THE MARRYING AGE.

EFFECT OF MARRIAGE ON THE DEATH RATE OF INFANCY.

Over Thirty and Under Fifty With Advantage -- Herr Kurosi Has Deduced

vantage—Herr Korosi Has Deduced Some Interesting Figures.

The mortality of young children is yearly decreasing. The decrease is ascribed to various causes. Some say that it is due to progressive improvement in the human race. Others attribute it to an increase of proper precaution in the care of the young. Still others contend that the cause of fewer deaths among children is to be found in no longer permitting them to eat unsuitable food and to wear unsuitable clothing.

Few infer from the present rate of mortality that the marriages of parents have been made at more proper ages. Yet investigation by scientific men has proved that if hereditary diseases be excepted there is nothing so dangerous to the life of a child as the marriage of its father and mother at certain ages.

It is only recently that any inquiry into this subject has been undertaken. But the results which have thus far been obtained are such as to show that men and women must marry at particular stages of their lives if their offspring is to be mentally and physically sound.

It is to Herr Korosi, the head of the statistical department at Buda-Peath and already well known for the importance and accuracy of the conclusions he has arrived at from statistical inquiries in other fields, that we are indebted for the discovery of this new factor in determining the welfare of the human race. The results which he obtained from a casual examination some 10 years ago of the relations existing between the mortality of children and the various ages at which their parents were married were so striking that they induced him to make a more exhaustive investigation.

For the past 10 years, therefore, Dr. Korosi has been careful to ascertain, whenever the death of a child was registered, the ages of its father and mother, as well as that of the child and the cause of its death. He has noted in all 29,813 separate cases, which, in making his deductions, he divides into two distinct classes, the deaths caused by hereditary diseases and the deaths caused by heredi

H. Rider Haggard, the novelist who wrote "She" in six weeks and was re-warded by worldwide fame and a comfortin Norfolk, where he can, undisturbed, de-vota, himself to agriculture, stock raising, good shooting and profitable novel writ-ing. Mr. Haggard is now a country squire, a gentleman farmer and an enthusiastic sportsman, and his talk savors more of farming and live stock than it does of fic-tion and literature.

Ditchingham House, his country place, is about 150 years old and is surrounded by as many acres as it has seen years. It is a quaint, pleturesque place and just the sort of home such an imaginative and re-

Age of Mothers.	this instance are: Percentage of Deat

30 to 35 years	15
Over 35 years	
Doutha romiting	from tuberculosis we

eliminated from these calculations.

From this table it is evident that the most desirable age, as far as the health of her children is concerned, for a woman to marry is between the ages of 30 and 35, the mortality of children resulting from marriages at that age being but 12.35 per cent. It also appears that a woman should marry when she is more than 35 years old rather than when she is between 30 and 30 years of

Mothers under 20 years of age are, accord-ing to statistics, more liable to bear sickly children than at any subsequent period in

their lite.

The mortality of children by women in their teens is nearly double that of those whose mothers were married between 30 and 35 years.

mantic writer as Haggard thoroughly enjoys. The Haggard household consists of the novelist, his charming wife, their two little daughters, half a dozen servants and several big dogs of the mastiff breed. The master of Ditchingham House does very little literary work in summer, and his mornings are spent in looking after the affairs of his farm or inshooting. He is an excellent marksman and is quite a picturesque figure as he strolls through his game preserves clad in a brown shooting jacket and knickerbockers and with his double barreled shotgun ready for use the instant a grouse breaks cover. He has a tall, athletic, sturdy figure, the flush of health is on his sunburned face, and he hardly looks the 37 years Father Time has credited him with.

The mortality of children by women in their teens is nearly double that of those whose mothers were married between 30 and 35 years.

Concerning deaths due to tuberculosis and atrophy, the statistician finds that twice as many deaths from atrophy when the mothers are under 20 as when they are over the age of 20.

Herr Korosi also recognizes that the physical and mental condition of a father caves, to the same extent, its impress on his children. He has accordingly prepared a table of greater length showing the results of the "age combination" of both parents. Men are slower in developing than women; hence the relative difference between their ages in the table:

Percentage of Paths from Age of Paths From Paths Paths

It will be seen from the table that the best results are obtained from a marriage when the father is from 30 to 40 years of age and when the mother is from 50 to 35 years old—that is to say, when both parties to the marriage are in the prime of life. If, however the mother he of the prescribed age ever, the mother be of the prescribed age and the father slightly under 30 years, the result is nearly the same.

Earlier Beginning of Presbyopia.

The opinion has recently been expressed by some experienced opthalmologists that presbyopia, or the long sightedness of old age, in which near objects cannot be distinctly seen unless held at a considerable distance from the eye, begins at the present day earlier than was formerly the case. No precise statistics on the subject exist as yet. One of the most reliable observers in this The most important deduction which can be made from these statistics is that men between the ages of 30 and 40 cannot with safety to their offspring contract marriages with women under 20, the rate of mortality in this case being no less than 27.88 per cent. This deduction is of exceptional importance because of the marked decrease in marriages of that nature at the present

One of the most reliable observers in this line states that his experience of over a quarter of a century leads him to believe that both men and women now seek aid from glasses at an earlier period of life than and 50 years old and the woman between 20 and 30 years old, which are also of frequent ce, are likewise shown to be detri-

mental to the issue.

Lastly, it is proved that it is unwise for a man who has passed the age of 50 to marry a young woman, or for a woman who is

re than 35 years old to marry a man In general it may be said that marriages when the contracting parties are both young, or when there is a difference of more

than 15 years between the contracting parties, are likely to prove dangerous to the healthy propagation of the human race. These statistics Herr Korosi has of course calculated from local observations. Investigation proves, however, that they apply with equal force to other countries and latitudes of the globe. In northern elimates they apply indeed with greater

in regard to the average age of marriage in the different countries statistics show that in England it is for men 27.7, for women 25.5 years; in Scotland for men 29.8, for women 25.2; in France for men 30.2, for women 25.2; in France for men 30.2, for women 24.9; in Italy for men 30.2, for women 24.9; in Italy for men 30.2, for women 25.2; in France for men 30.2, for women 26.9; in Italy for men 30.2; in Italy for men Men 53.2; in France for men 30.2, for women 25.4; in Prussia for men 29.2, for women 26, and in Russia for men 25.2, and for women 21.05. A comparison of these ages shows Herr Korosi's deductions to be reasonable.—New

In sculpture did any one ever call the Apollo a fancy piece, or say of the Lac-coon how it might be made different? A masterpiece of art has to the mind a fixed place in the chain, as much as a plant or crystal.—Emerson.

Not a few men are so abnormally susceptible to love in their first youth as to exhaust their capacity for loving before they have reached an age to love with discretion.

A CURIOUS STORY.

A CURIOUS STORY.

An President In a New Engined Minister's
Life Related by Tennyson.

A writer in The Tablet relates a curious
story which he heard from the lips of Lord
Tennyson during a visit to Farringford
some four or five years ago. They ware sitting under the shadow of some great magnoliss that cover one side of the house, and
the conversation turned upon the supernatural and the possibility of communications from the other world.

Tennyson then told of a dissenting minister in one of the New England states
noted for his powers as a preacher, who
one Sunday morning, instead of reading a
text and giving a discourse in the usual
way, suddenly in a most dramatic manner
began to recite "The Charge of the Light
Brigade." The congregation listened
breathlessly to the end, but before the
service had concluded elders and people
were loud in their anger at the way in
which the chapel had been profaned. Their
murmurs found the minister wholly unprepared.

He had some into the pulpit intending to

murmurs found the minister wholly unprepared.

He had gone into the pulpit intending to speak about the need for charity and was wholly unconscious of what he had done. Convinced at length by testimony which he could not withstand, he was filled with remorse, went sadly to his room that night, and watched through all the hours till morning, seeking consolation and not finding any. At daybreak they brought him word that a man looking like a tramp wanted to see him urgently.

The minister, half from habit, decided to see him. The stranger came straight into the room and simply said, "I come to thank the man who has saved my soul." The minister stood in silence, wondering whether this was some new mockery of his senses. The stranger went on: "I was all through the Crimea, and I was in the thick of the fight at Gettysburg, but never till I heard tyou recite that poem in the chapel yesterday did I know what I had to thank God for. Sir, from that hour I determined to chank a light and the said of the chapel yesterday did I know what I had to thank God for. Sir, from that hour I determined to chank a light and the said of the chapel yester and the said of the said that the said th day did I know what hour I determined to change my life, and I want to thank the man to whom I owe my salvation."

One runs onto many bits of nature in a down town retail store. With a little close observation in the busy throng you can learn more in 10 minutes about human nature than in a decade in some other places. Men and women are alike unconscious of themselves and of the impression they make on others when shopping. They have been doing a good deal of shopping lately. Women have thought nothing of squandering two hours to save a nickel, nor of bringing the wrath of the salesman down on their defenueless heads by their indecisions and their blocking the way.

to 1 if poor puss will ever err again. Once released from this somewhat severe, with never somewhat severe in decessary, punishment she will make off, with tears in her eyes (whether from emotion or the pepper it is impossible to say), and for the future she will avoid the poultry department with strange persistency and regard with distrust the fluffy little denizens of the chicken coops.—London Lady.

Appalling Depths of Space.

In his lecture to juveniles at the Royal institution in London, Sir Robert Ball said that a telegraphic message would go seven

defenseless heads by their indecisions and their blocking the way.

It was amusing to notice with what satis-faction one salesman took a slight revenge on one woman with whom he had been lafrontie it saved her. She examined the directions ferent sized cans. She read the directions on each. She listened to his talk, and she asked him many questions. Then she laid down the last can of pudding and walked

signs of a storm in his face. A woman who was waiting for one of the cans said: "She evidently had her doubts about the

quality of your puddings." "Doubts? Not she. I have been talking to her and telling her about them for an hour. Plum pudding is too good for her. She is one of those peo-ple that can live all their lives on suet pud-ding."—Chicago Tribune.

A Disgusted Cab Driver. He had been driving a cab for four years and got a little bit more weary looking

and got a little bit more weary looking every day.

"I can't stand it no longer," he said at last. "I ain't going to have any more women finding fault and claiming that they didn't have courteous treatment."

There was a woman standing at the next corner. Instead of the customary "Cab, ma'am?" he stopped his horse, dismounted from his porch, and going toward the curbstone lifted his hat and inquired:

"Do you pronose making use of this ye."

"Sir?" she said in tones of astonishment,
"Do you wish to ride in this cab? If so,
will gladly escort you to it. I sim to

please."
"Why, I never heard such impertinence!"
she stammered. "I did intend riding in
your cab, but I shall certainly wait for the next one. And you may expect a complaint from me at the police station concerning your conduct, sir."

He remounted his seat and pulled his hat

down over his eyes.
"'Tain't no use. Geddup!" was all he said.—London Tit-Bits.

Lost to Sight. "Saw you at the theater last night, Jim." "Yes. I was there."

"Did you enjoy the play?"
"What play?"
"Why, the play at the theater of course What's the matter with you?'

"Was there a play?"
"Was there? Well, I should say the was. The biggest kind of a play—best I've

seen this season."

"Yes, I heard the people laughing."

"Then you sat the play out? I thought you didn't see it?" "Didn't."

"Jim, old man, come off! Were you asleep?"
"No. I sat behind a girl who wore a rose in her hat. I was a victim of the foliage craze,"-Detroit Free Press.

European and American Oyster The oysters of America and Europe differ greatly. European oysters are smaller and have a coppery taste. Our southern oysters are larger than the northern. They are dredged along the coast and transferred to oyster beds in creeks close to shore, wher

they fatten.
In London oyster salesmen sometimes keep oysters for a few days in water to which oatmeal has been added, for the purpose of rendering them more delicate and of better flavor. When out of season—during spawning time—the oyster is soft and milky and not fit to be eaten.—New York Mail and Express.

A Considerate Boy. Little Johnny—Pa, did you read in the paper how a parent was fined \$25 because his little boy hung on a street car on Third

Getting Ready to Quit. Old Uncle Norman had lived with the family for many years, helping about the house and yard at whatever there was to be done. He was a very talkative old man, fond of using high sounding words, and felt his importance very much.

He informed one of the young ladies of the young ladies of the young ladies of the young ladies.

the house one day that he would have to take a rest, that he could not stand such "laborious labor" because he had "rheu-matic rheumatism."—Youth's Companion.

Dropping Middle Names.

Various celebrities have dropped one or more middle names. Mr. Edmund Gosse; was christened Edmund William Gosse; Mr. Robert Louis Stevenson, Robert Louis Balfour Stevenson; Mr. Robert Buchanan, Robert Williams Buchanan; Mr. Henry Labouchere, Henry du Pre Labouchere.—Lopdon Tit-Bits.

"A million people out of work," says a newspaper, writing of these hard times. Added to this misfortune are the physical infirmities with which thousands have to bear. But there is one thing that is never bear. But there is one thing that is never idle; always at work, unceasingly in search of those thus deterred, it seeks to cure such and help them to grasp a chance when it comes. This is the mission of St. Jacobs Oil. Among the millions there are thousands suffering with neuralgia. For this it is a positive cure. Use it and there will be a thousand sufferers less and a thousand chances more to get work and hold it. Better times may soon come and there is nothing like the great remisty for pain to help you out of painful troubles and into place again.

Cats can be trained to almost anything if taught when they are young. We have a number of Persians, which sit with equanimity upon the top of our bird cages watching the canaries hopping merrily about from perch to perch, making no attempt to touch them, nor ever dreaming of inserting a velvet paw through the narrow wires to the discomiliture of the fluttering inmates. the discomilture of the fluttering inmates. They are left alone with the birds by the hour together, yet an overturned cage or a slaughtered canary is an unheard of catastrophe in our household. Chickens, too, our cats fully realize are forbidden to figure in their menu. They ramble about at their own sweet will among numberless broods of the tiniest bantam chicks, yet one of the latter is never missing, and they quite seem to recognize the fact that a plump little to recognize the fact that a plump little mouse or an unwary bluebottle caught buzzing upon the window pane is their only legitimate prey. Sometimes we hear of cats creating terrible have in the poutry yard, killing chickens by the dozen and making life a perfect martyrdom to the discrete.

The best way to cure pussy of this fatal habit is to take the dead chicken from her, pepper it well, and then fasten it round the delinquent's neck. Place her in a room delinquent's neek. Place her in a room and leave her thus for an hour or two to ruminate over her wrong doings. It is 10 to 1 if poor puss will ever err again. Once released from this somewhat severe,

that a telegraphic message would go sever times around the earth in a second, and it on one woman with whom he had been laboring. He had been telling her all about plum pudding—plum pudding sold in cans. He told her how by an hour's steaming they came out as fresh, as famous and just the same as the original English plum pudding. He told her what an awful lot of trouble it saved her. She examined the different sized cans. She read the directions on each. She read the directions of the same as the original English plum pudding. He told her what an awful lot of trouble it saved her. She examined the different sized cans. She read the directions of sach. She read the directions of the same as the original English plum pudding. He told her what an awful lot of the same as the original English plum pudding. He told her what an awful lot of the same as the original English plum pudding the carrie in a second, and moon it would reach its destination in a list the moon it wo than three years, traveling all the time at that tremendous pace, before it would reach

If that was the case with respect to the nearest of the stars, what must be said of those which were farther off? There were stars so remote that if the news of the vic-tory of Weilington at Waterloo had been flashed to them in 1815 on that celestial tel-egraph system it would not have reached

been traveling all the time.

Nay, more, if the glad tidings of that first
Christmas in Bethlehem 19 centuries ago
had been disseminated through the universe, there were yet stars of which astronomers could tell them plunged into space in depths so appalling that even the years that have elapsed since that even the years that have been long enough for the news to reach them, though it traveled at a speed of 180,000 miles in every second.

LIFE OR DEATH?

It is of vital importance that it should be understood by persons whose kidneys are inactive that this condition of things is finally inductive of a state of the organs where life hangs in the balance. Bright's disease, diabetes, albuminuria are all diseases of a very obstinate character in their mature stage, and all have a fatal tendency. They often baffle the most practiced medical skill and the most approved remedies of materia medical. But opposed at the outset—that it is to say, when the kidneys begin to discharge

"Do you hate me?" he faltered. "This is sudden," she rejoined in confusion. And they were divorced.

SAVE, SURE AND SPEEDY.

No external reme ly ever yet devised has so fully and unquestionably met these three prime conditions as successfully as ALLCOCK'S POROUS PLASTERS. They are safe because they contain no deleterious drugs and are manufactured upon scientific principles of medicine. They are sure because nothing goes into them except ingredients which are exactly adapted to the purposes for which a plaster is required. They are speedy in their action because their medicinal qualities go right to their work of relieving pain and restoring the natural and healthy performance of the functions of muscles, nerves and skin. Ask for Allock's, and do not be induced to accept a substitute.

Brandseth's Pills are safe and sure. safe because they contain no deleterious

A World's Tribute.

America Leads the Nations in the March of Progress.

Among the wonders of the World's Columbian Fair the grandest was the exhibit of American products. The Exhibition was, in this respect, an object lesson of the grandeur and glory of the Republic. Among the exhibits from the United States no article of its class stood so high as

Dr. Price's Cream Baking Powder.

The Chief Chemist of the Agricultural Department at Washington, backed by an intelligent jury at the Exposition, found it strongest in leavening power, peerless in its purity and beyond comparison in uniform excellence.

Received Highest Award At the World's Fair.

The award is a matter of official record.

Nothing could settle so decisively the immeasureable superiority of Dr. Price's over all other powders as the great honor bestowed at Chicago.

"If you ever get in a corner and seem to ave nothing available in the house for luncheon, just investigate the resources of the cracker box," said a careful housethe cracker box," said a careful house keeper. "I remember one day we had a guest come in just before luncheon was served. It was a sort of off day, and we had a spread made up of odds and ends. The visitor was one whom I knew to be somewhat dainty in her tastes, and as there was no time to send to market for anything I just didn't know what to do. Unfortunately the bread wasn't freeh, which was a great misfortupe, for it always accepts. was a great misfortune, for it always seems to me that with good bread and butter one can make out a sort of a meal; but here we were, when it all at once occurred to me that we might get up a creditable dish out of crackers, of which, as good luck would have it, there was an abundance.

"So I buttered a few dozen crackers and hem in the oven, there to stay up they were a light brown. A part of these were placed in a dish on the back of the stove, and with the remainder I made some cracker sandwiches out of some bits of roast fowl which was ready sliced in the pantry. The meat was mixed with a little mayonnaise and placed between two of the buttered crackers. A jar of canned fruit was connected and with some clies. buttered crackers. A jar of canned fruit was opened and with some olives and a bit of cheese rounded out a very reliabable luncheon, and my guest quite enthused over the new fashioned sandwiches."—New York Ledon.

Worked a Problem While Asleep, Morked a Problem While Asleep.

An Amsterdam banker once requested a professor of mathematics to work out a very intricate and puzzling problem for him. The professor, thinking the matter good exercise for the intellectual faculties of his pupils, mentioned it to them and requested them to work out the enigms. One of the students, who had pondered one of the students, who had pondered deeply over the intricate subject during the day, retired to bed. Some time afterward he arose, dressed, and seating himself at his deak worked out the problem accurately, covering sheets of paper with his calculations. He had no recollection in the norning of having done so.—Boston Glob
