Ye tipo made us say "hunters" instead of "hunters" in our last week's notes. We meant to say that the fellows who "get up and get" are the ones who generally get the larger share of the good things of life. But our chirography is so miserably bad that the only wonder is that there are not more typographical blunders.

H. Goldstein, of Portland, representative of a San Francisco firm, came over the mountain last Thursday and was displaying and selling his goods to our merchants Friday. It is so rare a thing to see a commercial man with his big trunks in the Nehalem that we chronicle the event as a choice bit of news. When the railroad comes we may see "Johnny" more frequently.

Say, Mr. Editor! Don't you think you were a little too hard on Mary Ellen Lease last week? Would it not be well to give her credit in that her woman's intuition has perceived the insincerity of her idol of four years ago, and that she now has the courage to denounce him from the pulpit as a man without principle? Give the poor woman a chance to redeem herself from many a fancy fobles and follies of the past.

MURDER ON SAUVIE'S ISLAND.

Al S. Kuete Meyer shoots and kills his stepfather, Wm. Lunrut.

As the result of a long-standing family feud, William Lunrut, a Russian farmer of Sauvie's Island, was shot and killed by his stepson, Al Kuete Meyer, last Thursday night. Three shots were fired, and the old man died almost instantly. Kuete Meyer gave himself up to the authorities Friday morning, claiming that he acted in self-defense. The stories of the three witnesses, differing materially. According to the testimony brought out at the preliminary examination the crime was a most dastardly one. Kuete Meyer reloading his gun after he had fired the first shot, was shooting his victim again. From the story told by Kuete Meyer's mother it seems that the murderer is a bad man and has had designs on his stepfather's life for a long time. The shooting occurred in the presence of three witnesses, two of whom were the Epperson boys and the other William Layfield.

From the start-off it would appear that Kuete Meyer had his witnesses, the Epperson, in good training, as they swore hard to clear their friend from the crime. The scene of the tragedy is but a few miles above the line dividing Columbia and Multnomah Counties.

The Grand Jury immediately took up the matter and has found indictments not only against Kuete Meyer, but also against the Eppersons, for complicity. Sufficient evidence was produced to satisfy the Grand Jury that the murder had long been planned and the Eppersons knew of it, and made no effort to locate the witness, implicating them to the same extent as the man who committed the crime.

VanCleave's in a Runaway.

A demolished wagon, sore legged and nervous horses, frightened and brained children and injured, nervous parents, characterize the conditions at the Ben VanCleave home in South Scappoose canyon, the result of a runaway that occurred last Sunday forenoon, while the family was en route to Sunday school. It was near the Methodist church on the County road, that the accident happened. The team became frightened and unmanageable by two bicyclists, who sped swiftly past. The entire family, husband, wife and four children were occupants of the vehicle. All were soon hurled to the ground with terrific force, except the eldest girl, who leaped from the wagon and escaped injury. Fortunately none were killed or broken bones, but some serious bruises were sustained, and Mr. VanCleave received a downward dislocation of the right shoulder, besides bruises which slightly disfigured his countenance somewhat. Dr. Ross hastily attended to the injured, and reduced the dislocation and otherwise administered to the comfort of the family. It is a miracle that no more serious damage resulted, since the wagon was wrecked and its bed turned down side up, on top of its former occupants, in the middle of the road.

Traction Donkey Stump Puller.

Mr. Herb Howard, of Yankton, has a machine which is revolutionizing land-clearing methods. It is a huge traction donkey, weighing about sixteen tons and has a pulling capacity equal to about two Samsons. Mr. Howard purchased the machine for logging purposes, for which it is very useful, but its value as an all-around machine is not confined solely to the purpose for which it was bought. When employed for the donkey becomes slack in the logging business, Mr. Howard starts it in operation at some other kind of work, the latest being at pulling stumps out of his muddy ground, at which it is proving a great success. There seems to be no stump too large or too firmly anchored in the ground for the donkey to extricate so long as the cables will stand the strain. About fifteen acres of ground were cleared of stumps recently at a minimum cost, first using a light charge of powder to clear the earth from around the roots. One important advantage of the monster machine is that it is not cumbersome in handling. It has a small wheel at the front, and travels at a fair rate of speed, considering its size.

Smallpox in a Logging Camp.

The Portland Telegram last Saturday printed an account of the arrival in that city of a man from Peterson's logging camp, back of Rainier, who was suffering from smallpox. The victim is David Kuhn. He landed in Portland Friday morning. He began to feel ill three days before and not knowing what was the matter he hid in a boat and boarded a river boat and went to Portland. He is 30 years old. He has been working in the logging camp for some time, and where he got the disease is a question. Upon his arrival in Portland Kuhn was taken to a hospital and housed and went to bed. The next day he drifted into the City Physician's office and asked the doctor what ailed him. An examination confirmed the suspicions, and preparations were at once made for the patient's removal to the pesthouse, where a competent nurse is in charge. Kuhn was in the papular stage of the disease, and the eruptions were appearing. His removal to the pesthouse was accomplished under grave difficulties.

In Search of Data.

Assessor White and his deputy expect to go to Oregon City and Salem next week to search the records of the United States Land Office and the records of the State Land Board for parcels of land subject to taxation which have not been reported to this County. The Assessor found a number of parcels of land this year which had not heretofore been assessed and their research of the books of the present ownership will undoubtedly have the effect of placing many pieces of land on the assessment roll which have heretofore escaped taxation. Besides for this purpose, the Assessor expects to soon resume work on the present ownership books, and in order to make their work perfect they must become in possession of all the information to be had regarding ownership of land within the County. The result of their trip will undoubtedly bear good fruit and enlarge the County's annual income.
