THE PACIFIC COAST.

Arrested and Charged With Stealing Letters.

FOURTH CROP OF GREEN PEAS

Good and McWhirter Murder Cases at Fresno, Cal.-A Monster Fur-Bearing Seal.

Carlisle's order discontinuing coinage

at the Carson mint throws thirty-nine employes out of work. A concession is being sought at the City of Mexico for a lottery at Ensen-yala, Lower California.

Astoria canners are preparing for the biggest salmon catch of the year. The present run is very heavy.

A monster fur-bearing seal, weighing 1,500 pounds, was caught at Elk Creek, at Tillamook, Or., recently. Philip Koonee and Walter I, Dough-erty have been arrested at Hailey, Idaho, and charged with stealing letters. The fourth crop of green peas is now ready for the table at Yuma. Green corn has been in the market since May

The Co'orado, New and Carter rivers in Arizona are higher than has been known in years. The latter two are out

of their banks. The Good and McWhirter murder cases at Fresno are becoming very much entangled with contradictions and plotand counter-plots of a sensational char-

Judge Ross of the Unites States District Court at Los Angeles has ruled in a water case that a new constitution causnot abrogate contracts made previous to its passage.

Donborger & Co., contractors and builders at Los Angeles, consisting of it. D. Donborger and R. N. Rogers, suidenly departed from Los Angeles, leav-ing lumber bills and mechanics unpaid. The Brackstreet Mercantile Agency re-ports thirteen failures in the Pacific Coast States and Territories for the past week, as compared with fifteen for the previous week and fifteen for the corresponding week of 1802.

Eleven Denver youn; men danced seventeen hours and thirty mindtes, and only stopped when the Humane Society and the police interiered. The men were allowed six lady partners appear, who relieved each other at stated The prize contested for was a \$200 medal.

The man Burns, who was with Black, the detective, at the time Sontag and Evans freed on them, said to a reporter. "You may say, if you like, that I was seared out of my wits. There was one obstraction in my way as I ran that must have been sixteen feet high, but I cleared it at a leap."

A petition is to be forwarded to Ot-tawa from the white fishermen of the Fraser river in British Columbia pro-testing against the present law, which enables the Japs and aleins to get naturalized and then procure fishing licenses. The Asiatics are taking the oath of allegiance by the score.

The boys in the State Reform School near Salem are kept at work clearing land. About ten acros will be cleared for the plow this season, making a little more than 100 tiliable of the total estate of 377 acres. The school uses between 400 and 500 cords of wood a year, and the cutting of it removes most of the timber from the tracts to be cleared.

HURA.

Health Officer Keeney and Dr. Regenburger of the San Francisco Board of Health have sent to the posthouse Robert Jackson, a 41-year-ad cook, whom they decided was a full-fledged leper. Jackson said he was a native of England, and that he had been in Honolulu for some time. Then he went to Victoria, and three months ago came to San Francisco. He thought he was only suffering from a slight skin disease.

Clark E. Royce, a well-known lawyer of San Francisco, has been indicted by the grand jury for embezzlement of \$19,-000, the funds of the Yountville Veter-ans' Home, while acting as Treasurer of that institution. Rovee was found in his room about a month ago suffering from a bullet wound in the head, but how he came by it has since remained a mystery, although generally believed it was a case of attempted suicide. The fact that he was a defaulter was discov-

The managers of the Engene cannery are now planting corn at the rate of about fifteen acres a day on the Bushnell farm north of that town. They will plant about seventy-five acres. They have fourteen horses and eight men at work and are running two rolling cultivators and have three men run-ning the corn droppers. The ground is thoroughly cultivated before planting and great pains are being taken to have everything just right to insure a good

The result of the investigation by the second mate, and the wast of the corn and the potential second for the second mate, and the seco

California is exonerated from all blame.

David Starr Jordan has resigned the Presidency of the Leland Stanford (4r. University. The resignation is said to have been made to Sonator Stanford personally and supplemented by a written communication, which the founder of the institution has accepted. It is understood that at the end of the scholastic year President Jordan's connection with the college will cease. The reason given for the resignation is that Senator Stanford has for some time been rather dissatisfied with the manner in which Jordan has managed the university affairs. When he returned from a broad six weeks ago he summoned the President to a conference at his Pala Alto residence. He indicated the changes he desired, but Jordan resented the Senatorial interference with the ultimate result as stated.

WORLD'S FAIR NOTES.

At the entrance of the Colorado building at the World's Fair is a flagstone of red sandstone 25x8 feet and ten inches

It is reported that Count Tolstoi in over with him a party of young Russian nobles, who are to investigate American agricultural methods and the systems of irrigation in use in the West.

irrigation in use in the West.

A number of foreign commissioners who, when discatisfied with the awards plan, withdrew their exhibits from competition have announced they have restored them as the result of the settlement of the much-discussed question.

Henry C. Ives, head of the art department of the World's Fair, has had a cloth placed over Anderson's picture of "Woman Taken in Adultery," which the committee had refused permission to exhibit, but which the French exhibitors gave representation to in their collection of pictures.

Herr Wermith, the Imperial German

Herr Wermith, the Imperial German Commissioner, said the other day, refer-ring to the report in late dispatches that Emperor William had snally decided to come to the fair, that he had no official advice to that effect, but would not be surprised if it came to pass, as the Em-peror was a great traveler and had taken a deep interest in the fair.

a deep interest in the fair.

It is now positively known that the far-famed Oriental monarch, the Suitan of Jehore, is coming to the World's Fair. His Majesty calded the fact of his intended visit to Deputy Commissioner V. W. Lake, and directed M. Jake to meet him in Carlsbad, Germany, to accompany him to Chica co. Mr. Lake at once left for New York, whence he will sail for Europe on the Campania. He expects to return to Campania. He expects to return to Chicago before the end of the present month. The Sulian is fanous for his great wealth, and is said to possess the finest collection of diamonds and rubies and pearls in the world. He will bring a retinue of ten servants and two English physicians, whom he carries with him to look after his health.

The formal opening of the electricity building, which has been so long deferred, took place one night last week. The feature of the display was the unveiling and lighting of the big E lison tower erected by the tieneral Electric Company. This shaft is situated in the exact center of the building, and represents the highest achievement of the in-candescent lamp. It extends into the grand arch formed by the intersection of the cave and transept, reaching a height of about 190 feet. The methods used in construction have resulted in showing a perfect column as though the entire shaft. were hearn from one massive block of stone. It springs from the roof of a col-onnade surrounding the base, and the entire interior is strewn with thou-ands of incande-cent lamps as many hust as the Western sunset. The colors are arranged by mechanical methods, capable ranged by mechanical methods, capable of being flashed in harmony with the strains of music. The column is crowned with a well-preparticular replica of an Edison incandescent lamp, formed from a multitude of pieces of prismatic crystals. Upward of 30,000 of these beautiful jewels are strung on a frame, and are all lighted from the interior by a large number of incandescent lamps. The effect produced is marvelous, and can only be appreciated when seen.

be appreciated when seen. Montana's famous solid silver statue of "Justice" was unveiled in the mines and mining building the other day. It is the statue for which the actress, Ada Rehan, stood as a model, and by so do-ing created much contention among her sisters of the profession. The unveiling of the statue was the event of the day at the White City, and the great build-ing in which the statue stands was thronged with people eager to see the magnificent work of art. While the crowd was assembling, the Cincinnati band played national airs. The open-ing address was by Major Martin Mc-Ginnis of Montana, who spoke in glow-ing terms of the brilliant future before that State, of her untold wealth, of the that Sate, of her initial weath, of the enterprise of her citizens and her won-derful natural resources. When he fin-ished, Mrs. Richards of Montana stepped forward, and, taking up a small silken cord, gave it a gentle pull, and the Stars and Stripes which enfoided the silver image of "Justice" fell away and exposed the statue for the first time to public gaze. The crowd gave vent to wild cheers, while the band played "America." When the applause died away, Hon. I. M. Quinn, editor of the Butte Miner, male the closing address. He spoke of the statue as a work of art, of how it came to be male, and how it transported the wealth enterprise and represented the wealth, enterprise an artistic taste of the citizens of that State. At the close of the exercises the Montana Commissioners entertained their friends and a large number of exposition officials and the representatives of foreign nations at luncheon.

June 1 closed the first month of the exposition. Although the weather and the general impression that the fair is not finished have affected the attendnot finished have affected the attendance, the average has not been as high as the governing officers of the fair expected before President Cleveland pressed the button May I. There is no denying that the treasury department of the fair is pressed for money, although the banks, which are represented in the local corporation, stand ready to advance money at any time to tide the exposition over; but money is owing to the contractors and employes, and the former find much difficulty in getting quick and full payment of their claims. Treasurer Zeeberger is compelled to resort to all kinds of excuses for putting the contractors off, but some have been waiting two months after the contracts have been completed and their vouchers passel. There will be a severe policy of retrenchment in all departments of the fair beginning next month. The dis-charge of 2,000 employes is contemplated, and even Major Handy, who deals with the press representatives of the world, is now preparing a detailed statement is now preparing a detailed statement of passes given with a view to a heavy reduction in the list. Ex-President Baker of the exposition, who is of the special committee investigating the press matter, thinks that the press of the country has done more harm than good to the fair and should not be treated liberally. Before the opening the enthusiasts connected with the fair talked about an average daily attendance of 100,000, but that number has only been reached twice—the opening of the create who is of the press of the create who is of the press of the create which has been skimmed off. Later a little wheat bran can be added, and when they are good pasture of cover of the cream which has been skimmed off. Later a little wheat bran can be added, and when they are good pasture of cover of the cream which has been skimmed off. Later a little wheat bran can be added, and when they are two to four months old, and it is better if it is warmed for the large ones also. Put some linseed meal or linseed-meal gruel, made by boiling or steeping it in water, into their milk to make up for the cream which has been skimmed off. Later a little wheat bran can be added, and when they are good-sized calves some commendation will prove beneficial. Increase the quantity of grain added as they grow larger.

### AGRICULTURAL.

Great Interest Manifested in Dairy Schools.

FEED FOR PRACTICAL USE.

Prime Article of Milk Necessary as a Preliminary to Manufacture of Good Butter.

The farmer who keeps a good dairy has a more constant source of income than one engaged in almost any other branch of farming.

The frouble with a very large amount of dairy butter is a lack of skill and sys-tem in its manufacture; hence the quality is often variable.

A cow is a good cow simply because she has an increased capacity for turning raw material into the kind of product

the dairyman wants. Breed and feed for practical use rather than for show. The time will come when practical points will be more appreciated

than mere show points. Have plaws, harrows and all tools ready for use—a little paint will not hart ome of them when you have the bolts all in and nuts tightened.

The quality of milk that a cow can produce depends upon her breed and in-dividuality, and in this sense there is more in the breed than feed.

Try and keep the brightest of the boys on the farm. It will afford plenty of ex-ercise for his brains and for all the knowledge that he can accumulate. One of the principal advantages that the creamery has over the dairy is that is soon as the milk or cream reaches the creamery it is in the hands of skilled

workmen. Results are the products of causes. I rou see better stock in your neighbor's fields than see in your own, you may be pretty sure that he is a more careful breeder and feeder.

Dairying is by the demands of the market divided into three branches—milk, butter and cheese—and in buying cows you must get the right kind of a cow for your business. At present relative prices wheat is per-naps a cheaper food for stock than oats

or corn. Test it, and if you find this true, do not let a mere matter of sentinent stand in the way of feeding it. "Quick turns" in cattle-growing mean 'large profits;" at least, larger than can in feeding a pig or a steer until there is langer that it will die from old age.

Do you appreciate the value of wheat brain for feeding young stock? At pres-ent prices we doubt if there is anything that can be used to better advantage to supplement the pastures and make rapid

Keep all animals free from worry 'I rou want them to thrive. The horse in order to work well; the cow that she may give much milk; the hog and the

2.80; apricots, \$1.65 a 2.00. Pie fruits, assorted, \$1.20; peaches, \$1.25; plums, \$1.20 a 2.00 a 2.00 b 2.0

a preliminary to the manufacture of good butter. To secure this there must be good cows, good feed and good care. Don't imagine that you can neglect one of these things and have complete suc-

There are seventy-eight butter and cheese factories in New Zealand. Farmers receive about 2 cents a gallon for milk, and the butter is forwarded to En-gland. The freight charge for the entire distance of 12,000 miles is about 3 cents RAISING CALVES BY HAND

Getting calves well started and taught

Getting calves well started and taught to drink is an important point. There is a difference of opinion as to the method of procedure. If taken away from the cow at once, they are more easily taught to drink, and cows are probably less disturbed than when they are allowed to suck for a few or several days before feeding by hand is begun, for they are then much stronger and are less inclined to take kindly to feeding from the pail Calves need the colostrum or first milk to put their digestive system in good condition, as it acts as a physic and cleans the fetal matter from the intestines. It should always be given to cleans the fetal matter from the intes-tines. It should always be given to calves fed by hand. Young cows with their first calf often fret badly, and "hold" their milk when the calf is taken away after having been allowed to suck for a time. Removing them at once is open to this objection. They must be fed often for a few days. This takes time, at a season when it cannot be well spared from other work, while if they are allowed to run with the cow they re-quire little attention until taken away. quire little attention until taken away, when they can wait half-day intervals and be fed noons and "chore times." Warm their milk to blood heat until they are two to four months old, and it ance of 100,000, but that number has only been reached twice—the opening day and Memorial day. Special fete days and single-fare excursions from distant points will swell the crowds for the next four months, but the European patronage is not being relied on to any greet extant in figuring up prospective receipts. For the month of May it can only be said that the fair has not much more than paid the opening expenses.

### PORTLAND MARKET.

WHEAT—Quote: Valley, \$1.20; Walla Walla, \$1.10 per ecntal. FLOUR—Standard, \$3.40; Walla Walla,

### FOREIGN CABLES.

All Roman Catholic Schools in Russia Abolished.

PATTI'S VOICE BADLY WORN.

Monument to the Great English Baptist Minister-Gladstone Addresses Laborers.

Russia has decided to use falcons intead of pigeons to carry army dispatches.

There is said to be fifty millions of money lying unclaimed in the Scotch banks. Paris contains at present about 241,380 foreigners, including 38,000 Germans, 18,000 English and 3,000 Americans.

A London grand jury has found a true bill against William Townsend, who discharged a pistol at Mr. Gladstone. Mount Blanc Observatory, 15,781 feet above the sea level, will be completed next August. Its cost will be \$60,000.

It is said that forged notes on the Bank of Brazil are being circulated among the Brazilian government troops. In his recent address to workingmen Mr. Gladstone said he rejoiced to see an increased number of labor representa-tives in Parliament.

Preparations at Odessa and Crimean ports for the naval maneuvers of the Russian Black Sea fleet on a huge scale are now in progress. The preacher Spurgeon, whose influence was so powerful in London, is remembered with a monument lately unvailed in Norwood Cemetery.

The progress of the illumination of the Dark Continent is indicated by the fact that 700 locomotives now cast the rays of their headlights through the gloom.

consumption in that city of dog flesh A strong effort is being made in En-gland for a law that all ships must carry enough navigating officers to give them four hours on and eight hours off duty. The London Statist says the liabilities of the Australian banks that have failed this year, including those to shareholders as well as the public, exceed \$500,-

000,000. Patti's voice is very badly worn. She no longer attempts to sing such florid passages as she did ten years ago, and she cannot get up to her former brilliant high notes at all.

Prince Bargram and Prince Mustapha, members of the leading families in Dag-lestan, on the way to Moscow quarrefed. They fought a duel in the province of Poltava. Both were killed. There are about eight times as many divorces granted in Japan as in the United States, the proportion in the Mikado's realm amounting to 602 out of every 100,000 in population.

The champion long-distance walker of France, Lardeaux, has aunounced his intention to challenge two competitors to walk to Chicago by way of Siberia, the ice fields and Alaska, the winners purse to be 23,000 francs.

The Brunswick (Germany) Hygiene Society has examined sixty samples of so-called medical Tokay wines, "guar-anteed pure" or "recommended by phy-sicians," and found that fifty of these

siciane," and found that fifty of these samples were not pure wines.

The long-expected deathblow to the further propagation of Roman Catholicism in Russia has at last been dealt by the promulgation of a ukase by the terms of which all Roman Catholic schools, as such, are abolished.

Empress Augusta Victoria has sent to Father Cza Luzzi, librarian at the Vatican, through Herr von Bulow, Minister to the Vatican, a costly ring, containing twenty-four diamonds and the imperial initials in brilliants and rubies.

The drought in England is unusually

The drought in England is unusually prolonged. In London it has continued for nearly eighty days, the total amount of rainfall for the last eleven weeks being only .52 inch, or considerably less than one-seventh of the average. There is just now a revival of the Napoleon craze in Paris, and the authors, playwrights and the makers of bronze souvenirs in the shape of images, ink-stands and like objects are all occupied with the diminutive figure of "the first Bonaparte."

The Princess May's trousseau will be made entirely of British and Irish mide goods. Sheffleld "loyal British workingmen" have resolved to thank the Princess "for the much-needed example of having her work done by Englishmen and English women and their brothers and sisters in Wales, Scotland and Ireland."

There is in the world just one woman trainer of racchorses. This is an English woman, Mrs. Challoner, the widow and sister of well-known jockeys. When her husband died she knew how to manage his training establishment, and successfully continued his business. Her oldest son is a trainer, and the four younger ones are all good jockeys.

Engineers from London are in the hills of Wales with the object of propounding a huge scheme for supplying the metropolis with water. The scheme which finds most favor is that by which the upper valley of the Dee will be converted into a lake nine miles long submerging miles of country, together with the whole of Bala town, four good-sized villages, six grave yards, five churches, ten chapels and the Bala Theological College.
