

Serious Ills of Women

The derangements of the female organism that breed all kinds of trouble and which ordinary practice does not cure, are the very things that give way promptly to Lydia E. Pinkham's Vegetable Compound.

Uterine and ovarian troubles, kidney troubles, ulcerations, tumors, unusual discharges, backaches and painful periods—these are the ills that hang on and wreck health and happiness and disposition.

Lydia E. Pinkham's Vegetable Compound has a wonderful record of absolute cures of these troubles—a constant series of successes for thirty years. Thousands of women vouch for this. Their letters constantly appear in this paper.

Imitation of Christ. The true imitation of Christ lies not in a mere copying of the outward details of his life, but in the possession and outworking of the spirit which dwelt in Him.—Baptist Union.

Shake into your shoes Allen's Foot-Powder, a powder for the feet. It cures painful, swollen, smarting, nervous feet, and instantly takes the sting out of corns and bunions. Readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and restoring nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that fails to cure. Send for full testimonials. Address F. J. CHENEY & CO., Toledo, O. Sold by druggists. Price 75c. per bottle. Hall's Family Pills are the best.

Commercial and Financial Happenings of Interest in the Growing Western States.

Bounty for Seal Sculp. Chairman Kendall, of the fisheries committee of the Astoria Progressive Commercial Association, is circulating a petition among the canners and those most directly interested for subscriptions for a fund to be used in paying a bounty of \$1 each for seal sculp and \$2.50 each for sea lion sculp. The fund is to be placed in the hands of the secretary of the association and warrants drawn against it by the fish commissioner. This subscription list is the result of an effort being made by the association to exterminate one of the greatest enemies to the fishing industry. It is claimed that a sea lion will devour four salmon every 24 hours, and as there are at least 2,500 of these animals hovering about the mouth of the river, 10,000 fish or 4,000 cases, representing about \$13,860, are being destroyed each day. The intention of the association is to have the bounty amended so as to set aside a portion of the license money for paying this bounty, but this cannot be done until the next session of the legislature, and in the meantime the funds are to be raised by subscription.

14 Years for Highway Robbery. Martin Everett, an American citizen, was sentenced at Vernon, B. C., to 14 years' imprisonment for highway robbery, alleged to have been committed about a year ago at Grand Forks, B. C. Six months ago the case was laid before United States Consul Dudley, and he presented it to the state department at Washington, D. C. The sentence caused great surprise, as it was known that the case had become an international matter. Consul Dudley tonight apprised Secretary Hay of the sentence. His prior representations to the state department were favorable to Everett's contention that his arrest by Canadian officials at Republic, Wash., was unwarranted.

Factions Eastern Oysters. Mr. Wachsmuth expects another carload of Eastern oyster seed for his beds near Oysterville. With him the raising of Eastern oysters is no experiment, as he is the pioneer in the business on the North Pacific coast. He has had fully matured Eastern oysters to ship for two years past, and each year has increased his importation of Eastern oyster seed. He has never succeeded in propagating them here, but depends entirely upon the growth of the oysters he plants for his profits. The demand greatly exceeds the supply.

The Riverside Tennis Club has been organized in Arlington, Or. Gold dust is as much a medium of exchange at Sparta, Or., as it was 35 years ago.

H. M. Stevens and W. F. Yeck, who are operating the Darnell mine, have made application to the city council for a franchise to operate an electric light plant in Kalama, Wash.

An effort is on foot to organize a company of National Guard at Cottage Grove, Or. The required number of names have been secured and many more are available that could be had.

Dr. R. E. Stewart, of Goldendale, Wash., has a collection of over 30,000 perfect Indian arrow heads, besides several thousand imperfect ones, and a large and rare collection of Indian curios.

The supply of milk at the Brownsville, Or., creamery is increasing. It now averages over 3,000 pounds per day, and still there are a few more who have not commenced supplying milk yet, but will do so later.

Navigation on the Upper Columbia is to be a reality, it is said, even though the boats of the portage company fail to materialize. J. A. Pound has commenced work at Arlington on a boat that will be capable of stemming the current of the big river at any stage of water.

C. T. Moore, of the Blaine, Wash., mill man, who platted the original townsite of Blaine for the Cain Bros., is making preparations for the building of a complete sawmill and box factory on the Semiahmoo side of the Blaine harbor. Everything is arranged, and the mill will be placed in operation as soon as it can be constructed.

Five well developed cases of small-pox are reported at Forest Center, Stevens county, Wash., three and one-half miles north of Springfield. Dr. Baker reports the cases are in three different families. It is said the members of the families have been around towns as usual and many people have been exposed. The county commissioners have been notified of the cases and a quarantine has been established on the three families.

The Bellington Bay Rod and Gun Club has made arrangements to procure 20,000 rainbow trout fry for Lake Whatcom. This variety of trout is the handsomest, gamest and best of the trout family on the Pacific coast and the advantages of securing a plentiful supply of these fish are so great that the club intends to establish a nursery for them near the foot of the lake where the young fish can be brought to an age and size to care for themselves.

An unknown man was killed at Maraca, Wash., while attempting to steal a ride on a freight train. His head was almost severed from the body.

H. B. Moyer has temporarily closed his sawmill on the Catapoola. He has between 400,000 and 500,000 feet of lumber, which will shortly find its way to the valley, mostly to Brownsville. Mr. Moyer will soon move his mill below the old logging camp, where he expects to cut nearly 4,000,000 feet every year.

Mrs. G. L. Circle has sent for the necessary machinery to start a creamery at Prineville, Or. Gross Bros.' Iron Works are manufacturing a quartz crusher for A. E. Wood and F. L. Gilman, to be used at their mines in the Blue river district, says the Eugene, Or., Register. The machine will weigh in the neighborhood of 800 pounds, and is the invention of Mr. Gilman, who claims that it will crush 10 tons of quartz per day. Two ore cars, to be operated by a cable, are also being gotten out for the same men. The motive power to operate the machinery will be a waterwheel.

BRADSTREET'S REPORT.

Further Subsidence of Demand and Prices.

Bradstreet's says: A further subsidence of demand and leveling of prices is noted in several lines this week, this leveling being no doubt aided by the unsettling effect of the rather more than usually disturbed considerations in labor circles. Its result is something approaching dullness in many channels of distribution, increased conservatism in the making of ventures and a disposition to digest business already arranged for before making new engagements. That the basic conditions of general business, such as the outlook for crops, the export demand and the increased purchasing power of the people at large, have not been much reduced, but, on the contrary, actually improved, seems evident from the advices received this week.

Business at wholesale is relatively quiet, which is not unusual at this period, but more than ordinarily marked attention is being concentrated upon retail demand, which is, of course, relied upon as a measure of progress of actual consumption.

Touching this public demand, it may be stated that relatively best reports come from the Pacific coast and from the Northwest.

Flour shipments this week are very large. Wheat, including flour, shipments for the week aggregate 4,537,022 bushels, against 3,863,803 bushels last week.

For the week failures number 153 in the United States, as compared with 152 last week.

Failures for April in the Dominion were fewer than in April a year ago, but liabilities were nearly 15 per cent heavier.

ANOTHER FAST TRAIN. "The Rio Grande Western Railway" "The Great Salt Lake Route," has resumed its fast train services to the East, making the run from Portland to Chicago in three days and a half. No lay-over is necessary, and only one change of cars is made. Those who desire it have the privilege, however, of a day-light stopover either at Salt Lake City or Denver. Three daily express trains are run, leaving Ogden, Utah, at 7:15 a. m., and 1:15 and 7 p. m. The morning train carries a through standard sleeper to Chicago, via the Burlington Route, and the night train one via the Chicago, Rock Island & Pacific Railway. The tourist sleepers and chair cars run daily as formerly through from Portland to Denver. Twice a week tourist excursion cars are run through from Portland to Boston. All trains carry dining cars, making the trip across the continent, via "The Great Salt Lake Route," most desirable. The Rio Grande Western Railway is the only road running through Salt Lake City, and with its connections—the Denver & Rio Grande and the Colorado Midland—takes the passenger through the famous Rocky mountain scenery of Colorado.

No Use for Thrones. Napoleon Bonaparte is quoted as saying to Dr. O'Meara at St. Helena: "If I was in England now, and the French nation was to offer me the throne again, I would not accept it, because if I was to do so I would be obliged to turn bourgeois (executioner). I would be obliged to cut off the heads of thousands to keep myself upon it, which would not be pleasant to me. Oceans of blood must be shed to keep me there. No, no; I have made enough of noise already in the world; perhaps more than any other man will make; perhaps too much. I am getting old, and only want retirement. What could I do in France? Alone, to set myself against all the powers of Europe. Madness!"—Century.

Electric bathtubs are used extensively in many large laundries; their advantages are apparent. The heat can always be controlled so as to keep the iron at the right temperature thus obviating the danger of spoiling a finished dress by smut from an iron heated by gas.

Poisonous snakes with young are sluggish and retiring in their habits. The little ones are born with fangs and poison glands in full perfection, and are dangerous even before tasting food or water. The young are much more active than the adults and probably their poison is more virulent.

Decorations to Be Restored. The old question of restoring the traceries to the windows in the palace of the dogs at Venice is again agitating artistic Italy. The exterior of the palace as it stands today was begun in the early part of the 13th century, and required 100 years for its completion. In 1677 fire destroyed all but the walls. Up to that time the windows were enriched with beautiful tracery.—N. Y. World.

How Polly Knew. "A 'befo'-de-war' matron was teaching one of the little darlings on her plantation how to spell. The primer she used was a pictorial one, and over each word was its accompanying picture, and Polly gibbered 'o-x, o-x,' and 'b-o-x, box,' etc. But the teacher thought she was making too rapid progress, so she put her hand over the picture and said: 'Polly, what does o-x spell?' 'Ox,' answered Polly, nimbly. 'How do you know that it spells ox, Polly?' 'Seed his tail,' replied the apt Polly.—Argonaut.
