It is announced that within a few days the San Francisco and Great Salt Lake will file articles of incorporation. The articles of incorporation under which the company at present exists were filed in Stockton. The papers only set forth the object of the company as being the construction of a railway between this city and Stockton, though, of course, no secret was made of the fact that this was but to be the beginning of a transcontinental line, or, at all events, one extending from San Francisco to Salt Lake. In the articles of incorporation which are to be filed, however, the complete object of the company will be set forth, that is, the construction, as stated, of a cross-continent road.

The 40-cent rate made by the Union

The 40-cent rate made by the Union Pacific a short time ago on lumber from Portland to Colorado applied only to lumber shipped in box cars, and not to timbers such as are carried on flat cars, and which are not brought from the South, whence comes the lumber which enters into competition with Occasional Coloradors. South, whence comes the lumber which enters into competition with Oregon lumber. The company has now made another change, and gives a 40-cent rate on timber which can be carried on a flat car, but the old rate will remain in force on all timbers long enough to require two cars to load them on. The first change did not benefit lumbermen here to any extent, as the roads carrying Southern lumber made a corresponding cut in their rate, but the last change may enable the lumbermen to build up a trade in timber with Utah and Colorado.
