Those persons who are engaged in fishing at this point are proving conclusively that there is money in the business at 4 cents a pound for salmon. Many hundreds of dollars are paid out here each month for fish, and had there been no interruption by high water and other causes, local fishermen would have been the means of several hundred dollars—yea, thousands of dollars, having been put into circulation in this vicinity this season.

Mr. D. P. Davis, a prominent livery man and merchant of Goshen, Va., has this to say on the subject of rheuma tism: "I take pleasure in recommending Chamberlain's Pain Balm for rheumatism, as I know from personal experience that it will do all that is claimed for it. A year ago this spring my brother was laid up in bed with

Sylvester Permoyer, mayor elect of Portland, says he will accept but half of the salary, which is \$5000 per year, of that office. Pencoyer is evidently on the point of making another of his famous "galley plays." He is a sly old fox, and can give his opponents cards and spades and beat them all getting votes. It's a pitty, though, that his present kindly feeling for the taxpayers' pocket books hadn't struck him while he was governor of the state.

No purely left handed race has yet been discovered, although it is said that fully 70 per cent of the inhab.

The city of Johnstown, Pa., which was overwhelmed by the waters of a broken dam May 31, 1889, engulfing several thousand people, is now a handsome and thriving place of 40,000 inhabitants, having added 10,000 to its population since that calamity. Johnstows lost 7 per cent of its cities is in the raging torent, and yet it is now one of the most prosperous cities of its size in the state. American pluck has always been found equal to every emergency.

Let Handed People.

No purely left handed race has yet been discovered, although it is said that fully 70 per cent of the inhabitants of Pendjab use the left hand in preference to the right. The next greatest per cent of left handedness is among the Hottentots of Africa had the Bushmen of Australia about 55 per cent. Dr. Marro says in left handed.—Exchange.

THE national convention will de-THE national convention will declare in emphatic language for the gold standard. They spoke of the free coinage of silver only on terms that could be agreed up by international agreement. Tariff is the paramount issue, according to the platform, and it is our opinion that tariff will be urged more particularly than any other question. If the campaign is made strictly upon a gold standard and high protective platform, then, and not until then, will we be able to tell just "where we are at."

It has come to our ears, but we cannot vouch for it being whole cloth, that a jug of applejack was taken to the polis of one of our rural precines on election day, and a large number of voters became quite hilarious before the day was ended. It is said that when the count was made, twenty ballots were found to be a little out of kalter. One voter, who had imbibed quite freely, when he attempted to mark his ballot found the job too different for him so he turned the back of the ballot and wrote, "Straight Democratic, be gob, and don't you forget it," and then signed his name thereto.

Just eighty years ago was the year sithout a summer. Frost occurred without a summer. Frost occurred every month in the year 1816. Ice formed half an inch thick in May, Snow fell to the depth of three inches in New York, and also in Massachusettes, in June. Ice was formed the thickness of a common window glass throughout New York on the 5th day of July. Indian corn was so frozen that the greater part of it was cut in August and dried for fodder, and the farmers supplied themselves from the corn produced in 1815 for the seeding of the spring of 1817.

"Minp your p's and q's, is an old time expression, but the following is well peppered with p's: Persons who patronize papers should pay promptly, for the pencuniary prospects of the press have a peculiar power of pushing forward public prospects. If the printer is paid promptly and his purse kept plethoric by prompt paying patrons, he puts his pen to the paper in peace, his paragraphs are more pointed, he paints his pictures of passing events in more perfect colors, and the perusal of his paper is more pleasing to the people. The official returns from Umatilla county show that out of 3473 votes cast for congressman, Northup received 386. There are thirty-three precincts in that county, and in three of those precincts he did get one vote. In six precincts he did get one vote in each, while the largest vote he received in any precinct was only 42.

The timber wealth of the United States gives a yearly product of over a billion dollars, or more than twice the value of the entire output of all the mines. Yet nowhere on earth is the wealth of the forests wasted more wantonly than in this country. Trees and forest are slashed down not only without consideration, but with something akin to contempt. lowed by the fatal effects of the toma-hawk. Two clergymen were riding on the elevated the other day. Said one of them, "What is the funniest experience you ever had in church?" "Well, answered the other, a twinkle coming into his eye, "if you mean with queer people, I think it was during the vacation I have just finished. This year I spent my holidays in a quaint little town up north. I preached for them one Sunday.

The West is bound to witness a big influx of immigration this fall. Cyclones and floods are becoming entire ly too numerous and devastating in the Eastern and Middle states, and the people will seek a place where their lives are not in hourly jeopardy from pranks of the elements. This would not be an inappropriate time for Columbia county to advertise her resources with a view to inducing people who command the vast fortunes of Eastern lucre to step westward and invest. Columbia county has inducements for investments which are of no small importance. We should have manufacturing established in contents of the same and the paper is more pointed in the flesh was a grass widow, agreesive from her head to her feet. Her nose stuck straight out threateningly, her hair bristled up from her forehead, she walked like a steam engine, and when she walked every loop of her bonnet ribbon shook. The very first sight of her to Uncle Lemmine was like the waying of a red flag to a bull. It happened that they went to the same church, but the ushers knew the situation well enough to have a goodly proportion of the sanctuary between them.

If the appearance of any one of them struck a brave favorably, he would join her, thus indicating his desire to become her hus band. Several of the dusky maidens received no such advances and seemed much wounded in pride and feelings.—Pendleton East Oregonian.

A friend tells me rather an amus ing little incident of the levee. He noticed close behind him a tall, stout man gorgeously attired in a volun-teer colonel's uniform, whose plainly discernible nervousness and heated countenance showed that he was new to such receptions. As my informant stepped forward to make his obeis ance to the prince his timid and weighty follower, from sheer anxiety to see "how it was done," gave a hig lurch forward and sent him staggering heavily into the arms of the heir apparent. A smile ran round the room, and the prince laughed andibly as he steadied himself from the shock of his unexpected burden. As for the unhappy cause of the contretemps, he was heared to murmur something about "begging his myal highnes
