 Tell him, rather, how to get rid of them. Most infirmities come from bad blood and are cured by Hood's Sarsaparilla. Every person who has scrofula, salt rheum, humors, catarrh, dyspepsia or rheumatism should at once begin taking this medicine that the infirmity may be promptly removed.

Consumption—"After the grip I had a bad cough, distress and night sweats. Humor broke out and consumption was diagnosed. One bottle Hood's Sarsaparilla helped me and four bottles cured me perfectly." Mrs. N. D. Kinney, Morris, Conn.

The Queen's Ice Chest.
 The stores of ice at Windsor, Osborne and Balmoral castles are very large. At Windsor there is a storage room for about 500 tons. These supplies are obtained from the lake beneath the north terrace, from Frogmore and Virginia water. Ice is not only lavishly used in the royal kitchen, but also for reducing the temperature of her majesty's apartments in hot weather. Then it is packed in pretty wooden buckets and stood in the fireplaces.

A Load of Premises.

Rev. Joseph Parker, the eminent English preacher, confesses that in his youth the sound of the name Van Diemen's Land—now known as Tasmania—powerfully affected his imagination. It was to him, as it has been to many youngsters, an appealingly mysterious place, but in time it lost its evil suggestion, and he tells how this came about in his recent book: "A Preacher's Life." At a Methodist meeting in the north of England the people had been singing a hymn in which the line: "We are marching through Emmanuel's ground," occurs, and at the close of the hymn one good old man, whose emotion was in excess of his intelligence, fervently prayed: "Grant that when this life is over every one of us may have a cottage in Van Diemen's land." The poor man somehow got it into his head, by some law of mental association which no one can fully explain, that Emmanuel's grounds and Van Diemen's Land were practically one and the same.—Youth's Companion.

The Mystery of Dust at Sea.

It is a puzzling fact that the decks of sailing vessels show dust at night, even if washed in the morning, and no work is done during the day. SALT LAKE CITY.

An Important Factor in Transcontinental Travel.

No one crossing the continent can afford to cut Salt Lake City from his route. The attractions of the place, including the Mormon Temple, Tabernacle and Church institutions, the Great Salt Lake—deader and denser than the Dead Sea in the Holy Land—the picturesque environment and the warm sulphur and hot springs, are greater to the square yard than any locality on the American continent.

The Rio Grande Western Railway, connecting on the East with the Denver & Rio Grande and Colorado Midland Railways and on the West with the Southern Pacific (Central Route) and Oregon Short Line, is the only transcontinental line passing directly through Salt Lake City. The route through Salt Lake City via the Rio Grande Western Railway is famous all the year round. On account of the equable climate of Utah and Colorado it is just as popular in winter as in summer. Alaska Criminal Code.

A bill has been framed by Senator Perkins to amend the criminal code which was adopted for Alaska at the last session of congress. In this bill, Senator Perkins prohibits the construction of barricades in streams for the purpose or with the end of preventing fish ascending the streams or rivers of Alaska. It is provided that it shall be unlawful to fish for salmon except with rod or spear, above the tide waters of any creek or river of less than 500 feet width, except for purposes of propagation. Seining or catching fish in these streams for a distance of more than a third of the width of the stream is prohibited, and no seine or other net shall be laid within 100 yards of another. Fishing for salmon in the waters of Alaska from 6 p. m. Saturday until 6 a. m. on the following Monday is also prohibited, except in Behring sea and its tributaries. The secretary of the treasury is authorized to set aside whatever streams he may desire as spawning grounds, when he may consider that fishing operations on such streams are being conducted so that the number of salmon taken is larger than the capacity of the stream to produce, or if the fishing operations prevent a sufficient ingress of salmon to the spawning grounds, he may establish weekly closed seasons, to limit the duration of the fishing season, prescribe the volume of the catch as a whole, or prohibit it entirely; provided this action is taken after the persons interested have been given a fair hearing in their own behalf.

Secretary of the Treasury is also authorized to require the erection of salmon hatcheries of suitable capacity at any fisheries or fish establishments in Alaska, which are to be maintained by the persons operating the fishery, cannery or saltery.

Money to Push Railroad Building.

The Bellingham Bay & British Columbia railroad has given a trust deed to its property in Whatcom county to the Bank of California to secure the payment of \$1,000,000 in first mortgage bonds. The deed was executed in San Francisco on December 1, and was filed for record in the auditor's office in Whatcom county on January 23. The document is the most voluminous of any ever filed there, and it required \$199.50 in revenue stamps. It is the purpose of the company to pay off an indebtedness of about \$60,000 on the road, and the balance realized from the sale of the bonds to the Bank of California will be used in construction work. The instrument calls for the completion of 24 miles of additional track this year, on which will be issued in bonds \$17,000 per mile. This extension is the one now under survey from Sumas to Boulder Creek.

Transfer of a Sawmill.

The Copping sawmill, at Tenino, Wash., was sold to the Douglas Lumber Company of Chehalis, the members of the company consisting of L. H. Miller and Mrs. H. J. Miller. The firm recently purchased the timber on the Hodgden donation claim, a mile from Tenino, and the mill will be immediately moved to the new site and put in operation. It has a capacity of about 18,000 feet per day.

WEEKLY TRADE REVIEW.

Large Deliveries Made on Previous Contracts.

R. G. Dun & Co.'s weekly review of trade says: This year starts with much of the year's business already done, and all comparisons will prove misleading if that fact is not taken into account. Last year the certainty of great improvement had come before the year opened, and there was a rush to get in orders before work became crowded and prices advanced. This year the works are already crowded for months ahead in most lines, and prices had already advanced so far that recoil had already commenced in some branches, and was thought probable in others.

With the exception of woolen manufactures, the chief industries have met less new business in January than last year, though deliveries on previous contracts have been larger than a year ago.

Wheat rose 1 cent, but soon reacted. Atlantic exports were only 1,468,592 bushels, four included, for the week. Pacific exports have been 4,209,300 bushels in five weeks, against 3,570,854 bushels last year.

Speculation in cotton has raised the price to 8 1/2 cents, without improvement in the demand. The receipts from plantations still fall so far behind last year's that low estimates of yield are expected.

Wool is rather weaker in some grades, but stronger in others, so that the average of quotations is steady, notwithstanding some sales at concessions.

The iron and steel industry is so far tied up by contracts reaching through most of the year, that the effect of production exceeding consumption is felt only in some instances.

Failures for the week have been 332 in the United States, against 324 last year, and 34 in Canada, against 25 last year.

THE OLDEST MAN IN AMERICA

Tells How He Escaped the Terrors of Many Winters by Using Peruna.

Mr. Isaac Brock, Born in Dancombe Co., North Carolina, March 1, 1788. Says: "I attribute my extreme old age to the use of Peruna."

Born before United States was formed. Saw 22 Presidents elected. Peruna has protected him from all sudden changes. Veteran of four wars. Shod a horse when 99 years old.

Always conquered the grippe with Peruna. Witness in a land suit at age of 110 years. Believes Peruna the greatest remedy of the age for catarrhal diseases.

Isaac Brock, a citizen of McLennan county, Texas, has lived 111 years. He now lives with his son-in-law at Valley Mills, Texas.

In speaking of his good health and extreme old age, Mr. Brock says: "After a man has lived in the world as long as I have, he ought to have found out a great many things by experience."

"One of the things I have found out to my entire satisfaction is the proper remedy for ailments that are due directly to the effects of the climate."

"During my long life I have known a great many remedies for coughs, colds, catarrh and diarrhoea. I had always supposed these affections to be different diseases, but in reading Dr. Hartman's books I have found out that these affections are the same and that they are properly called catarrh."

"I had several long sieges with the grippe. At first I did not know that Peruna was a remedy for this disease. When I heard that la grippe was epidemic catarrh, I tried Peruna for la grippe and found it to be just the thing."

"As for Dr. Hartman's remedy, Peruna, I have found it to be the best, if not the only, reliable remedy for these affections. It has been my standby for many years, and I attribute my good health and extreme old age to this remedy."

Very truly yours,
 Isaac Brock.
