

**GOING TO THE DOCTOR?**  
**WARNED SAFE CURE**

It is much better than going for the doctor, and is quite as effective and costs less money. You need always at hand a safe, sure remedy like . . . . .

**Saccharin**

which will bring instant relief from sudden illness and work out a permanent cure.

**A POSITIVE CURE FOR BRIGHT'S DISEASE, URINARY TROUBLES, FEMALE COMPLAINTS, GENERAL DEBILITY AND MALARIA.**

Cures also, all those diseases arising from disordered kidneys or liver. Large sized bottles or new style smaller bottles at your nearest store. Try it and know the satisfaction of such a remedy.

**Color Photography.**

Amateur photographers are now experimenting extensively with the new process of color photography. The nature of the chemicals used is a secret, although the method is very simple. Over forty shades may be produced from the three primary colors used. The photographic plate is developed in the usual manner, after the color liquids are applied. Most of the colored photographs seen heretofore have been painted by hand. The new automatic process gives much finer results. Pictures of landscapes and marine views are very satisfactory. But the most striking are those taken of soldiers of the French army. Gorgeous reds, blues, both light and dark, gold buttons, and faces show with great brilliancy. Even precious stones have been pictured clearly by the new process. It is so delicate that not only leaf tints but actual differences in complexion show.

Your picture may be taken in all the colors of nature, giving color of hair, eyes and skin. Spring bouquets and few gewgaws may be shown to best advantage. It is thought that at last satisfactory photographing of oil paintings may be accomplished.

**London's Public Parks.**

Some loyal Britisher has decided that the city of London needs a defender and comes to the front with the following claim: Since the year 1839 the city has paid toward the improvement of the whole municipality about \$56,116,400, or a daily expenditure of over \$3,000. As for the claim that the city is stuffy and easily in need of breathing space, he insists that, exclusive of private gardens, close upon 25 per cent of the whole area of the city is given up to the public for recreation grounds; thus, within the five-mile radius of Charing Cross there are no less than 58 ground areas, apart from the cemeteries, the private grounds and square gardens, nearly all of them exceeding 20 acres in extent.

**A New Engine of Death.**

Military journals are at present interested in a new self-moving car, which is to be a veritable carriage of death. It is to be driven by a 16 horse-power engine at the rate of 40 miles an hour over a country reasonably level, and, of course, free from fences. It has four broad-tire wheels. But the climax and purpose of this remarkable machine is to carry two rapid-fire cannons, arranged on pivots, to sweep the entire horizon. One man only is needed to run this terrible wheeled weapon of war and this same man also attends to the firing, loading, etc.

**An Engineering Feat.**

Working plans for a tunnel to connect Sicily with the mainland of Italy, under the Strait of Messina, are on exhibition at the University of Pavia. A tunnel is thought more feasible than a suspension bridge, as the narrowest part of the strait is two miles wide, and the least span possible, 10,500 feet, is considered dangerous on account of the prevalent high winds.

**\$1000**

for those who find it.

What is the missing word in the following sentence:  
 Schilling's Best tea is not only pure but it is-----because it is fresh-roasted.

Get a package of Schilling's Best tea at your grocers; take out the Yellow Ticket; send it with your guess to Schilling's Best Tea, San Francisco, by August 31st.

One guess allowed for every yellow ticket. If your guess reaches us before July 1st, you are entitled to two guesses for each ticket.

If only one person finds the word he gets \$1000. If several find it, the \$1000 will be divided equally among them.

Every one sending a yellow ticket will get a set of cardboard creeping babies at the end of the contest. Those sending three or more in one envelope will receive a charming 1898 calendar, no advertisement on it.

In addition to the \$1000 offered we will pay \$100 each to the two persons who send in the largest number of Schilling's Best yellow tickets before June 15th.

Cut this out. You won't see it again for two weeks.

**A Schilling & Company**  
 San Francisco

**Italy's Marriage Premium.**

Italy is a country where marriage will always be popular, for the government has a special fund for providing marriage portions for poor young girls. Without a dowry it would be almost impossible for a girl to be married, and this form of charity is said to be highly appreciated. The annual sum available for this purpose and distributed every year among the marriageable young girls is \$500,000. To be a recipient it is necessary for the applicant to prove her good reputation and character by several witnesses, to show that she has no means available, and that the young man who wishes to marry her has a trade.

**West Point's Oldest Graduate.**

General George S. Greene, the oldest living graduate of West Point celebrated his 98th birthday recently in New York. He was a lieutenant in the Mexican war, and at the age of 64 served in the Civil war, receiving a wound in the jaw at the foot of Lookout mountain. General Greene was chief engineer of the Croton aqueduct, and later consulting engineer of the Central Park commission. He is as vigorous as a man of 60, and it is said that his advice as a consulting engineer is still in demand.

**A New Anesthetic.**

A Polish chemist is said to have invented an anesthetic which volatilizes rapidly upon exposure to the air, rendering the persons near unconscious for a long time. It is calculated that it would be a bomb exploded in the midst of the enemy would have the effect of putting the entire body to sleep. A pellet of the substance broken under a man's nose put him to sleep for four hours.

**A SURE DELIVERANCE.**

Not instantaneously, it is true, but in a short space of time, persons of a bilious habit are saved from the tortures which disordered liver is capable of inflicting by Hostetter's Stomach Bitters, an anti-bilious medicine and aperient of the first rank. The pains in the right side and through the right shoulder blade, the sick headache, nausea, constipation and other signs of bile are entirely removed by this estimable restorative of tone to the organs of secretion and digestion.

**HOME PRODUCTS AND PURE FOOD.**

All Eastern Syrup, so-called, usually very light colored and of heavy body, is made from glucose. "Ten Garden Berries" is made from Scotch Oats and is strictly pure. It is for sale by first-class grocers, in cans only. Manufactured by the Pacific Coast Syrup Co. All genuine "Ten Garden Berries" have the manufacturer's name lithographed on every can.

**When last heard from that book agent who recently invaded Mississippi with a work on "Irrigation" was only a few rods ahead of the mob.**

**STATE OF OHIO, CITY OF TOLEDO, ss**  
**LEONARD COOPER,**  
 Frank J. Cheney makes oath that he is the special partner of the firm of F. J. Cheney & Co., doing business in the city of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE.  
**FRANK J. CHENEY,**  
 sworn to before me and subscribed in my presence, this 5th day of December, A. D. 1895.  
**A. W. GLEASON,**  
 Notary Public.

**Hall's Catarrh Cure** is taken internally and acts on the blood and mucous surfaces of the system. Send for testimonials, free.  
**F. J. CHENEY & CO., Toledo, O.**  
 Sold by Druggists, etc.  
 Hall's Family Pills are the best.

**Some citizens in Kansas are trying to raise \$1,000 for a marble bust of Charles Robinson, the first governor of the state, to be placed in the chapel of the State university.**

**Piso's Cure for Consumption** is the best of all cough cures.—George W. Lotz, Fabucher, La., August 26, 1895.

**So dense is the water in the deepest parts of the ocean than an ironclad, if it were to sink, would never reach the bottom.**

**CARBIDE FOR SALE** by J. H. Bishop, 703 Phoenix bldg., Minneapolis, Minn.

**Rivalry of English Cities.**

The English cities, Manchester and Liverpool, which are one hour apart by rail, continue to fight for commercial supremacy, and while Manchester has spent an enormous sum to construct a ship canal to divert the trade of Liverpool, the latter city has put \$45,000,000 into a new system of docks.

**The oldest bank in existence** is the Bank of Naples, which has of late been passing through such troublous times. The bank dates from 1539. The Bank of England was not established until 1694.

**TOPICS FOR FARMERS**

**A DEPARTMENT PREPARED FOR OUR RURAL FRIENDS.**

**When and How to Plant Corn—Best Sugar as Food for Stock—Mistake of Covering Seeds Too Deeply—Clean Out the Grain Fields.**

**The Corn Crop.**

The corn should be planted when the soil is warm and moist. Have the ground mellow and rich. Put the corn in with a planter, and drop 200 pounds of some good corn fertilizer in the hill. Bone phosphate or dissolved bone, either will answer. If the soil was plowed last fall, the cut-worms will be killed by the frost. Spring-plowed soil should have a dressing of coarse salt, two and one-half to three bushels to the acre. Flax or bacon salt will do. Sow the salt broadcast after the first harrowing, and cross-harrow it in. The young cut-worms and the larvae of the worms will be killed by the salt, and the salt will also benefit the corn. When no salt can be used, and there are many worms, harrow and roll the field once every five days, and plant the field the last of the month. The hot sun and the constant stirring of the ground will kill out the worms. Plant corn on well pulverized soil. If you plant on fallow or thin soil, and have little manure, spread the manure broadcast as far as it will go. Harrow it in well, and then put the corn in with a little phosphate in the hill. If the manure is very coarse, it should be plowed under not more than four inches in depth. It will not pay except in a small way to manure corn in the hill. Phosphate alone will not bring a crop of grain where the field is destitute of vegetable matter.

**Best Sugar for Stock.**

In the best sugar producing sections of France low-grade sugar has become low enough in price to make a cheap stock food; but experiments made by Prof. Malpeux show that it will not do for dairy cows. In repeated tests, the addition of sugar to the ration caused the cows to lay on flesh with or without a particle.—Massachusetts Ploughman.

**Covering Seeds Too Deeply.**

The mistake in spring planting that is most common is covering the seeds too deeply. It is a good rule to put only twice the depth of the seed in soil over it. This with some very fine seeds means merely sowing on finely prepared seed bed, when they will naturally fall into the depression, and then pressing the soil over them. The root naturally strikes down for moisture, and a very slight hold on the surface, so as to give the young plant light and air, is best for its early growth. There are usually plenty of rains in spring, so that some soil will be likely to be washed over surface-sown seeds, and this is better than any way of covering them by a cultivator, harrow or drag. Even the smoothing harrow is apt to cover small seeds too deeply. Grass and clover seeds are sown early enough so that alternate freezing and thawing does the work of covering better than man can do it.

**Grain Fields.**

Go through the grain, walking between the grain drills, and cut out the rye, cockle, garlic and other weeds. This should be done early, before the wheat heads out. An acre can be gone over in an hour. Clean grain is worth several cents more per bushel.

**Orange and Lemon Trees.**

The young oranges and lemons raised from seed last year should be transplanted into larger pots. After transplanting, water immediately, and set the plants in the shade in the greenhouse for a few days, until they are well rooted. Seeds of the best oranges and lemons may now be sown in boxes of good garden soil. Sow the seed about five inches apart and two inches deep, and cover with fine earth. Set the boxes upon the ground, partially protected from the hot sun. The soil should be kept moist. Fruiting orange and lemon trees should not be set out before the 20th of the month, when the weather becomes warm and settled. Set the trees partially in the shade. From six inches to one foot of the top earth in the tubs should be taken out and good garden soil put back. Wash the leaves off and water every two weeks each tub with one gallon of weak manure water.—The American.

**Summer Forage Crops.**

Corn is the best sowing crop. Oats, peas and barley, sown early in April and the first part of May produce a rich feed for all stock, especially for milch cows and young pigs. In a moist season the crop will be a heavy one. It is valuable for rich clay lands. Sandy or gravelly soils are too dry and hot. Plant corn in drills run two and a-half feet apart. One bushel of corn and 600 pounds of bone phosphate will plant an acre. One acre, grown on rich ground, in connection with pasture, will feed twenty-five cows for a month. Make four sowings—the first about the 10th, the second about the 25th of May, the third on the 10th and the fourth about the 25th of June.

**Dwarf Apple Trees.**

Dwarf apple trees, as objects of ornament, as well as luxury, are scarcely less valuable than the pear. They need but little space, come into bearing immediately, and a small plantation of them will supply an abundance of fruit of the finest quality. Their importance for small gardens and suburban grounds has been altogether overlooked.

**Shallow Tillage Best.**

All tillage of crops should be shallow. The time to go deep is when the ground is plowed in the fall. Deep tillage of a growing crop serves no good purpose whatever, while it is very injurious to the plants. It is folly to move the soil in which the roots of a plant are growing unless it is desired to check the growth of the plant. What is needed is intelligent shallow tillage. After every rain the crust that forms on the surface must be broken up, and any implement that runs one or two inches deep will accomplish this purpose. During a drought the surface of the soil gradually pecks and forms a crust, and hence surface or shallow cultivation is as necessary as after a

shower. Shallow cultivation will destroy weeds quite as effectively as deep, while it can be done with less than a fourth of the labor. The time to destroy weeds is just when they appear above the surface. Thorough tillage includes the destruction of all weeds as soon as they appear. Neither weeds nor grass of any sort should be allowed to rob the soil of one atom of its fertility. This involves watchfulness and labor, but not hard labor if the right kind of tools are used and used in time.

**How Much Tile Per Acre?**

There are two extremes in tile draining. The beginner is apt to think tile drains are only needed where water stands on the surface in hollows, and has to be drawn off. But when this is done, it leaves the soil in these hollows so much dryer and better fitted for cropping that the farmer sees that even the uplands, that had been supposed dry enough, need draining also. Usually the first drains are put in too shallow. That, if continued, means a large useless expenditure for tile. Nowhere should underdrains be dug less than three feet deep. They will then drain perfectly two to two and a-half rods on each side of the underdrain. The soil will hold so much more water with a deep drain that it will not require larger size than will a shallow one.

**Care for Transplanted Trees.**

Thousands of dollars are every year wasted by neglect of proper care for trees that have been transplanted. The most common cause of this is in the idea that plenty of water applied to the roots can be made a substitute for frequent cultivation. Newly transplanted trees really need little water on the soil. The roots of newly planted trees cannot at once begin to supply plant food from the soil. They need time and contact with moist soil, but not too wet, before new rootlets can put forth. To keep the soil sodden with water while the roots are in this semi-dormant condition is to rot them. Less water with thorough surface cultivation, to keep the surface soil loose and prevent rapid evaporation, is what is needed. If water is applied it should be in moderate amounts, and often spraying so as to keep the buds from withering until the roots can supply them with moisture.

**Swine Notes.**

The true secret of profitable breeding is in the feed and care given them. Health is the first thing for the swine breeder to look after. The healthy hog makes the best gain and gives the most profit. See that the young pigs get plenty of exercise in the sunshine and that they have a dry place to sleep. Wet bedding and damp sleeping quarters are a fruitful source of diarrhea in young pigs.

The hog is but a machine to convert corn and other food into pork, and pork brings what we are most in need of—money. If the hog is a machine, and we are going to keep some of these machines for use, we surely want the very best attainable.

With right management a sow should produce two litters of pigs each year, and two, or three sows will usually supply all the average farmer will care to feed and fatten. With care in breeding and in fostering these can be so distributed that some will be preparing for the market at all seasons.

Sorghum has been fed to pigs with success. At the Arkansas station sorghum stalks, when filled with sugar, were fed with no bad results, but on the other hand quite favorable returns. At the Wisconsin station skimmings were fed from the evaporating pan with fair success to pigs.

All runts are not born runts, but many have their runtiness thrust upon them. In his early life a pig will go backward or forward very easily. Almost every pig will make a good porker if started right. Give the runt a little extra lift. A little boiled milk several times a day sometimes works wonders.

**Poultry Points.**

A fresh egg has a limelike surface to its shell. Examine the droopy hen. It is probably lice and immediate attention is necessary. Scatter lime broadcast over your yard. It is a splendid thing for both young and old fowls. Too much soft cooked food is not good for fowls. They need some employment for the gizzard. Keeping poultry with success is not a difficult feat to perform; the chief requisite is common sense. Don't try to keep all the different varieties of poultry. Two or three varieties of the best are plenty. Overfeeding is expensive. It not only costs more for feed, but the hens get too fat and lay no eggs. One good thoroughbred fowl can often be sold for as good a price as a dozen poor ones and cost no more to raise. Clean up and disinfect all feed and watering troughs. This is especially necessary if wooden troughs are used. The gizzard of the fowls masticates the food, but this can only be done by the aid of sharp, gritty material. Be sure this is supplied. Don't fail to whitewash the house outside as well as inside. It adds to the appearance and really is as much benefit as the inside work. Broken bones are often more highly relished than when ground. A hen will sometimes refuse bone meal and yet will readily eat broken bones. Feather pulling is the most pernicious of all vices. The habit usually comes from idleness and can generally be prevented by keeping fowls busy. If the ground around the poultry house door gets muddy in soft weather, throw coal ashes for a few yards from it so the hens will have dry feet all of the time.

**Justice in South Africa.**

Some idea of justice as it is administered in Johannesburg, South Africa, may be derived from the following selections from a newspaper which has just been received from that portion of the Dark Continent. One of them reads: "A cab driver named Cornelius, convicted of driving a couple of female passengers out of town and assaulting them, was ordered to pay a fine of \$50 or undergo four months of hard labor." The other is as follows: "Hermann Ohlo Ohlsain was today mulcted in the sum of \$50 for selling a bottle of liquor to a Kaffir."

**SPANISH DEFEATS.**

**Garca in Ambush Too Much for the Government Soldiers.**

New York, May 31.—A special to the World from Havana says: General Garcia ambushed two detachments of Spaniards near Vintegras, Puerto Príncipe province. After a fight lasting all of one day he attacked them at night and got them separated. For a while they were so confused they fired at each other. One detachment finally became panic-stricken and fled. Garcia fell on the other and defeated it, inflicting a loss of 100. He then pursued the retreating force, and catching up with them ten miles from the coast, killed or wounded 64 more Spanish.

The Xuncer brothers recently captured a Spanish fort near Palacios, Pinar del Rio, and after occupying it three days burned it, taking away a large supply of ammunition and provisions.

There was also a guerrilla fight at Minas and St. Felipe, Havana province, the Cubans under Martinez and Carillo compelling the government troops to retire in both instances. The Spanish loss is not known, but more than 200 wounded soldiers have been brought into Havana since Friday, the men being brought in at night so as to avoid observation. The Spaniards say that Carillo is wounded, but the report is not believed.

**Defended a Hospital.**

New York, May 31.—A special to the World from Key West says: A Cuban hospital near Matrus, Havana province, was attacked by Spanish guerrillas. The insurgents were informed of their approach, and, as some of the wounded could not be moved, those able to get about fortified the building, which is of stone, as well as they could.

When the guerrillas demanded the surrender of the place the inmates repulsed with a volley, killing five Spaniards. The soldiers then set fire to the wooden portion of the building, but the besieged part remained intact, and the besiegers made such a valiant fight that the enemy finally retreated.

Sixteen guerrillas raided a camp of pacificos in Matanzas province and carried off seven women. One day one of the women managed to secure some kind of poison, which was put in the food kettles of the band, and every guerrilla died in agony.

Colonel Rodriguez and 250 Cubans attacked Casiquis, near Jaruco last Tuesday, drove off the garrison and looted the place.

**LEFT THE SWITCH OPEN.**

**Brakeman's Carelessness Caused a Bad Week in Colorado.**

Denver, May 31.—A special to the Times from Glenwood Springs, Colo., says: An extra freight going west on the Denver & Rio Grande ran upon Cabeza siding this morning to allow No. 4 passenger, the Atlantic express, to pass. The switch was left open. The first section of the passenger ran into the open switch, derailing the engine, mail and baggage cars and one passenger coach.

Engineer John West and Fireman Denny Donahay were instantly killed. The passengers were shaken up. Some had to be rescued through holes cut in the coach. Some were bruised and out, but it is thought none were seriously injured. All the passengers on the wrecked section were brought to Glenwood on the second section.

The blame for the accident seems to rest with the brakeman of the freight, who left the switch open. Engineer West, seeing the open switch, blew his whistle, reversed his engine and struck to his post. But for his prompt action many more would have been numbered among the dead. The accident occurred at a dangerous point on the bank of the Grand river, where a little more momentum would have precipitated the entire train into the water.

**INFORMER TOLD IT ALL.**

**An Alleged Elaborate Plot to Rob the Portland Postoffice.**

Portland, May 31.—A remarkable conspiracy, involving a plot to rob the registry department of the United States postoffice, in this city, was revealed yesterday. If the sensational charges are verified it will prove all the more extraordinary, from the fact that most of the prime movers are well-known officials.

At noon yesterday Julian E. Epping, superintendent of the registry department of the Portland postoffice, was placed under arrest, charged with conspiracy, and, later in the day, George T. Watson, a deputy sheriff, attached to Justice McDevitt's court; Charles A. Watson, city jailer at the police station; John Simpson, a blacksmith, and Charles W. Holapple, of the city detective force, were also arrested on similar charges. The arrests have caused a great stir, and opinions differ as to the guilt or innocence of the accused.

The federal authorities have been cognizant of the alleged plot for the past ten days. One of the conspirators weakened and told Collector of Customs Black, who in turn informed United States Attorney Murphy.

So dense is the water in the deepest parts of the ocean than an ironclad, if it were to sink, would never reach the bottom.

**Ona Melton Released.**

Little Rock, May 31.—The Gazette today printed a letter from Fayetteville, Ark., which says that Ona Melton, the newspaper correspondent who was captured with the Competitor crew by Spanish officers and held in prison at Havana for a long time, has been released. He has reached his home in Madison county, near Huntsville, Ark., where he was born and raised. He is said to be arranging his plans to go on a lecturing tour, after spending a short time at his home.

**PHYSICIANS BAFFLED.**

Professor R. S. Bowman, Instructor of Natural Science in Hartsville College, Cause of a Severe Illness by Dr. Williams' Pink Pills for Pale People After Physicians Failed.

From the Republican, Columbus, Ind.

A siege of the grip in the middle of winter, and was left in a much worse condition. My kidneys were fearfully disordered, and my digestion became very poor. I was indeed in a bad condition. "A minister in conference learning of my condition advised me to try Dr. Williams' Pink Pills for Pale People. I had heard much about the wonderful curative powers of this medicine, but it was with reluctance that I was finally persuaded to try it, as it seemed that nothing could do me any good. However, I procured three boxes of pills and took them strictly according to directions. By the time the last dose was taken I was almost cured, and in better health than I had been for a while. I continued using the pills awhile longer and was entirely cured. I can cheerfully recommend Dr. Williams' Pink Pills for Pale People."

Such was Professor Bowman's wonderful story which was further endorsed by the following affidavit: Hartsville, Ind., March 16, 1897.

I affirm that the above accords with the facts in my case.

**R. S. BOWMAN.**

Subscribed and sworn to before me this 16th day of March, 1897.

**LYMAN J. SCUDDER,**  
 Notary Public.

State of Indiana, ss.  
 Dr. Williams' Pink Pills for Pale People contain all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are sold in boxes (never in loose form, by the dozen or hundred) at 50 cents a box, or six boxes for \$3.00, and may be had of all druggists or directly by mail from Dr. Williams' Medicine Co., Schenectady, N. Y.

**REASONS FOR USING**

**Walter Baker & Co.'s**

**Breakfast Cocoa.**

1. Because it is absolutely pure.
2. Because it is not made by the so-called Dutch Process in which chemicals are used.
3. Because it is made by a method which preserves unimpaired the exquisite natural flavor and odor of the beans.
4. Because it is the most economical, costing less than one cent a cup.

Be sure that you get the genuine article made by WALTER BAKER & CO. LTD., Dorchester, Mass. Established 1780.

**Are You Sick or Weak?**

Are your nerves weak, your back aching, your bowels constipated? Have you pains over your kidneys and down into your groin? Do you feel tired when you go to bed, and worse when you get up in the morning? Are you sluggish and lazy when you ought to be bright and active? These and many other symptoms indicate the coming on of various forms of Nervous Debility, which, if treated early, can be cured by

**DR. SANDEN'S**

**ELECTRIC BELT...**

"Before using your Belt I was troubled with chronic dyspepsia, constipation, liver complaint and pain in the kidneys, and I will say with all seriousness and truth that I am greatly benefited and entirely cured, and will say that all suffering from the above will find great relief in the use of the Sanden Electric Belt."

Respectfully,  
**H. B. DOUGLASS.**

Staunton, Wash., November 26, 1896.

**There Are Cures Reported Every Day.**

Every day they are reported, and each one from an honest man, who has been restored to health and wishes others to share the same benefits. Is it for you? Do you not need it? How different it is from medicine and all other remedies. Try it. Read the book, free, sealed, by mail.
