Mis Detailed Testimenty Referre the Round Regarding the Bisseter.

WASHINGPON, Starch as Capitala Signification, and that he assumed common at the Malne April 10, 1807, and that his abile anothered in the battor of Havana the hist time January 24, 1868. The nubboyities at Havana knew of the Maine's combing. Commis-General Lee having informed the authorit's according to official pusion. After he took on an official pullet, sent by the capitals of the port of Havana, the ship was berthed in the manufaux monotorage, of the Machina, or the Shears and according to his understanding. It was one of the regular buoys of the place, He then stated that he had been in Havana; in 1872, and again in 1888. He could not make whether the Maine was placed in the menal berth for menal-war, but said that he had heard remarks shoes the explosion, using Capitains Stevens, temporarily in command of the Ward Line steamer City of Washington, as authority for the statement, that he had never known, in all his experience, which covered visits to Havana for the or six years a man-of-war to be anchored at that buoy, that he had rarely known merchant vessels to be anchored there, and that it was the least used buoy is the harbor.

The Maine's Surroundings. In describing the surroundings when first moored to the budy. Captain Signiber stated that the Spanish man-of-war Alfonso XIII was anchored in the position now occupied by the Fefn, about 250 yards to the northward and westward from the Maine. The German ship Griesenau was anchored at the borth now occupied by the Spanish man-of-war Le Caspo, which is about 400 yards due north from the Maine. He then located the German man-of-war Charlote, which came into the harbor a day or two later, which was anchored to the southward of the into the harbor a day or two later, which was anchored to the southward of the Maine's berth about 400 or 500 yards. In describing the surroundings at the time of the explosion, Captain Sigsbee stated that the night was calm and still. The Alfonso XIII was at the same, borth. The small Spanish dispatch boat, Le Caspo, had come out the day before and takes the berth occupied by the German man-of-war, the Griesenau, which had left. The steamer City of Washington was anchored about 200 yards to the south and east of the Maine's stern, slightly on the Bort quarter.

The Coal Was Safe.

The Maine coaled at Key West, taking on about 130 tone, the coal being regularly inspected, and taken from the government coal pile. This coal was placed generally in the forward bunkers. No report was received from the older engineer that any coal had been teo long in the bunkers, and that the fire alarme in the bunkers were sensitive.

were sensitive.

The regulations regarding imflammables and paints on board, Captain Sigsbee testified, were strictly carried out in regard to storage, and that waste also was subject to the same careful disposition. The inflammables were stored in chests according to the regulations and inflammables in excess of chest capacity, were allowed to be kept in the bathroom of the admiral's cabin.

allowed to be kept in the bathroom of the admiral's cabin.

Regarding the electric plant of the Maine. Captain Sigabee stated that there was no serious grounding, nor sudden flaring up of the lights before the explosion, but a sudden and total ecilpse.

As for regulations affecting the taking of the temperature of the magazines, etc. Captain Sigabee stated there were no special regulations other than the usual regulations required by the department. He examined the temperature himself, and conversed with the ordnance officer as to the various temperatures, and the contents of the magazines and, according to the opinion of this officer, as well as Sigabee, the temperatures were never at the danger-point.

langer-point.
"I do not think there was any laxity in this direction," said the captain, replying to a question of Judge-Advocate Marix. He had no recollection of any work going on in the mugazine or abell rooms before the explosion. The keys were called for in the usual way on the day in question and were numeric returned.

tion, and were properly returned. Relations With Spanish Authorities. Relations With Spanish Authorities. Speaking generally of the relations with the Spanish authorities, Captain Sixybes stated that with the officials they were outwardly cordial. The members of the autonomistic council of the government, however, seem to have brought to the attention of the navy department the fact that he did not visit them, and that fact that he did not visit them and that fact the department that it was unknown ectiquette to call on the civil members of the colonial government other than the government warful and the fact the colonial government other than the government was unknown ectiquette to call on the civil members of the colonial government other than the government. Without waiting for such an order, Captain Sigsbee made a visit afterwards, and, as he states was pleasantly received and his visit promptly returned to the department of the council. A narty man at the time of the disaster, and

When saked whether there was any lemonstration of animosity by people affont. Captain Sigabee said there was over on shore, as he was informed, but there was affont. He related that on the list Sunday after the Maine's arrival the ferry-hoat, crowded densely with people civil and military, returning from a bull-fight at Regia, passed the Maine, and about #people on board indulged in yelling, whistling and derisive calls.

Every Precaution Taken.

Derive the size in Hayna Caprain.

During the stay in Havana. Captain Sigsbee took more than ordinary precautions for the protection of the Maine by placing sentries on the forecastle and poop, quarter line and single decks, on the bridge and the poop.

A corporal of the guard was especially estructed to look out for the port gaps.

nstructed to look out for the port gang-say, and the officer of the deck and quarway, and the officer of the deck and quar-termaster were especially instructed to look out for the starboard gangway, a quarter-watch was kept on deck all night, sentries' cartridge boxes filled, their arms kept loaded, a number of rounds of rapid-fire ammunition kept in the pilot-room and in the spare captain's pantry, and under the aft unprestructure were kept under the aft superstructure were kept additional supplies of shells, close at hand for the accound hattery; steam was kept up in two boilers instead of one, and positive instructions were given to watch carefully all the hydraulic gear and report definition.

He said he had given orders to the maeter-at-arms to keep a careful eye on everyhody that came on board, and to carefully observe any puckages that might be beld, on the supposition that dynamite or other high explanives might be employed, and afterwards to inspect the routes these people had taken; and not to lone sight of the order. He states that very few people visited the ship. Lieutenant-Commander Wainwright being rather severe on visitors.

Spanish Officers on Board.

There were only two or three of the Spanish military officers came on board, but according to the captain, they were constrained, and not desirous of accepting much courtesy. The visit was during the absence of the spanish officers to visit the ship to show his good-will according to the spirit of the Maine's visit to Hawans, but with exceptions stated, no military officers of Spain visited the ship officially.

Canata Sizebas then went into details

mo military officers of Spain visited the ship officially.

Captain Signsbee then west into details regarding the precautions in force, and supecially in relation to quarter-watches, which he said, had never been rescanded.

One of the outters was in the water at the time of the accident; and one of the stathward boom. The captain said that the night was quiet and warm, and he remembered hearing distinctly the scheen of the lugie at latton, which was neep pleasmant. Since were out, the sky, however, being overcast. The Maine, at the time of the supleason, was riding abpeatingarely northwest, pointing toward the spans of the parish for the erection of a church and schools.

Beacription of the Explosion.

He then went into a description of the explosion when he felt the crash. He characterized it as a bursting, rending and crashing sound or roar of immense volume, jurgely metalite in the character. It was necrosed by a metalite sound, protably of fulfing debase, a trembling and turching motion of the vessel, then an impression of subsidence, attended by an eclipse of electric lights and intonse darkness within his cabin. He thought immediately that the Maine had blown up and she was sinking. He hurried to the starboard cabin, but changed his course to the passage leading to the auger-structure. He detailed the manner of meeting Private Anthony, which is much the same as has been published.

Lieutenant - Commander. Wainwright was on deck when Captain Sinches emerged from the passagreavax and turning to the orderly he asked for time, which was given as \$5.50 P. M. Senirus were ordered placed about the ship, and the forward magazine flooded. He called for perfect silence. The arriving officers were about him at the time on the poop. He was informed that both forward and aft magazines were under water. Then came faint cries and white floating bodies in the water. Boats were at once ordered lowered, but only twe were available, the

in the water. Boats were at once ordered lowered, but only two were available, the gig and whaleboat. They were lowered and manned by officers and men, and by the captain's directions they left the ship and helped to save the wounded jointly with other boats that had arrived on the

Fire amidships by this time was burn Fire amidships by this time was burning flercely, and the space ammunition in the pilot-house was exploding. At this time Liketemant-Commander Wainwright sald he thought the 10-inch magazine forward had been thrown up into the burning mass, and might explode any time. Everybody was then directed to get into the boats over the stern, which was doos, the captain getting into the gig, and then proceeding to the City of Washington, where he found the wounded in the dining saloon being carefully attended by the officers and crow of the vessel. He then went on deck and observed the wreck for a few minutes, and gave directions to a few minutes, and gave directions to have a muster taken on board the City of Washington and other vessels, and sat down in the captain's cabin and dictated a telegram to the navy department.

Spaniards Express Sympathy.
Various Spanish officials came on board and expressed sympathy and sorrew for the accident. The representatives of General Blanco and of the admiral of the the accident. The representatives of General Blance and of the admiral of the station were among the Spanish officials who tendered their sympathies. About four or five men were found that night who survived. By the time Captain Significant of the captain significant of the quarterdeck it was his impression that an overwhelming explosion had occurred. When he came from the cabin he was practically blinded for a few seconds. His only thought was for the vessel, and he took no note of the phenomena of the explosion. In reply to the question of whether any of the magnatines or sheltrooms were blown up, the captain said it was extremely difficult to come to any conclusion. The center of the explosion was beneath and a little forward of the conning tower on the port side. In the region of the center or axis of the explosion was the six-inch reserve magnatine, which contained very little powder, about 200 pounds. The 10-inch magnatine was in the same general region, but on the starboard side. Over the 10-inch magnatine was in the adjoining passage, a number of 10-inch shells were permanently located. According to Captain Signbee it would be difficult to conceive the explosion involved the 10-inch magnatine, because of the location of the explosion, and none of the reports show that any 10-inch shells were huried into the air because of the explosion.

The captain went into details us to the

Details of the Second Explosion.

The captain went into details as to the location of the small explosion. He said that he did not believe that the forward or 10-inch magazine blew up. The location of the run cotton was aft under the vabin. He stated that he had examined the wreck himself, conversed with other officers and men, but, as the Spanish authorities were very much adverse to an investigation, except officially, on the grounds, as stated by the Spanish admirally, that the honor of Spain was involved, he forebore to examine the submarine portion of the wreck for the cause of the explosion until the day the court conveted. Details of the Second Explosion.

received and his visit promptly returned by certain members of the council. A party of fadles and gentlemen called, and the proceident of the council made a speech which Capitain Sigsbee could not understand but which was interpreted to him, to which he replied.

"My reply," and Captain Sigsbee, "was afterwards printed in at least two papers in Havara, but the terms made me favor autonomist government in the island. I am informed that the autonomist government in Havara is unpopular among a large class of Spaniah and Cuban residents. I have no means of knowing coal bunkers on the port alde were full. coal bunkers on the port side were full.

The forward coal bunkers on the star-boat side was half full, and it was being used at the time of the explosion.

Coal Bunkers Not Het.

Coal Bunkers Not Het.

Captain Sigsbee, being recalled, stated that he had detailed Lieutenant-Commander Wainwright, Lieutenant Helman and Chief Engineer Holman, all of the Maine, to obtain information in regard to any outsiders who might have seen the captain Captain Significants. to any outsiders who might have seen the explosion. Captain Sigsbee also gave as his opinion that if coal bunkers Al5 had been so bot as to be dangerous to the 6-inch reserve magazine, that this condition would have been shown on three sides where the bunker was exposed, and that men constantly passing to and fro by it would have necessarily noticed any undue heat. Captain Sigsbee was recalled and examined as to the ammunition on board the Maine. He stated that there were no high explosives, guncotton, detonators or other material in magazines or shell rooms which the regulations prohibited. He testified that no warheads had been placed on torpedoes since he had had command of the ship.

WEEKLY MARKET LETTER.

Trade Conditions in the Leading Cities Populists, Silver Republicans and Dem-

The feature of the week in the wheat in the breach and bid \$1.04 for May and agreed to a division of the offices wheat and took all they could get at by a conference committee. The plat-that price. The "barripe" of houses that price. The "barring of houses representing Leiter was a sign of lack of confidence on the part of the bears. They know that the clique is amply able to pay for all the wheat it takes, but probably they do not wish to add to the incentive which the clique already has to run prices up. A rather severe break has occurred in the other options, but aside from the better crop reports from the southwest the news has not been bearish. Foreign markets have been remarkably firm and the constant purchase of wheat by foreigners at the seaboard bespeaks a genuine demand. The addition to the contract stock looks bearish, but it must be admitted that a very small percentage of the total receipts grades up to the standard. Some may wonder why Leiter withdrew his support from the July option. Probably because he anticipated a hard fight on the May deal, and considered it a foregone conclusion that a buige in the May wheat will bring the July back into line in a hurry. The crop situation is looming up against the price of deferred futures, and the excellent prospects are a strong inducement toward loosening up farmers' holdings and to putting out of line of

Milking Cows by Machinery.

A writer in The India Rubber World calls attention of bicyclists to the fact that animal oils are very destructive to rubber products, such as bicycle tires. It makes no difference how good the compound may be; a little spot of animal greage in contact with the tire draw the milk into the pails as soon as injures the rubber. A new automatic car stopper has a milked at once, a vacuum tank being attended by pipes with air-tight pails onnected by pipes with air-tight pails on rear each animal, with flexible rubber tubes for attachment to the teats to draw the milk into the pails as soon as injures the rubber. A new automatic car stopper has a raised body and releases a pair of brake aboes, which are flat on the under side to fit the rails and correct to fit the r they are partially of animal origin. Mineral oils are not nearly so apt to injure the rubber. In fact, many of them are not injurious at all, when applied in small quantities, while many vegetable oils are in a measure helpful

Mme. Gadski's Hair. All that beautiful hair that Mme. Gadski displays as Elsa, Serta, Eva, Sieglinde, Elizabeth and the rest, says Harper's Bazsar, is her own. It is a glorious mane, in color a light coppery brown, slightly waving and of extraordinary length and thickness. In private life the prima donna wears it brushed back from her forehead and coiled at the middle of the back of her head. A few plain tortoiss-shell pins bold it in place. No headdress or fancy pins or bowknots or other bric-a-brac disfigure it.

DON'T BE FOUNDERED.

We blanket a horse in the warmest weather after a hard drive if he is to stand in his stall. We take violent exercise and do hard manual labor, and very many take In case of the horse, if he chills, he will be foundered. In case of men and women who are forgetful of the consequences, they will suffer sorrows and stiffness from head to foot. If we are, thus forgetful, we need not be so of the fact that St. Jacobs Oil, used in a case of the kind, is one of the best and surest cures. A good rubbing relaxes the stiffened muscles and puts the joints to work again in good order. In this season of sports none who enjoy them ought to be without a bottle of the Oil. no precaution against sudden cooling off.

AN OPEN LETTER TO MOTHERS. We are asserting in the courts our right to the exclusive use of the word "CASTORIA," and "PITCHER'S CASTORIA," as our Trade Mark.

I, Dr. Samuel Pitcher, of Hyannis, Massachusetts, the same that has borne and does now bear the fac simile signature of CHAS. H. FLETCHER on black mousseline sleeves are charming every wrapper. This is the original "PITCHER'S CASTORIA" which has been used in the houses of the mothers of America for over thirty years Look Carefully at the wrapper and see that it is the hind you have always bought, and has the signature of CHAS. H. FLETCHER on the wrapper. No one has authority from me to use my name except The Centaur Company of which Chus. H. Fletcher is President.

March 8, 1897. SAMURL PITCHER, M.D.

Feeding on a Desert. The American consul at Aden. Arabia, gives an account in the last volume of Consular Reports of a cori-cus herd of sheep in Somaliland, which is a desert country. These sheep sub-sist on prickly mimosa, a kind of desert substitute. scrub bush, scemingly the most unpalstable of food. Their striking peculiar ity, as described by the ounsul, is a large lump of pure fat growing right at the root of the tail. A medium-sized

lump of this fat weighs about four pounds, and it varies from one and onehalf to six pounds. People who have studied the nature and habits of these sheep say that, like the camel, which is able to subsist for days without food from the strength derived from the tissues of his hump, this blackhead sheep can subsist on the strength without any other sustenance. The principal market for the skins is New York. The prin-It has been proven by trial that the sheep are able to stand a considerable change of climate. A few years ago WILL HILL DIT BAC NEEDLES..... four sheep were acclimated at the Zoo-logical Garden at Frankfort, Germany, where their progeny now number about land in Arizona and elsewhere in the West where cacine plants grow in profession, but as yet no domesticated animatica important to survivors and widows in matter important to survivors and widows in that region. It has been proposed more than once to import camels, but these than once to import camels, but these acre cash, balance by crop yearly until paid for. J. Mulhall, Sioux City, in. able. The Semalliand sheep, however, if accilmated in that desert region, together with the plant he subsists upon, might prove a valuable addition to our list of domestic animals. It is no doubt the thought of the consul that such an experiment should be tried.
