

WEYLER'S HEAVY LOSS.

Two Thousand of His Men Killed in the Rabi Hills.

Chicago, Nov. 30.—The Tribune's special from Jacksonville, Fla., says: Colonel Jose Reyes, aid-de-camp of General Maceo, wounded and en route to New York for medical treatment, and with dispatches to the junta, passed through here yesterday. He says the fighting in the Rabi hills of Pinar del Rio was the most sanguinary battle of the war. He claims 2,000 of Weyler's men were killed in two days, and twice as many wounded.

Weyler went to the field with 35,000 men in three columns, one of 15,000 under himself; one of 15,000 under General Echague, and a third of 5,000 under General Munoz. They found Maceo entrenched in a crescent-shaped range of hills. When at the foot of the hills the Spaniards were met with a withering fire that cut gaps in their ranks. Maceo's men shot from behind rocks and trees, and gradually gave way before the Spaniards, who, encouraged by what they thought to be a victory, pursued them.

Suddenly a deafening explosion rent the air, and a scene followed somewhat like the mine horror at Petersburg during the late war. Horses and men were blown high in the air and fell to the earth dead and mangled. The dynamite mine was touched off by John Linn, formerly of this city, who is Maceo's electrician. Maceo then loosened his dynamite guns, prepared by Linn, and more havoc was wrought.

In the mine explosion, Colonel Reyes says, Weyler lost 700 men killed, and 800 more in charging, besides 1,600 wounded.

Next day, Maceo, knowing of the reserve force under Weyler, retreated to even a stronger position. Then he was attacked by the column under Echague, who was roundly thrashed and driven from the field, losing 800 men killed, besides 1,800 wounded.

Next day Maceo retreated again, maneuvering all the while to entrap Weyler into a field that had been honeycombed with dynamite. Meanwhile, however, General Weyler, hearing that there was danger of an uprising in Havana, because of his failure to crush Maceo, hastened back to that city.

Insurgent Leader Shot.

Havana, Nov. 30.—Antonio Lopez Coloma, formerly leader of the revolutionists in Matanzas, was shot this afternoon, having remained for 34 hours previously in a chapel, according to law.

It transpires that in the engagement fought in the Rabi hills, between the Spanish forces, under Captain-General Weyler, and the insurgents, under Maceo, the Spanish commander-in-chief and staff were without provisions for 36 hours. The train with supplies was detained. General Weyler urged the troops onward, regardless of the absence of the provision train.

Captain-General Weyler has issued orders to the farmers in the province of Pinar del Rio, Havana and Matanzas to carry their corn to the garrisoned towns, and the railroad officials have been instructed to provide farmers with cars and mules with which to facilitate the transportation. The corn will be sold to the soldiers of the Spanish column, and will be used for military purposes.

LEAVENWORTH IN ASHES.

Nearly All of the Business Part of the Town Burned.

Seattle, Nov. 30.—Nearly the entire business portion of the town of Leavenworth, headquarters of the Cascade division of the Great Northern railroad, was burned early this morning. Every house opposite the depot, with the exception of one small building, was destroyed. The names of the people in business who were burned out are as follows: J. M. Duffy, saloon; M. E. Blevell, same building; Frank Posey, barber; S. Silverstone, saloon; Mrs. H. A. Anderson, restaurant; John B. Jorke, general store; Jorke hotel; M. Donahue, saloon and one building; W. M. Cross, fruit and vegetable dealer.

The fire originated in the office of the Jorke hotel, and the lodgers had a narrow escape from cremation, nearly all escaping in their night-clothes. A cook, named Silverstone, and a brakeman, named Thomas Metzdorf, were severely burned about the head and face.

Leavenworth is located in the eastern slope of the Cascade mountains, and is a thriving little town of about 1,000 people, populated by railroad men and miners.

JOSEPH LEASEY'S DEATH.

Particulars of the Accident by Which He Lost His Life.

La Grande, Or., Nov. 30.—Particulars of the accident that caused the death of Joseph Leasey, on Fox Hill, last evening, are to the effect that he was bringing down a load of wood, which turned over upon him, causing death almost instantly. The accident was caused by the breaking of a lame strap on one of the horses. This left the weight of the load largely upon the other animal, and the wagon swung out of the track and ran against a stump, causing the load to upset. William Smith was driving ahead with another load, and when he discovered that something had gone wrong, he went back and found the unfortunate man crushed under the load.

Uprising in Chile.

Washington, Nov. 30.—An indefinite rumor has reached here of a revolution in Chile, but is discredited at the Chilean legation, where Minister Gana received a cablegram from the under minister of foreign affairs, giving the names of a cabinet list formed by President Errazuriz. The cable makes no reference to any disorders.

Tin is a comparatively expensive metal, being worth about \$400 a ton.

Wrelike Colombian Honor.

Panama, Colombia, Nov. 30.—Columbia will make a descent on Coro island, off the Mosquito coast, and take possession. It is proposed to land an armed force, raise the Colombian and haul down the Nicaraguan flag. Such are the prevailing reports here and in Colon.

Madrid, Nov. 30.—An official dispatch from Havana says that the Spanish gunboat Baraca has captured three boats laden with insurgent arms and ammunition in the Majari river, province of Santiago de Cuba.

FORTY YEARS AFTER.

Wandering Husband Returns Home With a Huge Fortune.

La Grange, Ind., Nov. 30.—A strange story has developed near Center, a little settlement in Steuben county, by the reuniting of husband and wife after forty years' separation. William Weidner disappeared from St. Joseph county, Mich., then his home, in 1856. His wife did not give up hope of his return until 1894, when a letter alleged to have been written by her husband on his dying bed solved the mystery. The letter came from Los Angeles, Cal., where Mrs. Weidner believed her husband died. Mrs. Weidner donned widow's weeds and mourned her husband as dead. She subsequently married John Tompkins, and to this union six children were born.

Yesterday Weidner returned to find his family, little believing that his wife was alive. He found in gray-headed Mrs. Tompkins the bride of his youth, and as husband and wife they will live together again. Weidner went to the coast to speculate, and several fortunate business ventures have given him possession of a comfortable fortune.

The theory is advanced that the letters sent Mrs. Weidner were part of a conspiracy to murder Weidner at the time, as he was the owner of several valuable mining claims.

SAN BENITO SURVIVORS.

Landed in San Francisco, They Cheer Their Rescuers.

San Francisco, Nov. 30.—When the thirty-seven survivors of the crew of the wrecked collier San Benito were landed at Mission street wharf by the steamer Point Arena between 9 and 4 o'clock this morning, the poor fellows were still shivering from the thorough chilling they received while clinging to the rigging so many hours waiting to be saved. As they climbed on the dock, they gathered in a group, of which Captain Smith was the center, and gave a succession of rousing cheers for the crew of the Point Arena. Then the shipwrecked men quickly scattered to their homes, most of them having families.

Many of the San Benito's men were pitiable pictures as they landed. As a rule they had more to say in praise of their rescuers than of their own sufferings. One and all landed Mate Louis Olsen, of the Point Arena, to the skies, and were full of praise for Peter Anderson, Andrew Lilleland and Arxel Henriksen, who, with Olsen in charge, manned the first boat that approached the wreck to rescue the men hanging to the rigging for life.

A BROKEN HEART.

Loss of Eyesight Caused a Young Woman's Death.

Chicago, Nov. 30.—Anna E. Clark died of a broken heart, actually and physically a broken heart. She died suddenly in Chicago and her remains were taken to her Cleveland home for interment. From that city comes information to the effect that a physician examined the body, and asked if Miss Clark had recently suffered any great sorrow or shock. He was told that she had been informed that total blindness was near and inevitable. The physician said there was a heart lesion, and that one of the few authentic recorded deaths from a heart broken by sorrow was hers.

Two weeks ago Miss Clark went the daily round of her duties, and then, owing to some slight trouble, she was supposed, with her eyesight, she visited an oculist. He told her that the loss of her eyesight might be the question of but a few hours. This was Saturday. Sunday afternoon Miss Clark returned to her residence from a walk. She entered the door, and some one spoke to her. She turned and said: "I hear your voice, but I cannot see you." Her own voice was a bit broken as she spoke, but the significance of what she said was not felt by those about her. The next morning she was dead.

SUNK IN SHOAL WATER.

Accident to a Steamer With a Fishing Club.

New York, Nov. 30.—The side-wheel steamer John E. Moore, with the Clinton Fishing Club on board, sunk on the Elbow of Romer shoals, at 12:20 o'clock today. All her passengers were rescued. There were no women aboard, and there was no excitement. Only the lower deck of the boat was submerged, the upper deck, both fore and aft, being above surface. The fishing party, consisting of 120 men, started on the Moore at 9 o'clock for the fishing banks. The boat struck either a sunken wreck or a rock, and sank in five minutes. Several of the passengers were wet up to the waists before they could scramble to the upper deck. A heavy fog was on at the time, which caused Captain Samuel Morrell to lose his bearings. All of the Moore's passengers were transferred to the pilot boat Walter H. Adams in small boats.

A Bloodless Duel.

London, Nov. 30.—A special from Paris says a duel with pistols was fought near that city on Sunday last between the Marquis de Montmore and J. A. Hutchinson, an American resident. Six shots are said to have been exchanged at twenty-five paces, with no results.

New York, Nov. 30.—Walter L. Rhns, a 16-year-old boy, who resided with his parents in Brooklyn, was killed in a game of football at the Pardee grounds this afternoon. He was a member of the Brooklyn boys' high school team and the Seneca football team. The lad was tackled and thrown heavily to the ground. When he arose, he was hardly able to stand, and fell again almost immediately. He died soon after from an internal hemorrhage.

Fatal Bicycle Accident.

New Orleans, Nov. 30.—Robert Kennedy, manager for Thomas Lynch, while attempting to cross Tulare avenue, at the start of the bicycle road races, was knocked down by a wheel ridden by A. Orr. Kennedy's skull was fractured. He was taken to Charity hospital, and died a few minutes afterward. Orr was badly shaken up, but not seriously injured.

In bumping around a man strikes many a trail that he recognizes. Never steal your neighbor's good name, even if yours is worn out.

FREE SILVER.

The coinage of silver might have been too free, but the free use of it in a small sum may be a very big investment with very sure and large profits. What it costs to buy a bottle of St. Jacobs Oil for the cure of rheumatism is within the reach of the poorest. It is the best investment in this line—best cure, and the profits are sure, because it will surely cure. This is so well known it is almost a maxim, and so much good is wrought out of the free use of a little that a strong, active workman can be made out of a man who before may have been a helpless invalid or a hobbling cripple.

Napoleon's Will.

His will displays his qualities in their entirety. The language sounds simple and sincere; there is a hidden meaning in almost every line. His religion had been, at best, that of a deist; at the last he professed a piety which he never felt or practiced. During his life France had been loved and used as a skillful artificer uses his tool; the last word of his testament suggest a passionate devotion. To his son he recommended the "love of right, which alone can incite to the performance of great deeds;" for his faithless wife he expressed the tenderest sentiments, and probably felt them. It was his hope that the English people would avenge itself on the English oligarchy, and that France would forgive the traitors who betrayed her—Marmont, Angereau, Talleyrand, and Lafayette—as he forgave them. Louis he pardoned in the same spirit for the "ill published in 1820; it is full of falsehoods and falsified documents." The blame for England's murder he took to himself. The second portion of the document is a series of magnificent sounding bequests, disposing of his supposititious private fortune, estimated by him at 200,000,000 francs, to a list of legatees, which includes every one who had done the legator any important service since his earliest childhood. In codicil he remembers one Cautilion, who had undergone trial for an alleged attempt to assassinate Wellington. "Cautilion had as much right to assassinate that oligarchy as he (Wellington) to send me to the rock of St. Helena to perish there."—Century.

A Good Showing.

What a Reporter Learned About a Certain Medicine.

From the Journal, Minneapolis, Minn. There is one proprietary medicine in use in this city, the name of which has become a household word and that is the preparation known as "Pink Pills for Pale People." Shakespeare said, "a rose by any other name would smell as sweet." That may be so, but pills put up by any other name would not have the same attraction nor popular sales that Pink Pills have in Spokane, Wash.

A representative of the Minneapolis Journal started out the other day to investigate the merits of this popular and widely-sold household medicine. The evidence was on every hand. Hamilton B. Merrill, a young money lender of Spokane, was seen by the newspaper man. Mr. Merrill made no secret of his remarkable cure by these little pellets.

"Do I know the efficacy of Pink Pills?" he reiterated. "I should rather think I do, they have been a blessing to me. I am not in the habit of praising proprietary medicine, but I must say that Pink Pills as far as my case goes have no equal in the world. A little over a year ago I began ailing and commenced to lose flesh rapidly; the doctor told me to stop smoking; this I did, but the result was even worse. My heart beats decreased to less than forty a minute. I was prescribed for by my doctor, but without receiving any benefit whatever. I continued daily to grow worse and my parents became alarmed over my condition. Some one suggested Pink Pills; I thought I would try them anyway. And tell you I cannot endorse them too highly; they worked like a charm in my case. My heart soon became normal again, my flesh increased and I felt like a new man. To tell you the truth I am still taking them. I have a sort of fondness for them yet and I am loath to give them up."

"I know of a young lady living in this city, whose condition was even worse than mine, she took Pink Pills and is one of society's gayest young ladies now. I wish I were at liberty to give her name, as I am sure she would only be too delighted to give them a hearty send off. I believe Pink Pills cannot be too highly recommended. They are gems, indeed."

Mr. Merrill is a young man of 22 or 23 years of age and today is the pink of health. He has a splendid complexion and would be the last person to be taken for one who has been so seriously ill only a few months ago. He is a splendid athlete besides and moves in the best circles of society here.

Dr. Williams' Pink Pills contain, in a condensed form, all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are an unfailing specific for such diseases as locomotor ataxia, partial paralysis, St. Vitus' dance, nervousness, neuralgia, rheumatism, nervous headache, the after effect of the grippe, palpitation of the heart, pale and sallow complexions, all forms of weakness either in male or female. Pink Pills are sold by all dealers, or will be sent post paid on receipt of price, 50 cents a box, or six boxes for \$2.50, by addressing Dr. Williams' Medicine Company, Schenectady, N. Y.

The war department estimates for the next fiscal year aggregate \$2,875,588.

No one would drink poor tea if he or she knew the difference in tea.

Good tea is not costly. Your grocer will sell you Schilling's Best, and return your money in full if you don't like it.

A Schilling & Company San Francisco

OUT WITH OLD NOSTRILS.

Try Paine's Celery Compound, the Most Advanced Remedy That Science Can Give.

MRS. R. R. PRATT.

There are very intelligent men and women who still prefer open fires to steam pipes and furnaces.

But only a very shallow-minded person would deliberately choose an old-fashioned remedy in case of sickness.

Sufferers from neuralgia, rheumatism or kidney trouble want the surest and most advanced remedy science can give them. Getting well is not a matter of sentiment, but the most seriously practical matter. That is why the most thoughtful and conservative people now use Paine's celery compound, and recommend it to friends and relatives who are threatened or afflicted with nervous exhaustion, sleeplessness, disordered liver or blood diseases.

That wonderfully acute and patient investigator, Prof. Edward E. Phelps, M. D., LL. D., of Dartmouth college, embodied in Paine's celery compound the most progressive, yet thoroughly established, views on the cure of diseases of nervous origin.

All of the imitators of Paine's celery compound—every one knows how many there are—have proved to be entirely wide of the mark. Their promises of astonishing curative abilities are easily made on paper; but they are not kept.

It is easy to verify every claim made by Paine's celery compound. There is no village so small but it contains families in which this wonderful remedy has made some member well. Men who weigh their words and are careful what they write about their signatures have publicly given this great invigorator its deserved credit for health-making powers such as no other remedy ever received.

That Paine's celery compound certainly cures such diseases as neuralgia, sleeplessness and dyspepsia does not admit of a doubt. It builds up the entire nervous system, plumps out the tissues, starts the blood into healthy circulation and regulates the action of the nerves. It makes people well, strong and energetic. Mrs. R. R. Pratt of Center Brook, Conn., whose portrait is given here, says plainly:

"I find Paine's celery compound a perfect medicine. I took several bottles for general debility, and it did for me all I could ask. It made me well. I have recommended it to my friends, and they all speak in its praise."

Paine's celery compound is the most assured and direct means of getting back a full store of vitality. It is a true nerve regulator. It exterminates all vicious humors that linger in the blood. It cures rheumatism, and is used by physicians as a specific for this disease. Says Mrs. W. R. Johnson of Cape Roxier, Me.:

"I was attacked with rheumatic nervous system, plumps out the tissues, starts the blood into healthy circulation and regulates the action of the nerves. It makes people well, strong and energetic. Mrs. R. R. Pratt of Center Brook, Conn., whose portrait is given here, says plainly:
