FACTS The Distributive Trade Is Semonably Dull Bradstreet's says: Distributive trade

BRADSTREET'S REPORT.

is duil, seasonably so in most in-stances, and prices of manufactured products are generally weak, but ex-ceptions to the former are found where crop conditions are exceptionally promising and in the clase of prices where the readjusting movement has been overdone on the down side.

The upward rush of wheat prices culminated at the close of last week and the reactions and the irregularities since, mainly due to heavy realizing, would mainly point to the movement

having been temporarily at least over-done. Adviges from the North are of little more than half a crop of wheat, but estimates as to the outturn in bushels vary accordingly as the government reports of \$16,000,000 bushels, or the commercial estimate of 200,000,000 bushels in yield last year in the three states are used as a basis.

Sugar is at the highest price reached at this time for 10 years past, owing to the active canning demand and the strengthened position of raw. The war in China is chargeable with

the advance in teas, not only from the former country, but from Japan, some interruption in transportation being apparently looked for if the Asiatic uble increases.

Heavy rains are complained of in the entire cotton helt east of the Mississip-pi river, and the crop is generally "in the grass."

Reports from the iron and steel trade are as pessimistic as ever. Nominally quotations at Fittsburg are unchanged. Wheat, including flour, shipments for the week aggregate 3,184,144 bush-els, against 4,645,180 bushels last week

Failures for the week number 185. as compared with 167 last week. Failures in the Dominion of Canada number 18, as compared with 28 last

FARMERS FOR

ABOUT WOOD PRESERVATIVE.

arlus Carboltacum Enduros Tweaty Years and Still Sound.

<text>

the attacking enemies were climate, coll, fresh or salt water, teredoes, ants, horing worms or other hostiles, singly or in com-bination, when properly applied. The value of such a specific on a farm, where almost all the constructive work. from houses and barns to vine poles and fence posts, is chiefly er entirely wood, cannot be overestimated. No farmer who, appreciates practical economy can afford to do without it. As additional incentives for the use of Avenarius Carbelineum it may be stated that the preparation is in-expensive, and a few gailons go a long way, while application is as easy and sim-ple as that of common house paint. A few strokes of the brush does the work, and the article treated is insured against decay and death. As an illustration of the efficiency of Avenarius Carbelineum we publish the following photographic reproduction of two pieces of wood which stood aide by side partly in and partly out of the ground together with a sworn statement concerning the same attached, as seen in the pieture.

the seed in the spring. ncerning the same attached, as seen in the picture.

Piece of board, perfectly sound, afte twenty years' exposure, on account of be ing impregnated with "Carbolineum Avenarius."

S-Mark Fence post, completely decayed, after tve years' exposure, on account of noi-being treated with Carbolineum Aven-

being treated with Carbolineum Aven-arius. Alx is Chapelle, January 12, 1898 We confirm that this place of wood is a part of a fonce board, which has been exposed to the weather for nearly twenty years. This fonce was impregnated with Carbolineum Avenarius, and has always stood in very damp, mouldy ground (hu-mus), around our warehouse. Not a sin-gie place of wood in this fence has de-cayed during the time, as shown by above board, which stood partiy in and partiy out of the ground. The fence post shown above was NO⁻ impregnated with Carbolineum Avenarius and we placed it five years ago slongsi of the board, and removed both together in their above condition. BIEBENENCK & COUMONT.

The above testimonial was signed be-fore the Royal Notary in Air is Chappelle, and Mears Siebeneck & Coumont ac-knowledge it as their free and true act

The above is only one out of hundred of indursements that Avenarius Carbo-lineum has received from leading engi-neers, chemists, contractors, shipbuilders and others all over the world. It is pub-lished as an established truth, coming as it does from a country where affidavits are regarded as sacred, and a breach of versativ is regarded as a relievous a wall

Grawberry Speage. One quart of strawberries, half a cupful of ocid water, one cupful of sugar, one third box of gelatine, juice of one lemon, whitee of three eggs. Soak the gelatine two hours, or until begin. The stomach gets a little out of it is melted. Mash the barries through order, is neglected, and chronic dyspepsia a sieve. The season for mowing will cause farmers to be busy and it seems that just as this work is to be hurried some accident occurs. This does not always happen, but many such drawbacks might be avoided if farmers will clear their fields of stones, sticks and other obstructions to the machines before the grass is too high to see them. 'An injury to a mower knife may cause cost-ly delay.

Viennese Steak

This is very easily made by taking rump or fillet steak, free from skin, sinew, etc., and mincing it very finely It is then dusted with flour, pepper and salt, with, if liked, a very little minced parsley or chives, shaped into flat cakes, and fried, or saute, in hot fat, carefully turned to brown it equally on both sides, and then served with clear gravy or demi-glace, or with sour cream .- Philadelphia Press.

as a civil orima. Japan Anxious.

Japan is alarmed over the emigration of many of her residents to this country who are lured here by misrepresentation. This is like the misrepresentation which delude people into believing that any other med-ine is equal to Hostetter's Stomach Bitters for stomach disorders. It will cure indi-gestion, constipation and dyspepsia.

Any article that is grown, whether of the best or not, costs something, and the grower must receive at least the cost or he will suffer a loss. The larger the difference between the cost and the price received the greater the profit. It should be the object, therefore, to grow the best, rather than the aim for large yields, as the market may be over-stocked with inferior goods, while a demand may exist for the best.

on the same land and at the same time, is to drop seeds of sweet corn in the same rows with the peas, placing the seeds of corn several inches apart, thinning to a foot apart after the plants are up. The corn will finish its main growth after the peas have ceased growing, though for taller kinds the corn serves as supports.
