Adelle Freeman has entered suit to sustain her heirship to Gustave Exerate, who died in 1888, leaving \$1,200,000 worth of property. Mrs. Freeman was not mentioned in the will. The property includes much valuable business property in the central part of Los Angeles, The plaintiff is married, and resides in San Diego.

nove is now on foot to bring into Boise City the hot water from the arte

Boise City the hot water from the arte-sian wells about two miles above town and utilize it for heating purposes. Pipes are already laid, and the experiment will be tried in the new city hall and in the public-school building. If it is a success there, it will be generally used throughout the city. By far the largest water-storage project ever undertaken in the United States

ect ever undertaken in the United States is that on the Arizona canal, nine miles from Phonix. Work will begin at once to put an embankment on the west side of the canal at the distance of three miles, which will form a lake of that length and twenty feet deep. Water will be let in from the Arizona canal during

Donald McRae, Commissioner of Uma-tilla county, Or., is the inventor of a cultivator, which promises to revolu-tionize the farming industry. It is es-pecially designed for killing weeds, and will also thoroughly pulverize the soil. The shovels are flat, heart-shaped pieces of steel, and by an ingenious mechan-ical contrivance they have a reversible motion, the intention of which is to clear them of rubbish, so that they will cut clear and smooth at all times. Donald McRae, Commissioner of Uma-

Never since the settlement of Idaho have there been such immense crops all over the State as during the past season. Scientific research attributes a beneficia change in the climate to the multiplica-tion of irrigation canals, which moist n a great extent of country and create a humid atmosphere. It has been ob-served that frequent rains now fall dur-ing the months of July and August Nature is closing up the gap between wet and dry seasons and equalizing the rainfall.

For some weeke the affairs of the proposed San Francisco and Great Salt Lake railroad have been very quiet, and there is now no doubt that the projet will fall through. The sole cause of its will fall through. The sole cause of it non-success has been the lack of interes

NATIONAL CAPITAL

Annual Report of the Fourth Assistant Postmaster-General for the Year Ending June 30.

Ex-Governor Geary of Iowa has formally assumed the duties of Assistant Secretary of the Treasury. The President delegates to him the power to sign treasury warrants and act as Secretary of the Treasury in certain contingencies. Superintendent of Census Porter in his annual report strongly urges that the census office be made a permanent bureau of the Interior Department. Regarding the cost of taking the eleventh census, he says that the disbursements up to June 30, 1892, amounted to \$8,203,603, and of the thirteen volumes in which results have been embodied there are now in the hands of the printer eight quarto volumes, but the infinite detail of the office work makes it impossible to foretell the date of the completion of the whole work.

The annual report of Fourth Assistant

stati of the onice work makes it impossible to forstell the date of the completion of the whole work.

The annual report of Fourth Assistant
Postmaster-General: Rathbone shows
4,105 new postoffices were established
during the year, a greater number than
any previous year except 1893, when it
was 4,427. The year closed with 67,119
postoffices in the United States. The
largest increase in number of new postoffices is in the Southern States. Rathbone suggests an amendment to the law,
making the mailing of green-goods circulars a continuing offense from the time
of mailing to the place of destination,
so that the prosecution can take place at
either point. A similar enactment in
regard to lotteries has about swept them
out of existence in two years, and he believes the same effect would follow in
the cases of green-goods swindles.

The Navy Department will soon send
a special communication to Congress in
connection with the transportation of
enlisted men from New York to San
Francisco. The naval officers are said
to be mad all over at the Pacific Mail
Steamship Company, owing to their inability to get the company to transport
their sailors. As the Treasury Department has ruled against sending men
across the continent by rail, the Navy
Department is greatly embarrassed in
its efforts to supply men for the vessels
on the Pacific Coast. Recently the department desired to send 100 men to
San Francisco for the new coast defense
vessel Monterey. The company informed the department that they could
not take the men for several weeks yet.
The department has determined to ask
Congress for authority to transport its
men across the continent by rail.

The monthly weather-crop bulletin
shows that November was slightly

men across the continent by rail.

The monthly weather-crop bulletin shows that November was slightly colder than usual in the greater portion of the country east of the Rocky Mountains, with a deficiency in temperature generally throughout the Northern States and as far south as North Carolina. There was more than the usual amount of rain in the Middle Atlantic States, Southern New England, the northern portion of the Gulf States, Tennessee, Eastern Texas, Illinois, Indiana, Michigan and California. The unusually heavy rains in the North Padiana, Michigan and California. The unusually heavy rains in the North Pacific States resulted in great loss to the railroad and agricultural interests. The weather has been favorable throughout the winter wheat region, and the recent rains doubtless benefited greatly the late sown wheat, but the ground continues very hard throughout the spring warsat States. Unton picking is about completed. Some slight damage was done to the late cotton Central States by done to the late cotton Cen ral States by heavy rains. The weather in Southern California was favorable, and the re-ports show that the orange crop is ripen-ing as well as could be desired, the fruit

WORLD'S FAIR NOTES.

Great Demand for Space in the Mining Building-Spain to Ask the Cortes for an Appropriation.

The Spanish Cabinet will ask the Cortes for \$150,000 for the World's Fair and to send all archives pertaining to Columbus.

Among the exhibits at the World'e Fair will be two swords from Spain, one of which belonged to Isabella, Columbus' patron, and the other to Cortes, the con-

queror of Mexico. Emperor William has at last consented to let a German military band visit Chi-cago during the World's Fair. The best men will be selected for the purpose from the bands of different regiments.

By request of the World's Fair Commission the Willapa Harbor Tannin Extract Works will prepare an exhibit of Washington hemiock or, as it is now called, Alaska pine. The exhibit will consist of a card of bark, the hemiock extract and leather tanned with it, hemlock lumber, flooring and access actions. lock lumber, flooring and cross sections; also photographs of the works, showing the process of manufacture of the ex-

The Emperor of Germany has con-sented to send to the World's Fair what will be one of the most remarkable and attractive features to be seen at Chicago attractive features to be seen at Chicago next year. It will consist of a collection of presents received by his grandfather, the Emperor William; his father, the Emperor Frederick, and himself from their fellow-sovereigns in Europe, as well as from the people of Germany. The collection will be intrusted to the care of the Latin-American department, but the conditions under which it will be exhibited have not been announced. The presents consist of jewels and other personal ornaments, silver plate, decorations and an infinite varie v of other articles. The explexition is earth millions.

will fall through. The cole cause of its non-success has been the lack of interest taken in it. Many people who were clamorous for a competing road became shy when it came to raising subscriptions, and it has been impossible to raise enough money to push the road to completion. As a consequence the whole scheme is on the verge of dissolution Much preliminary work in the way of surveys, etc., had been done, and about \$3,000 had been spent in this manner. The work of obtaining subscriptions was then taken up, and though urgent efforts were made, only one-third of the amount of money agreed upon before the bonds also in one of the subscriptions, and if at the end of that time the necessary amount of money was not forthcoming; all would forhoute, y other also in operase. This string of the scheme have become discouraged and see no use in attempting to carry in a real subscription of the scheme have become discouraged and see no use in attempting to carry in a replace and which to be the competitor of the Southern Pacific and the new transcontinental line, in a replace to the lassitude shown by the California was the manner of the scheme have become discouraged and see no use in attempting to carry was the interest is such that the promoters of the scheme have become discouraged and see no use in attempting to carry matters any further.
