Saunte Acts on Cleveland's Forestry

Washington, May 8.—The senate to-day agreed to an amendment to the civil-service hill revoking the order of President Cleveland made on February 32 last, establishing forest reservations aggregating 17,000,000 acres. The de-bate brought out much criticism of Mr. Cleveland's order, Senators Pettigrew, Wilson, Turner, Rawlins and White mesking agginst it.

Wilson, Turner, Rawlins and White speaking against it.
Gray of Delaware defended the course of the president, pointing out that it was the result of an inquiry authorized by congress and conducted by the National Academy of Sciences.
Allison endeavored to have the amendment restricted so as to leave the question of respection to the president.

amendment restricted so as to leave the question of revocation to the president, but he was defeated on an aye and no vote, 14 to 32. Gorman made a point of order against the amendment, but this being submitted to the senate, was defeated, 23 to 25. The amendment was then agreed to without division.

Another amendment agreed to provides for a continuance of the investigation of the condition of the fur seals in Behring sea.

The sundry civil bill was passed late

The sundry civil bill was pass the day. It carries aggregates of

During the day Bacon of Georgia inroduced a joint resolution deprecating war, and announcing the policy of the government in favor of arbitration. The resolution was referred to the com-mittee on foreign relations.

Denver, May 10.—A special to the Republican from Cheyenne, Wyo., says: An attempt was made this morning by unknown persons to wreck the incoming Cheyenne & Northern passenger train by misplacing a switch in the yards at the northern entrance to the city. Owing to the fact that the to the city. Owing to the fact that the train was running slowly, no damage was done derailing the locomotive. The anthorities discovered tonight that the parties who attempted to wreck the train are several Union Pacific brakemen, one of whom made a full confession of the affair to City Attorney kons. The switch was turned with expectation that the Cheyenne & Borthern employes would be blamed for it and discharged, and extra Union Pacific men would be given work in their places. Warrants were issued ted, and they will be arrested to

Cuban Sympathiners Arrested. Cuban Sympathisers Arrested.

City of Mexico, May 10.—A sensational arrest was made today of the entire editorial staff of the paper called El Continente Americano, which is the organ of the Mexican sympathizers with the Cuban insurgents, at the instigation of the Duke of Arcos, the Spanish minister, who complains that the paper has insulted a friendly nation. The editors are young Mexican students, and popular sympathy is dents, and popular sympathy is th them. The arrest is causing ach comment, but it could not be helped, as the Spanish minister pre-sented a formal complaint, and under the law, action had to be taken. The ne is watched with great interest. The insurgents have engaged the best legal talent to defend the young ed-

The Treasurer Drowned Himself New Bedford, Mass., May 10.-William D. Howland, treasurer of the How-land mills, and the New Bedford Manufacturing Company, was found this morning in the dock at the foot of North street. The corporations with which Howland is connected are in the hands of receivers as the result of the discovery of an unsuspected financial entanglement recently by stockholders

Had Trouble With the Machinery.

Vancouver, B. C., May 10.—A young man named Harvey Kinsman committed suicide by shooting this afternoon, at Ladner's landing on the Fraser riv-e; twelve miles from New Westminster. He was 24 years of age, and was employed at the Wellington farm ereamery. The only reason for the deed, as far as known, is that he had had some trouble with the machinery at the creamery.

Oregon to Come Out of Dock. Seattle, Wash., May 10.—The battleship Oregon will come out of the Port Orehard dock tonight or tomorrow night. It will probably be two months before the repairs can be made to the ship, and the officers determined it uld be better for the Oregon to be in water in the meantime, owing to the strain the ship would be subjected to during so long a stay in the dock.

Takes Otls' Command. Washington, May 10.—Orders have been issued by the war department, as-signing General Shafter to the compand of the department of the Columbia, headquarters at Vancouver bar-racks, transferring General Otis to the mand of the department of Colorado, with headquarters at Denver. Colonel Merriam, now at Denver, will assume command upon General Whea-ton's retirement until Otis' arrival. Colonel Anderson, at Vancouver bar-racks, will be in command until Shaf-

Northern papers are just awakening to the fact that Mississippi is fattening a few cattle for the Chicago markets.

A Sunstroke in Chicago. Chicago, May 10.—The first case of prostration from heat this season occurred today. Charles Wilson, a milkwagen driver, fell to the street unconscious. He was removed to a hospital. The weather bureau thermometer regis-tered 80 degrees during the day. On the streets in the business part of town, it was from three to five degrees warmer.

Durham, May 10.-Eleven men were drowned through the inflow of water into the Kelloe colliery.

A Washington Airship, Spokane, Wash , May 10.—Citizens of Barble, Wash., a small town on the Spokane Falls & Northern railroad, ear Northport, stoutly assert that yesterday they saw a flying machine in broad daylight cross over the valley and disappear to the north. They state they could distinguish the fans or propellers, and that the whole machine was clearly outlined against the hori-

The slow demand from abroad for our wheat is especially discouraging, as the inquiry is below anything figured early in the season, on this side of the Atlantic or on the other other. When the figures of total production were first compiled the only question that agitated speculators was the problem of how the world was going to get along with so light supply, without prices with so light supply, without prices advancing to a point that would turn enough consumption to substitutes for wheat, to make the less quantity of it do for the whole crop year. Most people thought then that nothing short of 900 to \$1 a bushel would do it. There is where the mistake seems to lie. About 75c in the primary markets turned away enough wheat bread eaters About 75c in the primary markets unable to do any work. To this the turned away enough wheat bread eaters to substitutes to lengthen sufficiently the supply, for all practical purposes. Even at the moderate prices prevailing this country's foreign shipone year and six months ago he read in 18c are particularly attractive to the practicial economist who supplies the family table, in these times, when so many are idle or in a state bordering upon idleness. The official wheat yield in this country was something of a case of the property of the payor of the property o

struck pay ore, and will have a mine instead of a well.

Gladness Comes

Gladness Comes
With a better understanding of the transient nature of the many physical ills, which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge, that so many forms of sickness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs, promptly removes. That is why it is the only remedy with millions of families, and is every where esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness without debilitating the organs on which it acts. It is therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only and sold by all reputable druggists.

If in the enjoyment of good health, and the system is regular, laxatives or other remedies are then not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, one should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely

BUYING FARM LAND.

DON'T BE TEMPTED TO BUY TOO MUCH.

Prevailing Toudency Is to Buy Mor than Can Be Cultivated, and the Farmer Takes on a Mortgage that

A great many men when they set out to buy a farm are tempted to buy three, six or nine times as much land as they can handle. They want a quarter sec-tion for each member of the family or they want to play off as a farmer on a mammoth scale. To carry out his plans he has only half as much money as he needs, and he borrows enough to carry him through with the purchase at least. He at once comes under morigage for half the value of the land he has bought. He begins in the new country at the bottom, has no money to improve with or to pay hired help with. flounders in a desperate way until the end comes. He has no money to buy fuel for the cold weather season, and in case of a general failure of the crops ne has no money to buy grain or other feed to carry his stock through the win-ter. We know of cases out West where men are land poor. They own sections of land-tracts so large that they can-not work them. It is choice land as need be, but they cannot sell it. They are tied to it. We know of another case where a man had a strong notion of be coming the largest land owner in the world. He bought land until his boundary lines were counted by miles length. Then he went to farming. He bought all the improved patent farm implements that were known, and left the most of them out of doors the year round. This kind of farming resulted just as such farming always will result. Huge fields of corn left to go into the winter unhusked, the regular fall

spectable figure as farmers, and they buy a half section or a section of land may pay for the whole or go in debt for a part of the purchase money. The more land than he can work. He can not more than about half farm the land has undertaken to work. He cannot keep down the weeds nor properly fer-tilize his ground. The hiring of help as wanted is very uncertain, these days

especially,
A speculator buys 8,000 or 10,000 acres of land in a good locality. He is interested in having settlements made as fast around his purchase as possible He has bought with the calculation that the settlement of the country will make him a fortune. The speculator's land is usually offered at a strong advance on the price originally paid for it, but on long-time payments, bearing a healthy rate of interest. In this way good many farmers have been drawn into trouble and some speculators have made money. It is, however, the policy have all lands sold in small holdings

A man going into a new part of the country to buy a farm should make his calculation to buy just as much land as he can pay for and have enough money left to improve the purchase with. He should have buildings of the right size and for all purposes, and should have fencing of the right kind, so stock could neither break in upon him nor break ery farmer should have a bank account of \$300 to \$500, which is far better than to have a mortgage to nurse from year to year. How much anxiety and trou-

which has been entered, exclusive of Alaska, is 600,000,000 acres. Of course, whatever the amount is, the estimate takes in mountain, hill and dale, sand, plain and every kind of worthless, unproductive land. It will yet be a long time before all the land that is really desirable is taken up and put to prac-tical use. The Indian reservations, when they come into market, sell quick-iy, and they are all choice land.—Rural

Dwarf Pears.

There is one great advantage of dwarf trees over standard. They come into bearing earlier. A dwarf pear, for instance, is produced by budding on a quince stock and matures sooner than if on a pear stock. Dwarf trees should be pruned at the top, otherwise they are liable to fall over. More trees can be planted on given space than of stan-dard size, but of course each tree will not bear as profusely. The yield is nearly the same per acre for both. They are in high favor with many, because pruning, thinning, spraying and gathering fruit can be done so much more easily from small trees than from high ones.-Fruit Garden

Pattening Calves.

The first question which a butcher asks about a calf offered for the shambles is how it has been fed. If it has peen allowed to suckle the cow, the calf is in his opinion all right, and will dress as well as it looks. But this depending on suckling, though good for the calf, helps to dry up the cow, and to make her uneasy when the calf is taken from her. The advantage of the suckling process is that the calf gets its food slowly, and always warm. The slowness with which the calf gets the milk, and the muscular effort of the mouth required to get it, mixes more saliva with the nutrition and insures petter digestion. But the owner of the cow may properly insist that the calf shall not run with its dam, suckling a ittle every hour or two. Give it two minutes milk the richest part of the in England, and came to us from milk, the strippings, into a pail. It is France. Prynne ("Animadversions," udder all that the human hard. do. It is this retention of the strippings in the udder that tends to dry cows so quickly when their calves suckle them.—Exchange.

Buying Sweet Potato Feta. Most nurserymen and seedsmen are glad to furnish sweet potato sets for planting. They can do it, too, more cheaply than the average farmer who has no greenhouse can do it for himself. More sweet potatoes ought to be grown

day, with probability of rain, the sets will get rooted in a few hours and before the ten wilts. The home supply of

sweet potatoes can as easily be grown by farmers as ordinary potatoes, ex-cept that it is cheaper and better to buy the sets each year, as it is very difficult to keep the seed through the win ter until planting time. Those who have greenhouses divide the seed in winter, and may multiply the sets several times over from each eye before spring. It is this multiplication of sets from single eyes that makes it possible to sell aweet potato sets so cheaply.— American Cultivator.

Pekin Ducks and Water.
The Pekin duck is a very valuable variety, but it has the reputation of not being hardy. If left to awim all they will in cold weather, the fowls wil stiffen and become helpless. We lone ago learned that this variety needed

less water than any other, and will do well if only occasionally on warm days allowed sufficient water to bathe and wash themselves in. If kept from water the Pekin duck is a valuable variety, being very prolific and matur

Sabsoiling for Orchards In setting out trees of any kind it i best not merely to make a wide, deep hole, but to thoroughly subsoil all the land that the tree roots are expected to occupy. If this is done there will be much less injury from dry weather the first summer, as the subsolied earth makes the best reservoir for water in time of need. This subsoling is im-portant for land to be planted with nursery stock, and is commonly practiced by the most successful growers.

The large, coarse varieties of carrots most used for stock feeding are not so nutritious as is the shorthorn, which grows most of its bulk near the surface or slightly above it. As the shorthorn carrot can grow more thickly in the row, it is nearly as productive as the deeper setting varieties, and it is also that the eye travels about 6,000 fe more easily harvested. Five to six hundred bushels of the shorthorn car wonder the eye gets tired. rot may be grown per acre. This is a paying crop at the usual price of this

Peas for Poor Soils.

There is no better way to fertilize poor land than to sow it with peas, using phosphate of lime to furnish the mineral fertility that this crop requires to perfect the seed. It is not nitrogen which the pea crop most needs other than what the pea roots supply by dis-integrating air in the soil and liberating its nitrogen. But to form the grain both lime and phosphate are re-quired. With these supplied the soil will grow richer every year.

To be effective mineral manures spring and summer crops must be apspring rains to dissolve the fertilizer so that the plant roots can make use of it. Besides, as weather and soil be come warm and dry there is less need of the fertilizer, as the soil itself releases more of its own fertility under such conditions,

The roller is indispensable for preparing onion ground either for seed or sets. That with a shallow cultivation to the depth of two inches will make a better seed bed than will deeper tillage.
If the soil is made friable deep down
the onion may grow large, but it will
likely be thick necked and grow a crop

Gooseberry Culture.

I have the best success with gooseeeries that are not cultivated. I use hard and soft coal ashes and cinders as a mulch and find that the bushes I 25; light and feeders, \$2.50@3.00; ressed \$4.50@5.25 per cwt.

Leghorns and black Spanish lay eggs with the whitest shells of any breed. Scald and allow them to stand over night in a place where they will not freeze; this is one of the best ways of feeding oats to poultry.

It is natural for some breeds of poul try to moult lighter each year, and hence what are often taken for defects are only natural to the breed.—St. Louis Republic

It should here be explained that the title of "Admiral" was not used in England in the earlier days, says the London Nautical Magazine. In fact, the better opinion is that it was not so used before the beginning of the fourteenth century. He was called Capitaneus Maris (Captain of the Sea), "Keeper of the seacoasts," "Captain of the King's mariners." The title "Admiral" or "Amiral," probably derived from the and an Admiralty Court in England as early as the time of Henry I., derived from our ancient Saxon kings—Alfred, Edgar, Ethelred and others who had the dominion of the British ocean. None of these kings probably was more potent that King Edgar, who, possessing an absolute dominion of the neigh-boring sea, sailed round about it every year and secured it with a constant guard. These ships being very stout ones, were in number 1,200; some writ ers even affirm that there were 4,800

by Northern farmers. They need a warm, rich soil. By selecting a cloudy People are like silver-plated knives DON'T TRUST IT.

Because the weather is mild and the air almy we cannot count on being rid of neumatism or neuralgia. The very sudlen changes of temperature or exposure draughts are both likely to increase rather than diminish both complaints. For this reason it is wise at this season to be well prepared for sudden attacks, and to have ready what is known as the best remedy for all visitations of aches or pains. All well regulated households ought to have a nook or corner for a bottle of St. Jacobs Oil. There are other reasons also why this Master-ture should be kept at hand; rheumatism and uturalgis are chronic, sente or in lammatory, but to whatever degree of suffering they may come, the old reliable cure is the best for treatment and the surest to give permanent relief.

The wild tribes of the Caucasus Russia, teach their children the use of the dagger as soon as the youngsters are able to walk. They are first taught to stab water without making a splush.

Is your back weak? Have you Rheumatism or Kidney Trou-bie? Try Sanden's Electric Belt

All other means have failed, but the thousands who have told of their cures by Dr. Sandon's Electric Beit give evidence that after everything else has been tried without results, the famous Beit will cure if a cure is possible. It has great electric power, is warranted to last one year, and is applied by a regular practicing physician. Those who use it have the benent of Dr. Sanden's knowledge free of charge.

HERE IS A LATE CURE.

After suffering tortures from rheumatism, lame back and weak kidneys, I was induced to try your belt, and I would not give it up now for \$50 if I could not get another. My troubles had annoyed me for years, and my back was so weak I could not lift twenty-live pounds. The belt knocked the pain out in six weeks and the rheumatism in three, and I have not felt a return of either since then. I laughed at the idea when a friend of mine told me your belt would cure me, but I am changed now, and am talking for myself.—E. J. Burke, S. F., Cal., April 27. We have Thousands of Testimonials like the above at our offices.

A BOOK, "THREE CLASSES OF MEN." FREE and contains valuable information to illustrated, and price-list and particulars about beits.
