NEARLY ALL UNDER WATER.—Very little of Sauvies island is out of water. There is a narrow strip along the banks of the Columbia at and near Reeders that has not been submerged and upon which a few head of stock are yet seen, but the greater part of the island has been under water for some days and nearly all the stock were moved to the mainland some time ago.

LONG TRIP FOR CHILDREN.—Two little girls, Nora and Bertie Winstone, ages 7 and 10 years, who have been stopping at Espy's in this city for some time, started for Newburgh, N. Y., last Wednesday. Their father lives at the point of their destination which will be reached via the Northern Pacific, Seattle & Lake Shore, Canadian Pacific, New York Central and West Shore railroads. The trip is a long one for such small children, but with the instructions sent with them their safe arrival is predicted.

COAL AT RAINIER.—Captain Newsome has discovered a coal lead on his place at Rainier which he believes will develop into something profitable. The vein at the surface is about one foot in diameter, and it is the intention to develop it in the near future sufficiently to test its extent. The coal taken from the cropping, it is said, burns well in the stove. It is believed that a good quality of coal exists in this county, and it may be that the first substantial development will be made at Rainier; who knows?

NEW LOGGING ROAD.—Mr. J. H. Peterson, for a long time connected with the Western Lumber Company, of Portland, has arrangements all completed to put in a steam logging plant tapping Beaver valley. The road will be about seven miles in length reaching the Columbia river at Banzer's place below Rainier. The track will be laid of 56 pound steel rails and the road when completed will tap a large body of fine timber on South Beaver. Meserve Bros. have a contract for building 2½ miles of the road.

A HOME ARGUMENT.—The Roseburg Review gives the following timely advice to the people of that section, which will apply to the people of this section equally as well, if not more so: "Patronize your home merchants—they spend their money here. As long as our gentlemen wear Chicago made clothes and the ladies wear Portland dresses, there will always be complaints about hard times. Rest assured that, if you give your home buisness men proper encouragement, competition will force prices down to the plane of legitimate profits if they are in some lines to high at present."

SNOW GONE FROM MOUNTAINS.—Passengers who reached Portland last Saturday over the Great Northern and Canadian Pacific railways bring the reassuring intelligence that the snow is practically gone from the mountains, and that the streams feeding the Columbia are falling. One passenger who took particular note of the state of the rivers and the volume of snow says that the Kootenai had fallen at least five feet, the Fend d'Oreille from 1½ to 2 feet, and that the high water in the Spokane was subsiding. The peaks, of course, are still covered with snow, but otherwise there is not a great deal left to feed the streams.

ONE DOLLAR BILLS RAISED.—Harry McLeod, arrested Friday evening by Detective Maher for uttering "raised" bills, has apparently been active in the profitable work of increasing $1 to $10, says Sunday's Oregonian. Yesterday two additional cases were reported that bear close resemblance to the other work McLeod is charged with having done. A $10 bill was discovered in the receipts of a saloon on Third and Burnside streets yesterday, which plainly had been enlarged. The figures on the face were fairly executed, but the lettering on the back was altered in a careless manner. Kendall's saloon, on Fourth and Davis, also reported that one of the $10 bills had been passed there. The alteration of this one was much nicer, and better calculated to deceive. It is possible that many of them are in circulation, and the public would do well to inspect carefully every $10 bill received. Most of the work discovered so far has been very neat, and so accurate as to require close inspection to see the alteration. If any more of the bills are in circulation, the police would like to hear from them soon.

DECORATION DAY.—Decoration day was observed here last Saturday by appropriate exercises at the opera house in the evening. The general music of the evening was furnished by a choir of fifteen voices with Mrs. C. H. Piggott at the organ, assisted by the large audience assembled. Addresses were made by Rev. C. E. Philbrook, Hon. T. J. Cleeton, Mrs. W. F. Timmons and Mr. A. Davis, the latter having served with the Army of the Tennessee throughout the civil war. The speakers portrayed clearly the causes which led up to the great civil strife and the privations attendant thereon which were endured that the union might be preserved. The solo, "The Last Roll Call," and the recitation, "The Blue and the Gray," by Miss Longacre, were perhaps the most enjoyable events of the evening, though the rendition by the ladies' quartette of Scappoose, was much appreciated by all. Before singing "Marching Through Georgia" by the choir a request was made that all those present who had participated in that event would rise, and strange to say there were three veterans in this one comparatively small audience who had been with Sherman on his famous march. They were Alexander McCauley, Judge D. J. Switzer and Joseph Hayburn. The recitations by the Misses Winnie Way and Anna George were good. A noticeable feature of the occasion was the presence of so many veterans occupying front seats, all of whom seemed to fully enjoy the services. The exercises were brought to a close by singing "America," led by the choir.

We have been requested to announce that a meeting will be held at the court house this (Friday) evening for the purpose of discussing a plan for celebrating the coming Fourth in St. Helens. A good attendance is desired.

L. R. Burnham was able to march to the cemetery for decoration exercises.

A family by the name of Anderson is moving into town this week. It is getting difficult to get a suitable vacant house in this city now, and a little investment in comfortable tenement houses might prove advantageous as well as convenient.

Willie Merrill's inventive genius is displayed in a steering apparatus he has fixed on a little wagon. By turning a little wheel he can guide the wagon quite skilfully and have as much sport out of it in going down hill as if it were a sled in winter time.

Tuesday seemed a day of camp accidents. During the forenoon Gus Enstrom came in from the Irwin camp with his hand cut by a cross-cut saw. Later in the day Rudolph Karth, from Kent's camp, was in to have a cut on his leg from an axe, dressed, and afterward Frank Clark, from Colvin's camp, had a cut on his wrist attended to.

Another unfortunate conflagration deprived Elliott Wood and family of a home Saturday morning about 3 o'clock. The family was suddenly aroused to find their house burning from the kitchen portion, and got out hastily, saving very little. The fire comes hard on Elliott, who had a similar experience once before, and recently had the misfortue to lose a hand in Bryant's mill. With the help of some of his friends, however, he will soon have another building up, and will continue the battle of life.

The exercises of Memorial day were held on Sunday afternoon in order that a larger number of persons could take part. The threatening condition of the weather changed the plan of having all the exercises at the cemetery, and at 2 p. m. the church doors were thrown open and the seats filled by respectful and reverent listeners, who gave close attention to the exercises. A vocal selection by the choir was followed by prayer from the pastor, after which the audience joined in singing America. Dr. Hall, in a few remarks to his fellow comrades introduced Hon. T. J. Cleeton as the orator of the day. Mr. Cleeton rose and delivered a masterly and eloquent address, including lessons of patriotism, love for the flag of our country and respect for all its institutions and its laws, such an address as is needed these days to combat the anarchistic teachings in various quarters. He paid a glowing tribute to the soldiers of the late war, and acknowledged the obligation the nation was under to them for their services. At the conclusion of the address, which was listened to very attentively throughout, the announcement was made that following a selection by the City band the line of march would be taken up for the cemetery. J. A. Fabrique, marshal of the day, then formed a line, headed by the band, followed by the comrades and their wives, and then by children and citizens, who marched to the cemetery, and there paid loving tribute to the memory of two fallen comrades by placing bouquets of flowers upon their graves. Here a recitation entitled "Four Hundred Thousand Men" was given by Mabel Blackford in a distinct and very impressive manner. Soon after this the line re-formed, and marching back to the church corner, was dismissed.

Potato planting is the order of the day. Everyone intends having plenty of potatoes for their own use next spring, and some to spare to the unlucky ones. We don't expect to pay 40 cents a bushel for potatoes next year.

Mr. Lloyd Detrick, formerly of Pittsburg, but now of Keasey, passed through town for the upper valley last Friday afternoon. Lloyd intends bidding his friends adieu next Wednesday, as he will visit Astoria and other points down the river.

Weather has been quite warm for the past few days but at the present indications are favorable for moisture. The farmer smiles with gladness when he looks at his fields of grain and grass, for he feels an inward emotion of assurance that he will have an abundant harvest.

It is reported that there is much destitution in one or two families in the valley. It is certainly a sad sight to see little, helpless children suffering for clothing to hide their nakedness and food to keep the pangs of hunger from gnawing, and yet it must be acknowledged to exist in our immediate vicinity.

The negroes are now locked up in jail, offering no excuse for their actions.

Every hen on the farm should clear at least $1 50 a year. How is she to do it? The secret is—hatch her early so she can commence to lay early. If she lays early she will sit early the next spring. She can thus hatch several broods in the season, and these chicks—the surplus—together with the winter eggs, will easily bring the profit up to $1.50 or more, after all cost of feed has been deducted.

Fishermen still account for the comparatively light run of salmon by the fact that there is still a freshet in the river. The freshet generally comes in June, giving time for a run of fish in May, but this year the freshet began six weeks earlier and the water is still high. Cannerymen and fishermen agree that in July and August there will probably be so many fish that they cannot be taken care of.

FISH ENTER THE RIVER.—Frank C. Barnes, of Portland, on Monday received a dispatch from Astoria stating that a school of salmon had entered the river, and that the boats came in loaded with fish Sunday night. The river, has been falling, and it has been the expectation all along that as soon as this happened, the fish would "strike in." If the school is anything like the first big run of last year, fishermen and cannerymen will soon be busy.

The Best Remedy for Rheumatism.

From the Fairhaven (N. Y.) Register.

Mr. James Rowland, of this village, states that for twenty-five years his wife has been a sufferer from rheumatism. A few nights ago she was in such pain that she was nearly crazy. She sent Mr. Rowland for the doctor, but he had read of Chamberlain's Pain Balm, and instead of going for the physician he went to the store and procured a bottle of it. His wife did not approve of Mr. Rowland's purchase at first, but nevertheless applied the Balm thoroughly, and in less than an hour's time was able to go to sleep. She now applies it whenever she feels an ache or pain and finds that it always gives relief. He says that no medicine which she had ever used ever did her as much good. The 25 and 50 cent sizes for sale by Dr. Edwin Ross.
