindle the sacred vestal fire. Great care was taken not to put the crystal ware in a warm place for fear that it would melt. The most remarkable discovery of crystal on record was made in 1867 above the Tiefen glacier by a party of tourists, a single cave in the granite yielding 1,000 crystals of from 50 to 100 pounds weight."

"And what is this?" again turning to the jury with a wave of his hand, "his backbone had been

"And what is this?"

PEARLS AND PEARL DIVERS.

"That," replied the collector, "is a diminutive Chinese god, covered with a coat of pearl by a real pearl oyster. On such parts of the coast of the Flowery Kingdom as produce pearl oysters a regular business is often made of manufacturing pearls artificially by introducing into the shells of the live oysters foreign objects of various kinds. You doubtless know that the pearl is a morbid symptom in the bivalve. A one looked relieved and Judge Slover mopped his brow, for the ordeal made the perspiration flow freely.—Kansas City Times. is a morbid symptom in the bivalve. plaints to the postmaster concerning the loss of registered letters in the Philadelphia office, and the officials have been greatly worried by the charges that there were thieves in the service. It has been decided to erect a gallery along the roof of the working room, from which watchmen can look down upon the entire force without being seen from below. This gallery will be eighty feet long, and will depend from the glass and iron ceiling by iron supports. In it there will be frequent small windows with swinging after a few manths the idol is a pearl idol. plaints to the postmaster concerning the grain of sand or some such substance getgoes to work and covers it with pearl, until after a few mouths the idol is a pearl idol. It is worth mentioning incidentally that requent small windows with swinging es, from which the watchman can sharks are by no means such a terror to pearl divers as is commonly supposed. It is true that now and then a diver does get see every part of the great room where the stamping and distributing is all done. gobbled, but for every such human victim hundreds of sharks are killed by the divers. Here there are 300 men at work at times, and it is impossible to oversee all of

hundreds of sharks are killed by the divers.

"Pearl divers in the Torres straits are not one-twentieth part so much afraid of the tiger sharks which are swarming there as of the giant molfusk at the bottom, six feet or more across its shell, which lies with extended jaws, as if waiting for the unfortunate fisherman to drop into them. The victim, dropping out of his boat into the depths with a heavy stone attached to his victim, dropping out of his boat into the depths with a heavy stone attached to his feet, brings his leg into contact with the mantle of the huge mollusk, which closes upon the limb with one tremendous bite. upon the limb with one tremendous bite. Only one thing then remains for the diver to do, namely—amputate the limb with his own knife, because the mighty bivaive's jaws are clasped together with a tenacity that would take several horse power to loosen, and it is anchored to the bottom with a cable of itsown three times as strong as the best inch rope."—Washington Star that the gallery goes up, but there is another use. There has been talk of having

Miss Bertha Higgins studied pharmacy with her father, and for a time was asso-ciated with him in the drug business at the corner of Pitt and Delancey streets. A big, broad shouldered police officer entered the store one day, looked at the bright lib the store one day, looked at the bright lit-tle pharmacist, purchased a vial of quinine pills and walked away with her heart. That was the end of her value as a drug-gist. Now she is a bride, has a medicine cabinet in her home, and with the pharma coporia and the big, good natured officer makes as many experiments as though she had a dispensary of her own.—New York Letter.

Came Out All Bight. "Have you heard the news?"
"What is it?"

"That Count Politzi, who is engaged to elen Streeter, is not a count at all, but

"I'm glad to hear it. I thought he'd come out all right."—Harper's Bazar. A Big Rattler.

The boss snake is a monster rattler on exhibition at J. F. Bolton's store, in Americus, Ga. Hissnakeship is more than six feet in length and measures twenty inches in circumference in the middle, while his caudal appendage is orna-mented with fourteen rattles and a button. The hidsons object was killed in a sedge field on the Huguenin plantation by Alfred Fields, a colored laborer, who after a lively fight of several minutes.

knocked him on the head with a fence rail. Mr. Bolton had the snake's hide stuffed and hung up in front of his store.

The following notice is posted on the main street at Athena, Ore.: "To my neighbors—if my spring chickens are disturbing your garden kill them and eat them. Don't pile them out in the store. ties—will convince any one that the much abused peach liar of this peninsula will have no chance this season, for the

DO THEY PAYE

Children Sometimes Do Not Seem Alto-gether Perfact, but They Do Pay, "Sometimes I just think children don't pay," said one of my careworn and dis-couraged neighbors one day. "What do you think about it?"

you think about it?"

"Well, I don't know," I replied, and my conscience smote me even while I spoke. But then I said in mental self reproach and self excuse for saying it, "I know I didn't pay," and I don't think I did.

But when it comes to my own bairns—

do they pay? Well, they are "a sight of trouble." In-

Well, they are "a sight of trouble." Indeed they are, and they cost time and money and pain and sorrow.

There are three of them and they are little things still, and my friends who have older children tell me that I need not expect a time to come when my babies will be "less trouble" than they are now. I cannot expect a time to come when they will not be a source of care and anxiety and hope and fear—no, not even when they have gone forth to homes of their own and have their own little ones around them.

Do they pay now! Here I am wearing old clothes and trying to brush up my hat to make it look new that my Johnny and Sammy may have new kilts and reefers and hats and shees and look as well as other children. They do kick out shoes so dreadfully, and they haven't the first compunction of conscience about it, either. They tear and smash and destroy and are "into everything." particularly the baby.

Does a 2-year-old baby pay for itself up to the time it reaches that interesting age! Sometimes I think not. I thought so yesterday when my own baby slipped into my study and "scrubbed" the carpet and his best white dress with my bottle of link. He was playing in the coal hod ten minutes after a clean dress was put on him, and later in the day be pasted fifty cents' worth of postage stamps on the parlor wall and poured a dollar's worth of the choicest

of postage stamps on the parlor wall and poured a dollar's worth of the choicest White Rose" perfumery out of the win-

dow "to see it wain."

Then he dug out the center of a nicely baked loaf of cake, and was found in the middle of the dining room table with the sugar bowl between his legs and most of the contents in his atomach.

He has already cost over \$100 in doctors' bills, and I feel that I am right in attributions of the many laws to the misers.

uting my few gray hairs to the misery l endured walking the floor with him at night during the first year of his life.

Ah! I hear his little feet pattering along Ab! I hear his little feet pattering along out in the hall. I hear his little ripple of laughter because he has escaped from his mother and has found his way up to my study at a forbidden hour. But the door is study at a forbidden hour. But the door is closed. The worthless little vagabond can't get in, and I won't open it for him. No, I won't. I can't be disturbed when I'm writing. He can just cry if he wants to. I won't be bothered for—"rat, tat, tat," go his dimpled knuckles on the door. I sit in silence.

"Rat-tat-tat." I sit perfectly still. "Papa." No reply.

Baby tum in-peeze, papa. "My papa.

"Papa," says the little voice; "I lub my apa. Peeze let baby in!"
I am not quite a brute and I throw ope the door. In he comes with outstretched little arms, with shining eyes, with laughing face. I catch him up into my arms, and his warm, soft little arms go sround my neck, the not very clean little check is laid close to mine, the baby voice says

sweetly:
"I lub my papa."

Does he pay? Well, I guess he does! He has cost m many anxious days and nights. He has cost me time and money and care and self sacrifice. He may cost me pain and sor-row. He has cost much. But he has paid for it all again and again and again in

whispering those three little words into my ears, "I lub papa."

Our children pay when their very first feeble little cries fill our hearts with the mother love and the father love that ought never to fail among all earthly passions.

Do your children pay?—J. H. D. in Detroit Free Press.

of experienced prospectors have been ex-amining the mineral indications, which give promise of undreamed of richness. Coal is found on both sides of the boundary line, from the coast back to a distance twenty-five or forty miles, and comprised in an area of 20,000 acres or more, and the country is so easy of access by a railway line built parallel with the boundary line that there is but one way in which the coal will be brought out, and that is through

It is only necessary to be in this coal district with one's eyes open to see it, and competent judges affirm that it is coal of the finest quality. Nor is coal the only mineral to be found. Vast deposits of iron ore abound; in fact, there is a mountain some few miles back which is nothing but here and oil is so much in evidence. from ore, and oil is so much in evidence that a stick plunged into the marshy land can be immediately lighted by the applica-tion of a match.—Blaine (Wash.) Journal

Graveyard Curiosity. In New London, Conn., there is a lot in the city cemetery containing five graves, those of a man and his four wives. The women's graves form four sides of a square the man reposing in the center, while the inscriptions are as follows:

-St. Louis Republic.

An Easily Melted Metal. A metal has been produced that will melt at a temperature of 150 degs. It is an alloy of lead, tin, bismuth and cad-mium, and in weight, hardness and color resembles type metal. It melts so easily that, placed on a comparatively cool part of the stove with a piece of paper under it, it will melt without the paper being porched.-New York Telegram.

A Hundred Thousand Trains a Day.

It is unlikely that any one who leaves a station of the elevated road has any idea that more than 100,000 trains pass over the various switches of the road within twenty-four hours or what continuous vigilance is necessary in order to avoid the most serious of accidents. But these men in the switch towers do the work most effectively.—New York Herald.

On these terms it's the serious it's the serious in every case, or your money is returned.

As near as can be discovered from the evidence, the project for Mr. John D. Rockefeller to found a \$20,000,000 nniversity has been seriously considered by a number of other persons, but Mr. Rockefeller himself has not been in it, so to say. This was quite an unfortu

A MOST GRAPHIC STORY.

IT IS TAKEN DIRECT FROM BRAS

A Charming New England Lady Tells Her America.

The unwritten romances of life are more wonderful and far more interesting than the most vivid works of fiction. The one we are about to relate occurred in real life, and is both interesting and instruction.

ing than the most vivid works of fiction. The one we are about to relate occurred in real life, and is both interesting and instructive.

Mrs. Jennie Ray formerly lived in Manchester, N. H. Her home was pleasant, her surroundings comfortable. In the year 1880 she visited England, and while in that country began to experience strange sensations. At first she attributed them to the change of climate, but they continued and increased, until finally, like many another woman, she became utterly discouraged.

It was while in this condition that Mrs. Ray returned to America and her home. Thousands of women who read this story can appreciate the condition in which Mrs. Ray then was, and sympathize with her suffering. Two prominent physicians were called and endeavored to do all in their power for her relief. In spite, however, of their skill Mrs. Ray grew weaker and more depressed, while the agony she endured seemed to increase. It was at this time that a noted physician who was called declared Mrs. Ray was suffering from cancer, said there was no help, and told her friends she could not live more than a week at the farthest.

And here comes the interesting part of the story, which we will endeavor to tell in Mrs. Ray's own words. She said:

"Unknown to all these physicians, I had been using a preparation of which I had heard much. I did not tell the physicians because I feared they would ridicule me, and perhaps order its discontinuance. During all the while that the physicians were attending me the physicians were attending me the physicians because I feared they would ridicule me, and perhaps order its discontinuance. Our gail all the while that the physicians were attending me the physicians were attending me the physicians were attending me the physicians were stored in the sum of the declared they would ridicule me, and perhaps order its discontinuance in the sum of the physicians of the sum of

ner's Safe Cure they, like me, might be saved."

The above graphic account is perfectly true in every respect. Mrs. Jennie Ray is now living at 142 West 6th street, South Boston, Mass., and if any lady doubts the above statement she can address Mrs. Ray, who will gladly answer all questions or grant an interview of a confidential nature to any lady who may choose to call upon her. It is said that "truth is stranger than fiction!" and when the thousands of suffering, help-less women who are upon the road which physicians say leads only to death, consider the story as above given there is reason for hope and joy, even although they may be now in the depths of despondency and misery. To such ladies the above truthful account is willingly given.

many anxious days and nights. He has cost me time and money and care and self sacrifice. He may cost me pain and sorrow. He has cost much. But he has paid for it all again and again and again in whispering those three little words into my ears, "I lub papa."
