

Highest of all in Leavening Power.—Latest U. S. Gov't Report

Royal Baking Powder

ABSOLUTELY PURE

A BIG SALT MINE.

The Development of a New California Industry.

Articles of incorporation have been filed by the "Crystal Rock Salt Mining Co." of San Francisco, with a capital stock of \$500,000, of which \$237,500 have been subscribed by Chas. G. Alborn, Sanford Bennett, Meyer Lewis, Julius Reimer, S. Lewis, L. Dorn and Ben Lewis.

The Crystal Rock Salt Mine is situated in San Bernardino county, and produces a salt of superior quality, which, according to analysis made by Professor L. Falkenau, of the State Assay Office in San Francisco, is found to be chemically pure. At the instance of Norton, Teller & Boden, and other San Francisco houses, a number of tests were made, with the result that the salt produced from this mine has been found to be equal to the best English salt in the market for butter making and table use, and for meat and fish packing, milling and dairy purposes. The lump stock salt from this mine is preferred by the large cattle companies to any other salt, by reason of its purity, dryness and solidity; also because it is the most economical for stock feeding. Owing to its firmness and purity it does not deliquesce when placed out on the ranges.

The company controls over 1,000 acres of mining ground in which the salt is mined from large deposits, as clear and transparent as crystals. The mine is connected with Salt Rock Station (Danby) on the Atlantic & Pacific R. R. by a road extending thirty-two miles, especially constructed by the Traction Engine Company, and upon which the company successfully operates a train of traction engine and wagons, constructed by the Best Manufacturing Company of San Leandro, Cal.

The company is about to commence the erection of extensive works at the mine, and upon their completion will be enabled to supply the purest salt ever produced for butter-making, table use, meat and fish-packing. Lump salt for stock-feeding and milling purposes is now being shipped.

The buildings at the mine are constructed of salt, and the company is about to erect an office building at the railroad station out of rock salt, which will attract great attention. Passengers on the train passing this station are now in the habit of getting off the train for the purpose of securing crystals of salt as keepsakes.

In the sunlight a building constructed of this salt appears as if it was covered with diamonds.

THE WEED IN KANSAS.

Newton Has a Ladies' Smoking Club Called the Sparrow.

The only ladies' smoking club known to exist in Kansas has just been discovered in Newton and is named the Sparrow. The Sparrows have a select clubhouse, elegantly fitted up with the most luxurious furnishings, including divans in profusion and all the paraphernalia of a smokers' club. There are books and periodicals, but it is in no sense a literary club. It is composed exclusively of young women, the number being limited to nine.

When one member marries or leaves the city, another lady is elected to fill the vacancy, and it is said there are always several applications awaiting action. It was only by accident that this exclusive secret association was discovered, but it has been in existence for a long time. The room belonging to the Sparrows is on Main street and is a genuine clubhouse. All its members are included in Newton's "swell set."—St. Louis Republic.

What Congressmen Read. "What books are the most popular with the new congressmen?" I asked a bookeller.

"Books on etiquette," he answered. "The demand is so great we cannot fill it. We sold 90 such books yesterday, and I have today sent a large order to my publishers, for at this rate my stock will soon be exhausted."—Washington Post.

Perfume Manufacture. England manufactures perfumes on a very large scale, importing many of the materials from other countries, but also making a large use of home-grown herbs and flowers.

Controls an Empire. The South Africa Company, controlled by Cecil Rhodes and his associates, owns a territory larger than France, Germany, Austria and Italy combined or five times the area of California.

Number of Hairs in a Beard. A Posttown barber has found a new occupation for spare moments. He has counted the number of hairs in a man's beard which he shaved. When the latter dried which had been used in shaving it was not difficult, although tedious, to count the hairs, which numbered 12,682.—Philadelphia Record.

A penny or two all extra profit.

That's the merchant's reason, who urges an inferior binding for a costly skirt. It's not (nothing is) as good as

S.H.&M.
Bias Velveteen Skirt Binding.
Look for S. H. & M. on the label and take no other.
If your dealer will not supply you we will.
Send for samples, showing labels and materials, to the S. H. & M. Co., P. O. Box 699, New York City.

FRIEND TO MANKIND.

WILLIAM G. ROBINSON, WHO IS DYING IN WASHINGTON.

He is known as the "Savior of Babies." Has Devised an Appliance to Cool Fever Patients—Trying to Secure a Patent to Help His Family.

William G. Robinson, called the "Savior of Babies" because of his invention, the incubator, is dying in Washington.

There is being tested in the New York hospital one of his inventions which may be of far greater service to humanity than the incubator. It is a contrivance to lower the temperature and thereby save fever patients. It has been very successful in its operation. If the dying man should by great good fortune recover, his future wealth would be assured.

When Robinson went to the New York hospital one day last summer to get one of his incubators introduced at that institution, he noticed a fever patient in one of the wards. They were using the old time method to cool this patient's temperature. There was a step ladder at the head of his cot, and on the top of it was a water pail with a piece of ice in it. A rubber tube over the side of the pail, descending, entered a rubber bag that rested on the patient's breast. Another tube was arranged so as to carry off the water from the bag into a waste pail at the bedside. Robinson was interested.

He asked the doctors about it, and they told him that the contrivance was often a failure and left great room for improvement. If the patient suddenly turned over, he was apt to bring the pail of water down on himself. Then, too, the water in the pail was likely to run out before the nurse could be aware that the patient would be seriously jeopardized by the sudden stoppage of the cold application.

The inventor went back to his little tinsmith shop in East Twenty-sixth street and built a contrivance that should furnish a steady flow of cold water. To minimize the labor and prevent the sudden checking of the stream he used the same water over again.

He built a frame of brass rods about 6 feet high. Two copper cylinders capable of holding ten gallons each were placed on sliding rods in a vertical position, and by an arrangement of chains, weights and pulleys the cylinders were made to balance one another. While one, filled with water, is at the top, just above the patient's head, the other rests on the floor below. The top one is filled with ice water and raised by the turning of a crank at the side. Rubber tubing passes from it down into a "worm," which is a great improvement over the rubber bag of the doctors.

After the water has circulated through the coils of the "worm" that lies on the patient's body, it passes into the lower cylinder. As soon as that cylinder gets full it is raised to the top and empties itself in turn into the other one, which has been lowered.

This invention has been used for a month at the New York hospital, and it has saved many patients and much trouble to nurses.

Robinson went to Washington for the sole purpose of getting a patent on this machine. He had made nothing from his incubators and thought that it was time to try to reap some pecuniary benefit from his work for himself and his family of three little children.

He filed his application at the patent office and was arranging to return home when he became very ill. The doctors said he had consumption in an advanced stage and held out small hopes of his recovery.

So his wife was called to his bedside. But the fate of his patent and what it means to his family is his one thought.—New York Journal.

THE LAST SLAVE.

An Aged Georgia Negro Enjoys His First Freedom.

Trone Wilson, an aged negro convict who was pardoned from the Georgia penitentiary by Governor Atkinson the other day, is probably the last slave to receive the benefits of President Lincoln's emancipation proclamation.

Wilson was in jail in Liberty county as accessory to a murder when the negro race was set free by the president.

He was afterward sent to the penitentiary and now enjoys the first breath of free air he has ever known.—New York Recorder.

Move Along. The Indian's view of the way in which he has been treated by the white man in this country was well given in an anecdote related by Professor Elliott Evans of Hamilton College. The famous Indian chief Red Jacket once met Mr. Evans' grandniece, Joseph Elliott, at Tonawanda, Niagara county.

Mr. Elliott did as he had been requested, and the chief moved up close to him. In a few minutes came a second request, "Move along, Joe."

Again Mr. Elliott complied, though with considerable surprise, and again the chief followed him closely. Scarcely had this been done when Red Jacket again said, "Move along, Joe."

Mr. Elliott was greatly annoyed, but willing to humor the chief he "moved along" once more, this time reaching the end of the log.

This was not sufficient to satisfy the chief, however, for a moment later came the fourth request, "Move along, Joe."

"Why, man," cried the agent irritably, "I can't move any farther without getting off the log into the mud!"

"Ugh!" exclaimed Red Jacket contemptuously. "Just so white man. Want Indian move along—move along. Can't go no farther, but he say, 'Move along.'"

Labouchere on England's Unpopularity. At the present moment England is probably more unpopular among foreign nations, including even our own kinsmen in the United States, than she has ever been before, and in my humble judgment our unpopularity was never better deserved.—London Truth.

HE MAY BE A CONGRESSMAN.

A Detroit Newsboy Appointed as a Page in the House.

One of the most interesting and praiseworthy appointments made by Doorkeeper Glenn of the house of representatives, whose personal staff consists of something like 200 employees, is that of Albert La Riviere of Detroit to be a page on the floor of the house. He was appointed on the recommendation of Representative Corlies of Detroit and was selected by the Newsboys' association of that city as their representative in congress.

When the news of Albert's appointment reached the boys, they held a rousing ratification meeting in Detroit, at which a letter was read from Corlies, the greasman, holding out to the successful boy the hope that he might become a great statesman some day, as other boys have who began as pages in the senate or house, and resolutions were adopted thanking the congressman and saying that Albert La Riviere was chosen because the boys thought him to be the most deserving one in the lot.

When leaving Detroit, he was escorted to the station by 149 newsboys, two brass bands and several leading citizens. Speeches were made by the citizens and the newsboys, and Albert, who was addressed about how to conduct himself in Washington, was obliged to mount the platform of the car and outline his policy with regard to public questions. All he could say was that he would be as good a representative of the newsboys of Detroit as he knew how to be. The new page was sworn into office the other day, and a hearty greeting was given him by the many other nimble footed boys who wait on the congressmen, all of whom think it is somewhat of a novelty for a newsboy to be transformed into a page.

He is a slightly built, bright faced boy, quite intelligent and hopes to succeed in getting into congress some day as a member. William Alden Smith, one of the new members of the Michigan delegation, was formerly a newsboy on the railroad for which he is now the general counsel. With Mr. Smith's example before him, Albert La Riviere thinks there is a good chance for him.—New York Sun.

NOVELTIES OF ELECTRICITY.

The Coming Swiss Exhibition Will Surpass All Others in This

The Swiss National exhibition, which begins at Geneva on May next and terminates on Oct. 15, bids fair, in the matter of interesting novelties, to surpass any national display made since the centennial. A full account of its scope is given by United States Consul Ridgely, at Geneva, in a report to the state department, and he says that Swiss residents in America are invited to make exhibits. Probably because Theodore Turrettin, mayor of Geneva and the most distinguished electrical engineer in Europe, is president of the exhibition the electrical exhibit will be the finest ever seen. The river Rhine supplies 12,000 horsepower, to be electricalized by transmitted five miles to the grounds. There will be a traveling footpath operated by electricity, traversing the great machinery hall; horseless cabs driven by electricity, appliances for aerial navigation, a multiplying valve pump, process for making paper and fabrics, tests of strength of metals by electricity and many other electrical appliances.

Professor Pietet will display his invention for producing intense cold and will exhibit the uses of this low temperature, such as in the purification of perfumes and chemicals, the cure of dyspepsia by a cold Turkish bath process, disinfecting and the production of an illuminating gas 80 times more powerful than ordinary coal gas.

Other features will be a Swiss village, an aquarium where the spectator is beneath the water and a Himalaya railway wherein travelers climb to the top of a great tower by means of a car running on a cable.

A WIDE AWAKE MAN.

David Jones Does Not Sleep for Weeks at a Time.

David Jones of Anderson, Ind., who attracted the attention of the medical profession two years ago by a sleepless spell of 93 days and last year by another spell which extended over 181 days, is beginning on another, which he fears will be more serious than the preceding ones. He was put on the circuit jury three weeks ago, and has not slept for 30 days and nights. He does not experience any bad effects whatever from the spell, nor did he during his 181 days. During that spell he attended to all of his farm business. He says now that he feels as though he never will sleep again.—St. Louis Globe-Democrat.

Senator Davis Getting Superstitions.

Senator Cushman K. Davis of Minnesota has reached the superstitions stage of his presidential boom. His literary bureau has been in active working order for some time past, and it was not until the Republican national committee fixed the date of the next convention that Senator Davis received his first ominous visitation. It turns out that he was born on the 16th of June, and, as the Republican convention is called to meet on that date, he firmly believes that the omen is a good one for him. In a good natured way he has told some of his friends that the fact of calling the convention to meet on his birthday is an indication to his advantage.—New York Sun.

Chafing Dish Outfit.

A chafing dish outfit includes the dish itself, with stand and lamp, a round tray upon which the whole arrangement stands, the alcohol siphon, whose long, curved spout permits the filling of the lamp without removing the blaze, a service dish with cover, all of polished nickel. Two spoons are also in the list, one large one, of nickel with ebony handle, a second smaller one of lacquered wood. Twelve dollars buys the outfit.—New York Times.

Good News.

Cashier—Have you heard, sir, that John Jones is a bankrupt?
Banker—Well, that's good news. We'll now get a little of what he owes us, whereas, if he had remained in business, we'd never have got a cent.—Fleegende Blatter.

The sheets of steel for penmaking are, in their original condition, 8 feet long and 8 feet wide. From these strips are cut wide enough to permit of the cutting of three or four pens.

A DYING SPARK.

Stop Right Now! Don't Light Another! You're Burning Your Brains.

WRECKS ALONG THE STREETSIDE.

Off-time tobacco's violent look at the dying spark in the cigar stump or at the big masticated "chaw" of tobacco just expectorated, many wild nerves nicotineized with tobacco, mentally resolve, "Now, that is my last, I will never use it again. I know that it is injuring me physically and financially and my nerves are becoming so irritated that I can't stand the least annoyance." What is the result? These good resolutions are generally made while the effect of the tobacco practically paralyzes the cravings of millions of irritated nerve centers to pass away these good resolutions and the nervous system caused by the education of the nerves to crave for the nicotine. Then there is the easy, permanent, natural way to relieve yourself of the use of tobacco? Certainly not by discontinuing it and suffering the nervous reaction and prostrating effects and mental degeneracy sure to follow the long and continued use of tobacco. Does it not suggest itself to you that the natural thing to do is to take a remedy that is specifically prepared to eradicate the effects of the nicotine in the system and to overcome the nerve craving effects and restore the tobacco irritated nerves to a normal and healthy condition? To this, we all say, "Yes, where is the remedy?" You will find it in No-To-Bac. This is easily said and we all naturally ask for proof. Certainly, if No-To-Bac is to cure, The Sterling Remedy Company, of New York, Montreal and Chicago have so much faith in their remedy, that they positively guarantee to refund the money, and the money being owned and operated by some of the most reputable business men of the east and west, it is absolutely reliable and we are glad to say, able in every way to live up to our guarantee.

The sale of No-To-Bac within the past few years has assumed enormous proportions, almost entirely developed upon its merits and the recommendations of the cured. So great is the sale that it is hardly possible to go into any leading drug store without finding it on sale, and the druggist has nothing but words of praise to give it.

"Do you call her complexion real?" "Be candidly, it has hardly a suggestion of the ideal seem to be in it. The complexion, fur, hermore, did not seem to be in it."

CONSUMPTION CURED.

AN ABSOLUTE REMEDY FOR ALL PULMONARY COMPLAINTS.

T. A. Slocum Offers to Send Two Bottles Free of His Remedy to Cure Consumption and All Lung Troubles—An Ellixir of Life.

Nothing could be fairer, more philanthropic or carry more joy in its wake than the offer of T. A. Slocum, M. D., of 183 Pearl street, New York City, to any reader who is suffering from lung trouble or consumption, also loss of flesh and all conditions of wasting. He invites those desirous of obtaining this remedy to send their express and postoffice address, and to receive in return the two bottles free, which will arrest the approach of death. Already this remedy, by its timely use, has permanently cured thousands of cases which were given up, and death was looked upon as an early visitor.

Knowing his remedy as he does, and being so profoundly positive in his beneficent results, Dr. Slocum considers it his religious duty, a duty which he owes to humanity, to donate his infallible remedy where it will assault the enemy in its citadel, and, by its inherent potency, to effect a cure of dissolution, bringing joy to homes over which the shadow of the grave has been gradually growing more strongly defined, causing food to be refused, and life to be a mere struggle for existence. The cheapness of the remedy—offered freely—apart from its inherent strength, is enough to commend it, and more so is the perfect confidence of the great chemist making the offer, who holds out life to those already becoming emaciated, and says: "Be cured."

The invitation is certainly worthy of the consideration of the afflicted, who, for years, have been taking nauseous nostrums without effect; who have ostracized themselves from home and friends to live in more salubrious climates, where the atmosphere is more congenial to weakened lungs, and who have fought against death with all the weapons and strength in their hands. There will be no mistake in sending for these free bottles—the mistake will be in passing the invitation by.

Mrs. Virginia Donaghe McClurg of Colorado, the well known lecturer, is visiting the east for the benefit of her son's health, which will probably obligate her to stay here for some months. Mrs. McClurg organized the first party, aside from government expenditures, which explored the ruins of the cliff dwellers in the south-west. For ten years she has made a specialty of these studies and explorations. Mrs. McClurg is not only an archaeologist, but a poet of merit and a warm advocate of equal suffrage.

Women as Sculptors. Clio Hinton Huncker, who has been awarded the \$10,000 prize for her statue of Fremont, says of St. Gaudens, whose pupil she is: "He believes in the future of women, especially as sculptors. I have frequently heard him say that the truest artists in his class are women, and that his principal object in taking the class is to afford women an opportunity to prove their genius."

WIND SWIFT. Were it not for the intervening mountain ranges, this country, from Northwest to Southwest, would at times in winter be swept by devastating tornadoes. Blizzards seem to arise out of the caves and caverns of the plains. Gaining strength and volume over a wide expanse, their force is arrested by the battlements of big hills. Sometimes they rise above the barriers of the plains, and sweep the Middle states with fury. There you enjoy one day a mean temperature, and the next may be far below freezing. It is like an ice water bath on a warm day, and the shock to muscles, nerves and circulation is the cause of sudden neuralgia and rheumatic attacks, both violent and acute. Those predisposed to facial rheumatism, however, should be careful. Such should have the matter cured. St. Sarsaparilla prevents the chronic stage, and in the chronic stage it is a prompt, sure cure.

"Hanno, what is classical music?" "Oh, don't you know? It's the kind that you have to like whether you like it or not."

NOTICE.

Drs. H. H. Green & Sons of Atlanta, Ga., are the greatest dropsy specialists in the world. Cure more patients than the entire army of physicians scattered over this beautiful land of ours. A valuable discovery outside any medical book or published opinion. A purely vegetable preparation. Remove all dropsical symptoms rapidly. Ten days' treatment mailed to every sufferer. See advertisement in other column.

HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Dr. H. H. Green's Catarrh Cure.

F. J. CHENEY & CO., Props., Toledo, O. We will under-stand, have a 100% cure for Catarrh of the bladder, kidneys, prostate gland, ureters, etc. We guarantee to cure you perfectly honorably in all business transactions and financially able to carry out any obligations made by their firm.

VERY AWKWARD INKED.

This is precisely the kind of mistake a man makes if he "turns out" on the wrong side of the road when a vehicle comes toward him. No doubt about it the error of the individual who takes drastic medicine to relieve his liver troubles is on the right side, and the road to his relief is Kestetter's Stomach Bitters, a medicine also adapted to the relief of dyspepsia, constipation, kidney and rheumatic ailments and malaria.

"None of your sars," as the boarder said when he refused the Worcestershire.
